Women in the Medieval English Countryside

Gender and Household in Brigstock Before the Plague

JUDITH M. BENNETT, *University of North Carolina at Chapel Hill*

Unlike most studies of working women, which have typically focused on the 19th and 20th centuries, this study reconstructs the public lives of peasant women and men during the sixty years before the Black Death of 1348-49 to show that women faced profound political, legal, economic, and social disadvantages in their dealings with men.

Edward Stafford

Third Duke of Buckingham, 1478-1521

Barbara J. Harris. In 1485, Edward Stafford was the only duke in England and the largest private landowner in the country. Yet, in 1521, he was suddenly arrested, tried, and executed for high treason. This first book-length study of Buckingham has a dual purpose: to raise serious questions about current interpretations of the relationship between crown and nobility in the early Tudor period, and to deepen our knowledge of early 16th-century social history. The book delves into the rich Stafford archives to provide a full picture of Buckingham's daily life, his family, and his household. The author's analysis of the administration of his vast estates measures the success of a great peer in extracting income from his property. \$37.50

ENGLISHMEN ABROAD

Being An Account Of
Their Travels In The
Seventeenth Century

ROBERT MUNTER and CLYDE GROSE

"There have been several studies focusing upon a single aspect of seventeenth-century English travel...but few modern endeavors have been made to encompass travel of every sort.

"It is the purpose of this book to provide such a compendium... [It] presents a collection [of extracts from the writings of thirty-nine travellers] not only for each entry's intrinsic interest, but as well to represent the development of travel accounts as a literary genre and to suggest the role this new genre played in the worldly education of England..."
