Simone Weil's Philosophy of Culture

Readings Toward a Divine Humanity

Richard Bell, Editor

This is one of the very few books available in English to present a comprehensive interpretation of the philosophy of Simone Weil and how her thought can help us think about issues of contemporary importance such as work, justice, the law, war and peace, and matters of more general moral and theological concern.

REAL CHOICES / NEW VOICES

The Case for Proportional Representation Elections in the United States

Douglas J. Amy,
Mount Holyoke College
224 PAGES

20 TABLES AND GRAPHS / \$29.50, CLOTH

At a time when the American electoral system has been criticized as unfair, outmoded, and undemocratic, Amy propounds proportional representation, demonstrating that it would create more representative legislatures; minimize wasted votes; eliminate gerrymandering; encourage issue-oriented campaigns; enhance representation of women and minorities; and, ultimately, increase voter turnout.

ARMS CONTROL IN THE PRENUCLEAR ERA

The United States and Naval Limitation Between the Two World Wars

Robert Gordon Kaufman, University of Vermont
289 PAGES / \$16.00, PAPERBACK

Kaufman adopts a broad international approach as he examines the naval arms limitation process that culminated with treaties intended to end the naval competition between the United States, Great Britain, and Japan—the Washington treaties of 1922, the London Treaty of 1930, and the London Treaty of 1936.

MAHATMA GANDHI

Nonviolent Power in Action

Dennis Dalton,
Barnard College
288 PAGES
\$29.50, CLOTH

Dalton's political biography moves from the birth of Gandhi's method of nonviolent resistance in South Africa to an in-depth analysis of two of his signal triumphs: the civil disobedience movement of 1930 and the historic Calcutta fast of 1947. Dalton reveals Gandhi as a political theorist who was vitally concerned with practice and who persistently tested his beliefs in the crucible of politics. He pays particular attention to the role of religious faith in Gandhi's social reform, how his views on the caste system affected his political idealism, and his changing perception of his own identity.

THE LOGIC OF ANARCHY

Neorealism to Structural Realism

Barry Buzan, Charles Jones, Richard Little

267 PAGES

\$15.50, PAPER

The Logic of Anarchy is the first systematic attempt to rethink neorealist theory, breaking free from the Cold War concerns that dominated neorealism and setting structural theory into a less politicized, and more broadly historical and systemic, context. By reconnecting unit and structural analysis and showing how structural ideas can be used to join many aspects of international relations theory into coherent whole, it lays the groundwork for a comprehensive theory of international relations based on a methodologically open structural realism.

PROGRESS IN POSTWAR INTERNATIONAL RELATIONS
 Emanuel Adler and Beverly Crawford
 497 PAGES
 \$18.50, PAPER

In a period of profound ideological, political, and economic change, *Progress in Postwar International Relations* proves that the question of whether the practice of international relations has changed for the better is no longer hypothetical. Adler and Crawford expound a "human-realist" conception of international relations, in which progress occurs not necessarily out of moral development, but because nation-states redefine their national interests so as to enhance security, welfare, and human rights values across national borders.

NEOREALISM AND NEOLIBERALISM
 The Contemporary Debate
 Edited by David A. Baldwin, *Columbia University*
 400 PAGES

\$17.50, PAPER / \$49.00, CLOTH

"A valuable introduction and summary of the central theoretical issues in understanding contemporary international politics."

—Joseph S. Nye, Jr., Chairman, National Intelligence Council

"An excellent sampler of the arguments that dominated debates among U.S. international relations theorists in the 1980s and early 1990s. It is likely to appear on lots of graduate reading lists. This useful book illustrates not only this field's disputes but also signs of some learning and accumulation of knowledge."

