

CORRIGENDUM

Response of Chironomidae to environmental disturbances in a high mountain lake in Patagonia during the last millennium – Corrigendum

Natalia Williams, Diego Añón Suárez, Maria Rieradevall, Andrea Rizzo, Romina Daga, María A. Arribére and Sergio Ribeiro Guevara

DOI: <https://doi.org/10.1017/qua.2019.5>, Published by Cambridge University Press, 23 April 2019

In the original publication of this article (Williams et. al), [Figure 4](#) was printed incorrectly. The correct [Figure 4](#) is as follows:

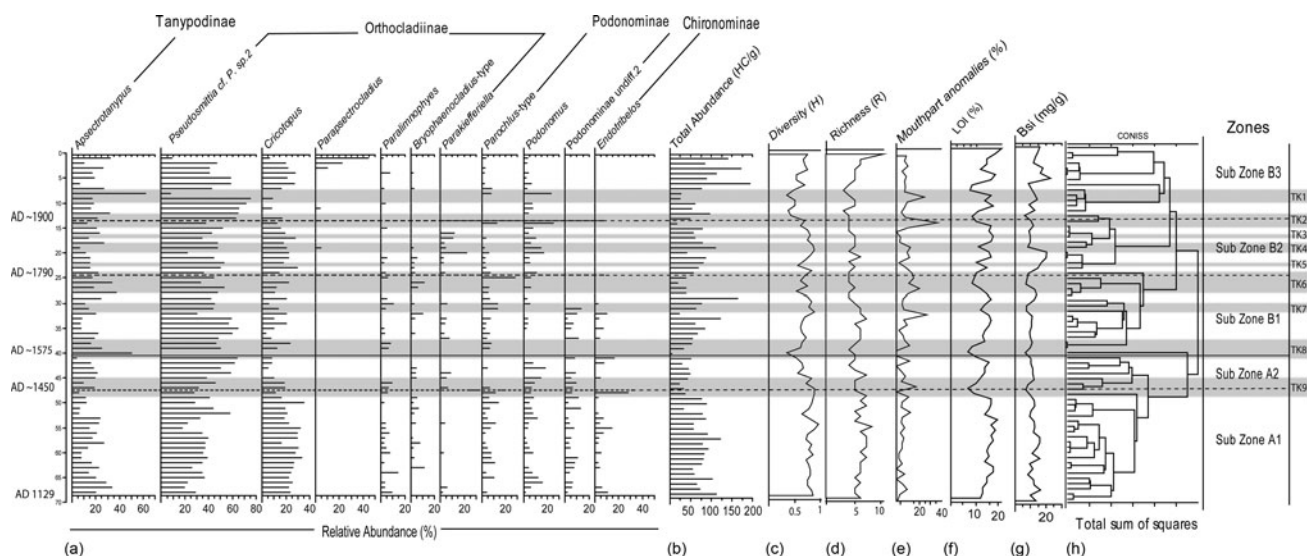

Figure 4. (a) Relative abundance of Chironomidae taxa of Lake Tonček; (b) total abundance of head capsules (HC/g); (c) diversity index (H); (d) richness (R); (e) mouthpart anomalies (%); (f) loss on ignition (LOI, %); (g) biogenic silica (BSI) concentration profile (mg/g); (h) chironomid zones calculated by a CONISS cluster analysis (Tilia version 1.7.16). Volcanic ash layers are presented in gray (TK1–TK9).

The authors apologize for this error.
