

ACKNOWLEDGMENTS

Many people contributed towards making this a successful Symposium. In particular we would like to thank Professor Sir Brian Pippard for his opening remarks; Miss Shirley Fieldhouse for her untiring organisational efforts; the Scientific Organising Committee for bringing us all together; the Local Organising Committee and the Cavendish Laboratory for hosting the Symposium; Tim Pearson, Mike McEllin, Ian McHardy and Mike Scott for their editorial assistance; and finally Malcolm Longair for staging the practical matters of this Symposium.

Thanks are also due to Mrs. Sue Tuffs, Mrs. Elaine Grimmitt and the staff at CSIRO Division of Radiophysics for their efforts in translating a successful Symposium into the present volume.
