

NOTES FOR CONTRIBUTORS

Contributions for publication should be addressed to The Editors, Geological Magazine, Sedgwick Museum, Downing Street, Cambridge, CB2 3EQ, England.

All contributions, whether articles, correspondence or reviews, must be typed in duplicate on one side of the paper, double spaced throughout, with a wide margin on the left of each page and a narrower margin on the right. Any minor corrections should be made neatly in the typescript, leaving the margins clear.

Articles must be accompanied by a brief summary. Contributions should follow the general style of papers in recent issues of the Magazine and the principles laid down in *Notes to Authors* (*Proc. Geol. Soc. Lond.*, No. 1627, Oct. 1965). Headings should be set out clearly, but not underlined. Primary headings should be in lower case, at margin, with arabic numeral; sub-headings should be numbered 2.a., 2.b., etc., and tertiary headings 2.a.1., 2.a.2. No cross references should be given by page number, but 'above' and 'below' should be used with the section specified, e.g. Section 2.a.1. The total length of a paper should not in general exceed 20 pages of the Geological Magazine; preference and priority are given to short papers. The accuracy of references is the responsibility of authors. References must be double spaced and abbreviated in the form of the *World List of Scientific Periodicals* 4th Edition as far as possible, e.g. Lapworth, C. 1878. The Moffat Series. *Q. Jl geol. Soc., Lond.* **34**, 240–343. Books should be cited briefly as: Burns, R. G. 1970. *Mineralogical applications of crystal field theory*. 224p., C.U.P., London. Unpublished work, e.g. from theses, should normally be referred to in the text in parentheses and not included in the reference list unless in the press.

Illustrations must be drawn to allow reduction to maximum size of 165mm × 110mm; originals must not exceed 495mm × 110mm and must be sent in a flat package. Lettering must allow for legibility after reduction (i.e. equivalent to 1mm as a minimum on reduction). Duplicates of illustrations may be prints or, preferably, reductions. Metric units of the SI system are preferred. Illustrations in the text will be referred to as figures (Fig. 2, 2a, etc.), and halftone plates will be referred to (also in arabic) as Plates 2, 2a, etc. Folding plates will not be accepted. Captions for figures and plates must be typed on separate sheets.

Twenty-five offprints of each paper will be provided free of charge. Additional offprints may be purchased according to a set scale of charges.

Geological Magazine

Volume 110, Number 1, January 1973

KOREN', Tatjana N. The Silurian and Lower Devonian graptolite-bearing strata in the USSR (a review)	1-17
LOESCHKE, J. Petrochemistry of Paleozoic spilites of the eastern Alps (Austria)	19-28
SMALLEY, I.J., KRINSLEY, D.H. & VITA-FINZI, C. Observations on the Kaiserstuhl loess	29-36
AUSTIN, R.L. & ALDRIDGE, R.J. Conodonts from horizons with <i>Goniatites crenistria</i> Phillips in North Wales and the Isle of Man	37-42
ARCHER, J.B. & SKEVINGTON, D. The morphology and systematics of ' <i>Didymograptus</i> ' <i>spinus</i> Ruedemann, 1904, and allied species from the Lower Ordovician	43-54
KAZMIN, V. & GARLAND, C.R. Evidence of Precambrian block-faulting in the western margin of the Afar depression, Ethiopia	55-57
DAS, B.K. The greenschist facies assemblages of the lower Kumaon Himalaya	59-66
CORRESPONDENCE	
Origin of the Mesozoic 'Boreal' realm: R.E.H. REID and A. HALLAM	67-70
On some highest Llandovery red beds and graptolite assemblages in Britain and Eire: R.B. RICKARDS.	70-72
Geochemical maps: NERC	72-73
A Mediterranean catastrophe: P.C. SYLVESTER-BRADLEY	73-74
Myrmekites of exsolution and replacement origins—a discussion: E.R. PHILLIPS and J.R. ASHWORTH	74-80
Ordovician stratigraphy of Abereiddy Bay, Pembrokeshire: J.R. EARP	80-81
Time scale and ice accumulation during the last 125,000 years as indicated by Greenland δ^{18} curve: W. DANSGAARD, S.J. JOHNSEN, H.B. CLAUSEN & C.C. LANGWAY	81-82
Pleistocene chronology: P. EVANS	82
REVIEWS	83-93
PUBLICATIONS RECEIVED	95-96
