

No Other Patient Prep Handles the Ups & Downs

Like New **solo-prep**[™] Topical Gel

Deseret O.R. announces SOLO PREP[™] Gel Skin Scrub Kit the first one-step scrub and paint patient prep

- **Just as effective** in reducing skin bacteria as the scrub and paint technique.*
- **Safer for you and your patients.** Less chance of spilling onto the floor or pooling under the patient.
- **Easier to apply.** Won't run off hard-to-prepare areas.
- **Cost effective.** Reduces set-up time, solution waste, clean-up labor. Saves up to 50% in valuable storage space.
- **From the manufacturers of E-Z Prep[®] Trays and Kits**—the #1 disposable patient prepping system.

NO COMPARISON

Reorder #2750

When it comes to disinfection, CIDEX FORMULA 7* Long-Life Activated Dialdehyde Solution stands on a proud record of scientific acclaim. And stands out for its unequalled combination of efficacy and safety.

No one else can claim as much: proven and unsurpassed efficacy;¹ non-corrosive alkaline base;²

economical 28-day usability; surfactants for complete wetting and thorough rinsing; fresh mint scent; clear green color for easy location of submerged instruments.

1. Disinfects completely in 10 minutes, and sterilization can be achieved in 10 hours at room temperature. It is not possible to test effect on human hepatitis virus through currently available methods.

2. When used as directed.
