Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 21, 2018 (18 issues):
Internet/print package: £1293/\$2480 Americas only/€2072 EU only
Internet only: £936/\$1775 Americas only/€1488 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and which are not, and will not be obliged to give reasons to prospective

advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to Cambridge University Press
1 Liberty Plaza
Floor 20, New York
NY 10006
USA

Notes for Authors are available from the publisher at the given address and can be found inside the back cover.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper. Additional offprints are available for a fee and must be ordered at proof stage. **No page charges are levied by this journal.**

Copyright: As of 1 January 2001 the copyright of all articles submitted to *Public Health Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Editorial Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London, W6 7NJ, UK.

Disclaimer: The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

- Public Health Nutrition* special issue on ultra-processed foods
B Kelly, E Jacoby 1

Commentary

- The UN Decade of Nutrition, the NOVA food classification and the trouble with ultra-processing
CA Monteiro, G Cannon, J-C Moubarac, RB Levy, MLC Louzada and PC Jaime 5

Monitoring and surveillance

- Household availability of ultra-processed foods and obesity in nineteen European countries
CA Monteiro, J-C Moubarac, RB Levy, DS Canella, MLC Louzada and G Cannon 18

- Contribution of ultra-processed foods in the diet of adults from the French NutriNet-Santé study
C Julia, L Martinez, B Allès, M Touvier, S Herberg, C Méjean and E Kesse-Guyot 27

Nutrition communication

- Ultra-processed family foods in Australia: nutrition claims, health claims and marketing techniques
CE Pulker, JA Scott and CM Pollard 38

- Can nutritional information modify purchase of ultra-processed products? Results from a simulated online shopping experiment
L Machin, A Arrúa, A Giménez, MR Curutchet, J Martínez and G Ares 49

- Front-of-package nutrition references are positively associated with food processing
A Christoforou, N Dachner, R Mendelson and V Tarasuk 58

Behavioural nutrition

- Barriers to and facilitators of ultra-processed food consumption: perceptions of Brazilian adults
LB Almeida, FB Scagliusi, AC Duran and PC Jaime 68

- Sociodemographic, anthropometric and behavioural risk factors for ultra-processed food consumption in a sample of 2–9-year-olds in Brazil
LA Mais, S Warkentin, JB Vega, MdRDdO Latorre, S Carnell and JAdAC Taddei 77

- Energy contribution of NOVA food groups and sociodemographic determinants of ultra-processed food consumption in the Mexican population
JA Marrón-Ponce, TG Sánchez-Pimienta, MLC Louzada and C Batis 87

Nutritional epidemiology

- The share of ultra-processed foods determines the overall nutritional quality of diets in Brazil
MLdC Louzada, CZ Ricardo, EM Steele, RB Levy, G Cannon and CA Monteiro 94

- Quantifying associations of the dietary share of ultra-processed foods with overall diet quality in First Nations peoples in the Canadian provinces of British Columbia, Alberta, Manitoba and Ontario
M Batal, L Johnson-Down, J-C Moubarac, A Ing, K Fedjuk, T Sadik, C Tikhonov, L Chan and N Willows 103

- Ultra-processed foods, protein leverage and energy intake in the USA
EM Steele, D Raubenheimer, SJ Simpson, LG Baraldi and CA Monteiro 114

- Ultra-processed foods and added sugars in the Chilean diet (2010)
G Cediel, M Reyes, MLC Louzada, EM Steele, CA Monteiro, C Corvalán and R Uauy 125

- The provision of ultra-processed foods and their contribution to sodium availability in Australian long day care centres
SA O'Halloran, KE Lacy, J Woods, CA Grimes, KJ Campbell and CA Nowson 134

- Processed and ultra-processed foods are associated with lower-quality nutrient profiles in children from Colombia
B Cornwell, E Villamor, M Mora-Plazas, C Marin, CA Monteiro and A Baylin 142

- Consumption of ultra-processed foods and body fat during childhood and adolescence: a systematic review
CS Costa, B Del-Ponte, MCF Assunção and IS Santos 148

- A minimally processed dietary pattern is associated with lower odds of metabolic syndrome among Lebanese adults
L Nasreddine, H Tamim, L Itani, MP Nasrallah, H Isma'eel, NF Nakhoul, J Abou-Rizk and F Naja 160

- Diet quality indices in relation to metabolic syndrome in an Indigenous Cree (Eeyouch) population in northern Québec, Canada
M Lavigne-Robichaud, J-C Moubarac, S Lantagne-Lopez, L Johnson-Down, M Batal, EAL Sidi and M Lucas 172

- Effects of reducing processed culinary ingredients and ultra-processed foods in the Brazilian diet: a cardiovascular modelling study
PVL Moreira, L Hyseni, J-C Moubarac, APB Martins, LG Baraldi, S Capewell, M O'Flaherty and M Guzman-Castillo 181

Economics and environment

- Association of neighbourhood food availability with the consumption of processed and ultra-processed food products by children in a city of Brazil: a multilevel analysis
FHM Leite, EdC Cremm, DSCd Abreu, MAd Oliveira, N Budd and PA Martins 189

- Is food store type associated with the consumption of ultra-processed food and drink products in Brazil?
PP Machado, RM Claro, APB Martins, JC Costa and RB Levy 201

Public policies

- Food-based dietary guidelines: a comparative analysis between the Dietary Guidelines for the Brazilian Population 2006 and 2014
MSds Oliveira and L Silva-Amparo 210

- Applying a food processing-based classification system to a food guide: a qualitative analysis of the Brazilian experience
VF Davies, J-C Moubarac, KJ Medeiros and PC Jaime 218

- The partnership between the Brazilian School Feeding Program and family farming: a way for reducing ultra-processed foods in school meals
CRPA Teo 230

- Food advertising on Argentinean television: are ultra-processed foods in the lead?
L Allemandi, L Castronuovo, MV Tiscornia, M Ponce and V Schoj 238

- Ultra-processed foods and the limits of product reformulation
G Scrinis and CA Monteiro 247

Corrigenda

- Ultra-processed family foods in Australia: nutrition claims, health claims and marketing techniques – CORRIGENDUM
C Elizabeth Pulker, JA Scott and CM Pollard 253

- Processed and ultra-processed foods are associated with lower-quality nutrient profiles in children from Colombia – CORRIGENDUM
B Cornwell, E Villamor, M Mora-Plazas, C Marin, CA Monteiro and A Baylin 254

- Food-Based Dietary Guidelines: a comparative analysis between the Dietary Guidelines for the Brazilian Population 2006 and 2014 – CORRIGENDUM
MSds Oliveira and L Silva-Amparo 255
