

STARTING NOW

This year the *BMJ* launches a new series of books, the Memoir Club, featuring reminiscences and works of general interest by medical men and women.

"The craft of the essay is no less demanding than the science of the clinic. We are fortunate that there remain such excellent practitioners of both as Sir Christopher."

Br Med J 1987; 294: 1681

The first title in the series is *Doctors in Science and Society* by Christopher Booth.

Director of the Clinical Research Centre at Northwick Park, president of the BMA, and former professor of medicine at the Royal Postgraduate Medical School, Sir Christopher Booth is also a respected medical historian. In this collection of essays he examines the lives and times of some eighteenth century medical scientists, among them Sir Samuel Garth, FRS, physician to the Duke of Marlborough and friend and fellow poet of Alexander Pope; and Dr John Dawson, a country practitioner and largely self taught mathematical genius, twelve of whose pupils went on to become senior wranglers at the University of Cambridge.

Not concerned only with history, *Doctors in Science and Society* also considers the role of modern medical science and its relationship with technology, and the development and function of two major medical institutions, the Medical Research Council and the Royal Postgraduate Medical School. Written with elegance and authority, this fascinating collection is a must for anyone interested in the past and future of medical science.

Journal of the History of Biology

*Journal
of the
History
of
Biology*

Published by
D. Reidel
Publishing Company
P.O. Box 17, 3300 AA Dordrecht, The Netherlands

Editor

EVERETT MENDELSON, *Harvard University, Cambridge, USA*

The *Journal of the History of Biology* is devoted to the history of the biological sciences, with additional interest and concern in philosophical and social issues confronting biology. While all historical epochs are welcome, particular attention has been paid in recent years to developments during the nineteenth and twentieth centuries. The journal is now published three times each year. It serves the working biologist who needs a full understanding of the historical and philosophical bases of the field as well as serving the historian of science interested in following developments in the biological sciences.

The Journal of Medicine and Philosophy

Editor

H. Tristram Engelhardt, Jr., *Center for Ethics, Medicine, and Public Issues, Baylor College of Medicine, Houston, USA*

Associate Editor

Stuart F. Spicker, *School of Medicine, University of Connecticut Health Center, Farmington, USA*

The Journal of Medicine and Philosophy continues to explore the shared themes and concerns of philosophy and the medical sciences. Not since Galen's time has the contact between medicine and philosophy been so widespread; the journal seeks to meet the challenge of this dialogue by providing a forum for philosophers, medical practitioners, educationists, and humanists to examine the problems and controversies stimulated by the engagement of these two disciplines.

The range of issues having philosophical import for medical research and practice is enormous. New developments in medical technology and expertise frequently create scientific and humanistic dilemmas, and medical decision making always involves philosophical presuppositions. Moreover, the concerns of philosophy often converge with those of medicine, as philosophers attempt to understand the nature of knowledge and the human condition. The purpose of the journal is to analyze this multifaceted relationship and to raise its discussion to a responsible and intellectually rigorous level.