THE STATE AND SOCIAL POWER IN GLOBAL ENVIRONMENTAL POLITICS
 Edited by Ronnie D. Lipschutz, *University of California, Santa Cruz*, and Ken Conca, *Mount Holyoke College*

360 PAGES / \$17.50, PAPER / \$55.00, CLOTH

Examining the ways in which the complexity of social, political, and economic relations will complicate the efforts initiated at the June 1992 Earth Summit in Rio de Janeiro, *The State and Social Power in Global Environmental Politics* suggests that national governments must begin to acknowledge new actors in their environmental policies.

Bush Years
Charles Kolb

Throughout his presidency, and most bitterly at its end, George Bush's administration was accused of having no domestic policy agenda at all. Was this true? Charles Kolb served as the President's Deputy Assistant for Domestic Policy, and his history of what happened to the domestic agenda in the Bush years is often biting and brutally frank about opportunities lost and the people responsible. Kolb describes an atmosphere in which debate and programs were stifled or ignored, and the closer one got to the Oval Office, the greater was the sense of timidity and purposelessness.

DOUBLE LIVES
Spies and Writers in the
Secret Soviet War of
Ideas Against the West
Stephen Koch

The goal was to turn the Russian revolution into a world revolution, and the strategy, led by a propaganda genius, was a masterful campaign to align Western intellectuals with the shifting policies of Stalin's Soviet Union. Koch's book documents how this clandestine army, although unsuccessful in its attempt to convert the West to the communist cause, profoundly affected thirty years of history.

**THE COST
OF TALENT**
How Executives and
Professionals Are Paid and
How It Affects America

Derek Bok,
Harvard University

The continuing uproar over top executive pay packages in American companies calls attention to an even larger and more important issue: in general, do we compensate highly educated people in the United States in ways that serve the best interests of the nation? In the most revealing study yet undertaken of compensation practices in the fields of business, law, medicine, higher education, teaching, and government, Derek Bok argues persuasively that the compensation paid to top executives, lawyers, and doctors cannot be justified. He concludes that we must rethink our deepest values, motivations, and priorities reflected in our compensation practices in order to better serve America's long-term interests.

MARKETS AND MAJORITIES

The Political Economy of Public Policy

Steven M. Sheffrin,

University of California, Davis

America's government intervenes in almost every aspect of its citizens' daily lives. From the air we breathe, to our health, wealth, and old age security, Americans wade through a vast political ocean. Explaining traditional theories of market failure used to justify intervention, Sheffrin combines them with crucial questions of political viability and policy histories. He applies such analysis to the areas of health care, social security, environmental policy, product liability, trade policy, and fiscal and budgetary policy. He argues that beneath each area lies a unique calculus of market failure and political pressures, and convincingly demonstrates that no single policy can be understood out of economic context. By examining both sides of each policy area, Sheffrin reveals a minefield where, in many cases, politics cannot help but fail as badly as markets.

The Fate of Marxism in Russia

Alexander Yakovlev

Introduction by Thomas F. Remington

Foreword by Alexander Tsipko

Translated from the Russian by Catherine A. Fitzpatrick

In this powerful book, a major architect of perestroika, leading sponsor of glasnost, and close associate of Mikhail Gorbachev acknowledges the decay of his country, reveals his own progression from Party ideologist to critic of Marxism and Communism, and urges the restructuring of Soviet society on a new basis of democracy, morality, and economic efficiency.

“One of the architects of perestroika meets Marxism on its own intellectual turf and beats it.”—James A. Baker, III, 61st Secretary of State \$29.95

The Moral Economy of Labor

Aristotelian Themes in Economic Theory

James Bernard Murphy

Murphy builds on Aristotle's views on nature and moral reason to develop a new Aristotelian theory of productive labor. According to Aristotle, work must encompass both its conception and execution. If we allow workers to execute what they have first conceived in thought, says Murphy, we will encourage both efficient production and human flourishing.

