## **The Modern Predicament**

H. J. PATON

Professor Paton's 1951 Gifford Lectures discuss the moral predicament of men, especially religious men, living in an age of scientific scepticism, and how far the divergent points of view of religion and science can be satisfactorily reconciled. 30s.

## **Moral Judgement**

D. DAICHÈS RAPHAEL

Deals with most of the problems of Moral Philosophy by concentrating on two of them: the criterion of right action and the nature of moral judgement. Rejecting utilitarianism, it shows how principles of moral obligation may be unified under Kant's formula of treating persons as ends-in-themselves. 16s.

## **The Central Philosophy of Buddhism**

T. R. V. MURTI, M.A., D.LITT.

A study of the Madhyamika doctrine of the "Sunya"—a Buddhist conception which profoundly influenced Indian thought. Basing himself on the original texts the author has recorded this vital system with thoroughness and understanding. 30s.

**GEORGE ALLEN & UNWIN LTD**

## **The Philosophical Movement in the Thirteenth Century**

FERNAND VAN STEENBERGHEN

This is the text of a series of six lectures delivered at the Queen's University, Belfast. In it the author examines the development of philosophical thought during the 'great century' of scholasticism, with particular reference to the teaching in the faculties of Arts and Theology in the University of Paris. He also outlines and discusses recent controversies about the history of the evolution of the thought of the thirteenth century, and especially the influence of Aristotelianism, Averroism and Neoplatonism.
