## in nervous tension and anxiety neuroses

'MEPAVLON', I.C.I.'s new tranquilliser, is distinguished by its ability to relieve both mental and muscular tension without dulling consciousness. It has proved to be particularly suitable for calming the nervous patient troubled with anxiety, restlessness and irritability. In such cases, 'Mepavlon' stabilises the emotions, relaxes tension and relieves nervous insomnia by inducing natural sleep. No less important: its toxicity is low, it is well tolerated, and side effects are rare. 'Mepavlon' thus combines effectiveness with safety and provides a most satisfactory treatment for the psychoneuroses.

*Fully active by mouth, 'Mepavlon' is presented in tablets each 400 mgm. in containers of 30 and a dispensing pack of 250.*

# PACATAL

10-(N-methyl-3-piperidylmethyl) phenothiazine

TRADE MARK

Pacatal is the improved tranquillizing drug with a range of activity significantly different in some aspects from that of chlorpromazine. Within the psychiatric field, response to Pacatal is most marked

**in the treatment of**  
**PARANOID SCHIZOPHRENICS**  
**AGITATED DEPRESSIVES**  
**SENILE PATIENTS**

Pacatal tends to produce better results in patients over fifty than in the younger age groups and it has also been observed that women often respond better than men.

**Presentation:**

Tablets 25 and 100 mg. in bottles of 50 and 500.  
Ampoules, each containing 50 mg. in 2 ml.  
in boxes of 10 and 50.

## *A Question of Stability*

For many people, the stresses and strains of everyday existence may have a profound effect on the carefully built edifices of their lives and it may take just that extra jog to bring their insecure little world tumbling about their ears.

You cannot possibly control the conditions which weaken the foundations of such patients' lives. But, by prescribing Equanil, you can provide them with a cement to rebuild a steady and more stable frame of mind out of a rubble of nebulous fears and fancies. Equanil restores repose—safely, effectively and reliably.

# EQUANIL (MEPROBAMATE)

PACKS: 400 mg. tablets in containers of 20 and 250.

*The word 'Equanil' is the registered trade mark of*

## INSTRUCTIONS TO AUTHORS

---

Strict observation of the following requirements will save intending authors considerable time and worry, and will facilitate the publication of papers submitted.

(1) Authors should consult a current issue to see how a paper should be presented. They should consult *General Notes on the Preparation of Scientific Papers*, published for the Royal Society by the Cambridge University Press, 200 Euston Road, London, N.W.1 (price 2s. 9d. post free).

(2) The title should be brief and contain no sub-heading. This should be followed by the author's name, his qualifications and his present appointment.

(3) Omit a summary of the literature when this has been adequately summarized elsewhere.

**(4) For reasons of economy, case-histories of patients can be published only when they are of exceptional scientific interest.**

(5) Diagrams and graphs must be drawn in black ink with properly printed lettering. If they have to be redrawn by the printer, the cost, which may amount to several pounds, will be charged to the author.

(6) Tables and graphs should be kept as few as possible. If they number more than a few, the author must be prepared to pay part of their cost.

(7) Any deviation or difference that might be due to random sampling must, if it is to be discussed in its general, scientific significance, be first shown, by calculation of the appropriate probability, to be significant statistically.

(8) All references should be given at the end of the paper, in alphabetical order, and be numbered, i.e.

(1) SMITH, A. B., *J. Ment. Sci.*, 1950, **95**, 493.

(2) THOMAS, B. C., *Arch. Neur. Psychiat.*, 1955, **74**, 489.

In the body of the paper they should appear as: Smith (1), Thomas (2).

(9) When the proof arrives from the printer it is for the correction of printer's mistakes only. Larger alterations can be made only with the Editor's permission and if the author is willing to defray the cost.

(10) Each author and co-author will receive 10 reprints of his paper free of charge. If further reprints are required the order should be sent **direct** to Messrs. Headley Brothers, Ltd., The Invicta Press, Ashford, Kent.

(11) A paper sent to the Editor-in-Chief is, as a rule, sent to one of the panel of Referees set out on the cover of the Journal for his opinion. Papers are as a rule not rejected until a second or further opinion has been received.

In coma

**delirium***depression*

# PARENTROVITE

**Injectable B complex with vitamin C**

A massive dose of injectable B complex with vitamin C . . . to restore normal cerebral functions in toxic states due to narcotic or barbiturate drugs, alcohol, or acute infections.