“This book, which provides a new Aristotelian framework for social and political theory, is one of the most important works of political theory in recent decades.”—Larry Arnhart \$25.00

When Illness Strikes the Leader

The Dilemma of the Captive King

Jerrold M. Post, M.D., and Robert S. Robins

Illness and instability in high office has often shaped the course of world events. Drawing on examples from around the world and throughout history—including George III, Winston Churchill, Adolph Hitler, Menachem Begin, Deng Xiao-peng, and Ronald Reagan—this important and absorbing book reveals how mortal illness can affect decisions and make a leader more determined to leave his mark on history.

“This readable and important book emphasizes that the health and stability of heads of other nations may have as much to do with our national security as weapons and armies.”

The Experience of Occupation, 1941-1944

Mark Mazower

The first full account of the experience of occupation, from the perspective of those that endured it, and from those that imposed it. Mazower offers a vividly human picture of the experiences of resistance fighters and black marketeers, teenage German conscripts and Gestapo officers, Jews and starving villagers. The text is richly illustrated with photographs drawn from German, British, and Greek sources.

“Mazower's crisp, dramatic presentation of all aspects of life in occupied Greece is a model of clarity and compactness. There is a brightness of vision in this work, which is as unyielding and unsentimental as the craggy beauty of Greece.”

Announcing a new series

Constitutionalism and Democracy

David O'Brien and Kermit Hall, Series Editors

This new, interdisciplinary series will focus on three complimentary areas: comparative studies of constitutional democracy, judicial politics, and legal culture; the conceptualization and interpretation of constitutional and democratic principles; continuity and change in the constitutional politics of the United States, in various periods and in relation to changing social and economic forces. Overall, the series is dedicated to elucidating the historical and political contexts of constitutionalism and democracy.

The Transnationalization of Service Industries: An Empirical Analysis of the Determinants of Foreign Direct Investment by Transnational Corporations

International transactions in services have become a significant part of the world economy which is increasingly becoming a services economy. Drawing upon theories developed by economists and others, this study identifies the determinants of the expansion of transnational service corporations and verifies them empirically on the basis of available data. It analyses decisions of 210 of the largest transnational corporations in 11 service industries. Hypotheses examining major factors affecting FDI in services - market size, home-country business presence, Government regulations, competitive advantages of service industries, industry concentration and tradability of services - are tested using a logistic regression model.

Debt-Equity Swaps and Development

The prolonged debt crisis has resulted in an evolution of debt conversion procedures in an effort to reduce the stock and servicing cost of debt owed to transnational banks by developing countries. The "debt equity swap" is one of those procedures.

Drawing on the experience of Brazil, Chile, Mexico and the Philippines this study discusses the successes and pitfalls in design and implementation of debt-equity swaps programmes. The study marks a major step in analyzing empirically the impact of debt-equity swaps on developing countries, particularly on the promotion of inflows of foreign direct investment.

FREE TO HATE

The Rise of the Right in Post-Communist Eastern Europe
Paul Hockenos

"Rich in details and anecdotes, *Free to Hate* is the first important book on the new right-wing specter haunting Eastern Europe and the post-communist world. Paul Hockenos, whose journalistic reports from Eastern Europe have consistently been among the best, has done an impressive job in putting together so much information, from so many countries, into an exciting, informative, well-written book."

BEYOND THE NEW RIGHT

Markets, Government
and the Common Environment
John Gray

Beyond the New Right presents a critique of the political thought of the New Right by one of its principal theorists. John Gray criticizes the New Right as a form of Enlightenment rationalism which is alien to true conservative philosophy and whose essential insight is the flawed nature of all human institutions, including the market.

A FOURTH WAY?

Privatization, Property,
and the Emergence of New
Market Economies

Edited by Gregory S. Alexander
and Grazyna Skapska

"The most exciting thing about this collection is . . . the extraordinary synthesis in political economic theory. The collection explores a middle ground between capitalism and socialism, developing a model of property that satisfies the desire for economic growth and public welfare at the same time."

