Notes for Contributors

All manuscripts should be submitted via our on-line system, ScholarOne Manuscripts at:
http://mc.manuscriptcentral.com/psrm
Other forms of submission will not be accepted by the editors.

The journal publishes two types of articles:
a) full length manuscripts that present original, well researched, and fully developed empirical or theoretical work
b) research notes

Normal length articles that should not exceed 9,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes that should not exceed 4,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes should contain original work and present a new method or methodology (particularly useful if related software components are included) to solve an important problem in applied data analysis, present a new theoretical idea or argument, or comment on other articles published in the journal. *PSRM* welcomes comments to as well as replications of published articles. These will undergo the usual peer review process and if accepted will be published in the research notes section of the journal.

PSRM uses a single-blind peer review process, thus anonymizing your manuscript is not necessary.

Replication Policy: PSRM has a strict replication policy which adheres to the Data Access and Research transparency (DA-RT) statement subscribed to by many Political Science Journal Editors in 2015. Authors are required to make replication material publicly available at time of publication of the article. The replication materials must be sufficient to replicate results in all tables and figures printed in the article, including simulation material for both theoretical (e.g. agent based models) and empirical (e.g. Monte Carlo experiments) work. Data and replication code for your article, as well as a log demonstrating smooth running of all the replication files, must be uploaded in a single .zip file to the PSRM Dataverse at https://dataverse.harvard.edu/dataverse/PSRM. (See the PSRM Dataverse Guide for a step-by-step walkthrough for uploading your material, which is also linked to on the PSRM Dataverse homepage). This is a necessary condition for publication of the manuscript. All manuscripts are accepted contingent on their replicability, which will initially be assessed by PSRM staff. Manuscripts that are not replicable will be rejected for publication. If your analysis relies on simulation techniques (MCMC, MC experiments) we require authors to set and communicate a seed, so that exact results can be replicated. If this is impossible due to the design of the analysis, replication results need not deviate by more than 5 per cent from published results in the manuscript.

Authors are responsible for obtaining permission to reproduce any material they do not own the copyright for and for ensuring appropriate acknowledgment of such material.

All manuscripts should follow the manuscript preparation guidelines available online in the full instructions for contributors.

Full Instructions for Contributors can be found online at http://www.journals.cambridge.org/psrm/ifc

Rights and Permissions info

All rights reserved. No part of this publication may be reproduced, stored or transmitted in any form or by any means without the prior permission in writing from the copyright holder. This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are also registered with the C.C.C. may, therefore copy material (beyond the limits permitted by, sections 107 and 108 of U.S. Copyright law) subject to payment to the C.C.C. of the appropriate fee per copy. This consent does not extend to multiple copying for promotional or commercial purposes.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Subscriptions

Political Science Research and Methods is published four times a year in January, April, July, and October. The 2021 subscription price (excluding VAT) of a volume, which includes print and electronic access, is £513.00 (US $730.00 in USA, Canada and Mexico); £44.00 (US $67.00) for individuals, which includes print and electronic access, ordering direct from the publishers and certifying that the journal is for their personal use. The electronic-only price available to institutional subscribers is £440.00 (US $703.00 in USA, Canada and Mexico). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Prices include delivery by air when appropriate. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan. Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent or direct to the publisher: Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BS, UK; or in the USA, Canada and Mexico: Cambridge University Press, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Periodicals postage paid at New York, NY and additional mailing offices.

Political Science Research and Methods

Contents

ORIGINAL ARTICLES

223 City limits to partisan polarization in the American public
Amalie Jensen, William Marble, Kenneth Scheve and Matthew J. Slaughter

242 Partisan selective exposure in online news consumption: evidence from the 2016 presidential campaign
Erik Peterson, Sharad Goel and Shanto Iyengar

259 Fiscal rules and electoral turnout
Lasse Aaskoven

275 No calm after the storm—diaspora influence on bilateral emergency aid flows
Hendrik Platte

292 Quitting globalization: trade-related job losses, nationalism, and resistance to FDI in the United States
Yilang Feng, Andrew Kerner and Jane L. Sumner

312 The electoral implications of politically irrelevant cues under demanding electoral systems
Taishi Muraoka

327 Economic distress and voting: evidence from the subprime mortgage crisis
Andrew B. Hall, Jesse Yoder and Nishant Karandikar

345 Media with reputational concerns: yes men or watchdogs?
Greg Chih-Hsin Sheen

365 Campaign finance legislation and the supply-side of the revolving door
Simon Weschle

380 Statistical inference for multilayer networks in political science
Ted Hsuan Yun Chen

398 Technology and protest: the political effects of electronic voting in India
Zuheir Desai and Alexander Lee

414 How valuable is a legislative seat? Incumbency effects in the Argentine Chamber of Deputies
Juan Pablo Micozzi and Adrián Lucardi

RESEARCH NOTES

430 Using screeners to measure respondent attention on self-administered surveys: Which items and how many?
Adam J. Berinsky, Michele F. Margolis, Michael W. Sances and Christopher Warshaw

438 Propaganda to persuade
Tinghua Yu

445 It's a (coarsened exact) match! Non-parametric imputation of European abstainers' vote
Damien Bol and Marco Giani