GAYS AND THE MILITARY

Joseph Steffan versus the United States

EDITED BY

MARC WOLINSKY AND KENNETH SHERRILL

Marc Wolinsky and Kenneth Sherrill have collected here the affidavits filed on behalf of Joseph Steffan in his landmark lawsuit against the United States government, together with the counter-arguments of the Department of Defense and the extraordinary opinion of the U.S. District Court.

"This is a fascinating and valuable collection, both in substance and approach. I know of nothing else in the literature of politics and the judicial process that reveals the anatomy of a case in this manner."—Robert L. Hardgrave, Jr., University of Texas-Austin

FEDERAL POLICYMAKING AND THE POOR

National Goals, Local Choices, and Distributional Outcomes

MICHAEL J. RICH

Michael Rich examines to what extent benefits of federal programs actually reach needy people. His extensive analysis of the Community Development Block Grant Program (CDBG) reveals that the crucial divisions in domestic policy are between constellations of participants in the different governmental arenas.

"... addresses an important and complicated question. It does so with simplicity and clarity, in a novel and insightful manner that leads to nonintuitive findings and imaginative policy recommendations."

ALLIES, ADVERSARIES, AND INTERNATIONAL TRADE

JOANNE GOWA

During the Cold War, international trade closely paralleled the division of the world into two rival political-military blocs. NATO and GATT were two sides of one coin; the Warsaw Treaty Organization and the Council for Mutual Economic Assistance were two sides of another. In this book, Joanne Gowa examines the logic behind this linkage between alliances and trade and asks whether it applies not only after but also before World War II.

“ . . . an outstanding and original book. . . . This work will have a major impact on the study of international political economy.”

RED SUNSET

The Failure of Soviet Politics

PHILIP G. ROEDER

Why did the Soviet system fail? Philip Roeder finds the answer to these questions in the Bolshevik “constitution”—the fundamental rules of the Soviet system that evolved from revolutionary times into the post-Stalin era. In Roeder’s view, the problem was not that Soviet leaders did not attempt to change, but that their attempts were so often defeated by institutional resistance to reform.

“Red Sunset is an important book. Roeder’s analysis of the Soviet ‘constitution’ is an original, synthetic interpretation of Soviet political history, based on a structural theory of political dynamics. It will be essential reading for students of Soviet politics. . . .”—George W. Breslauer, University of California, Berkeley

NORTHEASTERN

THE WHITE HOUSE

The First 200 Years

Edited by Frank Freidel and William Pencak
Introduction by John Milton Cooper, Jr.

In this collection, prominent historians and journalists reflect on and assess the first 200 years of the White House to provide insights into the evolution of the "people's house" from its limited role in a struggling new nation to its present role as the embodiment of America's view of the presidency.

"A baker's dozen of distinguished scholars has done full justice to the dream of the preeminent Roosevelt biographer, Frank Freidel—that they could capture the life and spirit and history of the White House in its ever shifting combinations of simplicity and grandeur, durability and vulnerability, power and gridlock, vibrant life and sudden death." — James MacGregor Burns

THE WOMAN'S BIBLE

Elizabeth Cady Stanton

Introduction by Maureen Fitzgerald

In 1895 Elizabeth Cady Stanton published a controversial critique of the Bible that attributed woman's powerlessness not only to the laws of the state but also to the teachings of the predominant religions. Nearly a century later, her views remain relevant in the current debate about the role of women in the church. A new introduction places the document in its historic context and comments on its place within religious studies.

Northern Protest

Martin Luther King, Jr., Chicago, and the Civil Rights Movement

James R. Ralph, Jr.

"Jim Ralph has written the fullest and most perceptive account yet to appear of the 1966 civil-rights campaign in Chicago, a crucial event in the history of the movement. Ralph has traced the origins of the campaign in the politics of Chicago's African-American community; he has described the uneasy relationship between local activists and the national civil-rights leaders who came to their aid; and he has explained why the 1966 campaign produced reactions in Washington so different from those the earlier campaigns in the South had created.

Chester Bowles— New Dealer in the Cold War

Howard B. Schaffer

When Harry Truman named him ambassador to India in 1951, Chester Bowles was already a prominent figure in American public life and yet his past hardly presaged the turn his path would take in Asia. Over the next two decades, at home and abroad, Bowles would become one of the leading liberal lights in American foreign policy. His biography is also the story of America finding its place in a changing world, a story of remarkable relevance to our own post-cold war era.

"An extraordinarily fine book...Schaffer takes us inside the tensions that recurrently wax and wane in American foreign policy...An insightful and judicious portrayal of Chester Bowles."

The Anatomy of Antiliberalism

Stephen Holmes

Liberal: spoken in a certain tone, heard more and more often lately, it summons up permissiveness, materialism, rootlessness, skepticism, relativism run rampant. How has liberalism, the grand democratic ideal, come to be a dirty word? This book shows us what antiliberalism means in the modern world—where it comes from, whom it serves, and why it speaks with such a forceful, if everchanging, voice.

The Politics Presidents Make

Leadership from John Adams to George Bush

Stephen Skowronek

Stephen Skowronek's wholly innovative study demonstrates that presidential leadership needs to be understood in "political time." Presidents are continually disrupting and transforming the political landscape, but each president also inherits a particular type of political context, a regime shaped by his predecessors that he rejects or affirms. Who is a new president replacing, what previous program is he extending or rejecting, and how strong is the resistance to his new agenda? Skowronek's penetrating stories of fifteen presidents illuminate his theory about how political time affects presidential leadership. The conflicts of James Monroe offer insight into the leadership of Lyndon Johnson; the contretemps of Franklin Pierce prompt a reassessment of Jimmy Carter; the battles of Andrew Jackson recast our understanding of the leadership of Ronald Reagan.

The Business of Private Protection

Diego Gambetta

"[Gambetta] asks precise questions about a well-defined object of study placed firmly in its particular context...He shows in detail how protection against competition is secured and how intelligence-gathering and secrecy, violence and the securing and maintaining of reputations can be understood as means of dealing in the special commodity of protection...From within this illuminating conceptual framework, he then asks a number of controversial historical questions...Best of all is Gambetta's nuanced discussion of what maintains the organization and cohesion of the Mafia."

The Soviet Social Contract and Why It Failed

Welfare Policy and Workers' Politics from Brezhnev to Yeltsin

Linda J. Cook

Linda Cook provides the first critical assessment of the Soviet social contract—a tacit agreement between the post-Stalin regime and the working class whereby the state provided economic and social security in return for the workers' political compliance. She asks what effect such a contract may have had on Gorbachev's attempts to liberalize the economy and she provides case studies on job security, price stability, and social service subsidies. \$45.00 cloth

Westminster's World

Understanding Political Roles

Donald D. Searing

Applying a new motivational role theory to materials from extensive firsthand interviews conducted during the eventful 1970s, Donald Searing deepens our understanding of how Members of Parliament understand their goals, their careers, and their impact on domestic and global issues. He explores how Westminster's world both controls and is created by individuals, illuminating the interplay of institutional constraints and individual choice in shaping roles within the political arena. No other book tells us so much about political life at Westminster.

Heidegger's Crisis

Philosophy and Politics in Nazi Germany

Hans Sluga

Starting with Fichte and Nietzsche, whom the Nazis claimed as their intellectual foebears, *Heidegger's Crisis* shows not only how the Nazis exploited philosophical ideas and used philosophers to gain public acceptance, but also how German philosophers, using National Socialism to promote themselves and their own philosophical agenda, played into the hands of the Nazis. Sluga describes the growth, from World War I onward, of a powerful right-wing movement in German philosophy, in which nationalistic, antisemitic, and antidemocratic ideas flourished.

"Finally, a fair and informed account of Heidegger's infamous political stand. It will become the final reference on this subject."

Interpretation and Social Criticism

Michael Walzer

"Learned, cogent and provocative. It avoids the pretensions of both scientific certainty and grand theory and treats social criticism as the 'educated cousin of common complaint.' It also succeeds brilliantly in making an ancient religion relevant to the contemporary political imagination, which perhaps confirms Santayana's point that the prophet is he who draws truth from fable."

Poli-Ware A POLITICAL SCIENCE
SOFTWARE REVIEW PROGRAM

The APSA has a pilot project to identify, evaluate and disseminate instructional software. The project is supported by IBM's Academic Information Systems.

Authors of political science software for students are invited to submit their programs, with the information requested below, for review by the APSA Software Review Committee. Software must be IBM compatible.

Software submissions should include:

- Five copies of the program
- A statement of the program's purpose and learning objectives
- Descriptions of:
 1. student audience, topics and courses
 2. methodology and teaching strategy
 3. hardware and other software needed to run the programs

This information will be the basis of a user's guide to the software.

Instructional and research software judged by the Review Committee to be of exceptional pedagogical and technical quality will be offered for sale. Proceeds will be used to pay royalties to authors and underwrite the peer review process.

The political science software will be widely distributed through APSA as part of The Academic Software Library (TASL) in cooperation with Wisc-Ware Software Distribution Center.

ABORTION AND AMERICAN POLITICS

Barbara Hinkson Craig, *Wesleyan University*, and David M. O'Brien, *University of Virginia*

*Although it almost certainly won't get much credit for it, this is a near-perfect example of that *rara avis*, the impartial report on a white-hot public issue. Each chapter is full of meaningful quotation and value-neutral elucidation, and each is written in a rainwater-clear prose that makes the book nonpareil for learning what, in terms of law and public policy, abortion in the U.S. is all about. **ALA Booklist**

Abortion and American Politics* provides a superb user manual for those befuddled by the depth of feeling of activists on both sides of this issue. It also outlines cogently how the system might overcome the seemingly insuperable obstacles to reconciliation. **Colin Campbell, Georgetown University

*This is an outstandingly lucid and sustained analysis of the politics of abortion rights. A comprehensive resource covering all of the important constitutional cases related to abortion rights. The lines of legal argument and crucial quotations are brought together in a well organized and thorough fashion. An invaluable supplement for courses on women and politics and constitutional law.

Kathleen Knight, University of Houston

*Few issues have roiled the waters of American politics in recent years as much as abortion. Finally, thanks to Craig and O'Brien, we have a study which ably explores this issue in all of its primary dimensions: the courts and their key rulings; the interest group struggles; state and national politics; and public opinion. Craig and O'Brien have brought it all together superbly.

Everett Carll Ladd, University of Connecticut

*In the tradition of *Gideon's Trumpet*, Craig and O'Brien chronicle the abortion debate and its pervasive and enduring role in American politics. Not surprisingly, given the authors' expertise, this is certain to become *the* book to read for anyone trying to understand this controversial issue.

Karen O'Connor, Emory University

*An illuminating and well written study that accomplishes what the authors promise: It vividly illustrates how our political institutions actually operate. It would be appropriate for use in a broad array of American politics courses.

Barbara Sinclair, University of California, Riverside

**Abortion and American Politics* is superb, far and away the best book on the topic available. Even more telling, it is one of the two or three best *general* treatments of the impact of the U.S. Supreme Court on American government published in the past decade. It is perfect for use in a wide range of political science courses.

Alec Stone, University of California, Irvine

*Finally, with *Abortion and American Politics*, Craig and O'Brien move beyond polemics and hyperbole to give us a dispassionate and unbiased analysis of abortion as a political issue on which honorable men and women can disagree. A welcome contribution to the literature.

Raymond Tatalovich, Loyola University Chicago

*This volume fills an important but mostly overlooked niche and need in the abortion literature—the study of abortion law combined with the study of abortion politics. Craig and O'Brien . . . succeed in revealing new insights on a subject that has been often scrutinized but rarely as well understood. **Choice**
