## Fifth Edition

# A FIRST BOOK OF ENGLISH LAW

This book is an introduction for those embarking on the study of English law. Following a brief survey of the characteristics of English law and the principles on which justice is administered an account is given of the various systems of courts, their composition and jurisdiction, with enough history to indicate their origins. The sources of English law are dealt with relatively fully. An outline of the main branches of English private law is given and there is a chapter on the law of persons.

# MAKING FRIENDS

Often when an Inspector of the N.S.P.C.C. first calls at a home his visit is resented, but usually he eventually comes to be regarded as a friend.

Some months ago one of the Inspectors was told that a three years old boy was kept in his room all day long and was not allowed to play with his sisters. The boy's mother—who was of low intelligence—said that she did not like boys, and that she was upset because her son was a bed wetter. The father could only suggest the boy should be sent to his grandmother, to which the mother would not agree. The Inspector had a talk with her and later consulted a Health Visitor and a doctor who were interested in the boy and who gave the mother some sound advice about the bed wetting.

As a consequence, the boy is now having a much better time. The mother had at first resented the Inspector's intervention but she now looks upon him as a friend.

Cases like this—an actual case on the N.S.P.C.C. files—are dealt with frequently by the Society: for the scope of the Society's work is very much wider than cases of cruelty or gross neglect. If the Society can do anything at any time to help children whose welfare, happiness or future is in jeopardy, it will do so. This humanitarian work depends on your subscription and support. including also Agricultural and Railway Premises

By IAN FIFE, M.C., T.D., *Barrister-at-Law*, and E. ANTHONY MACHIN, B.C.L., M.A., *Barrister-at-Law*.

The extension of safety, health and welfare legislation into wide fields of non-industrial employment has necessitated the publication of this completely new book in which all current statutes and regulations governing working conditions in employment are covered. The authors have contributed a valuable General Introduction discussing the doctrines applicable to actions for breach of statutory duty, etc., and have also provided helpful annotations to the texts of the statutes.

## CRACKNELL'S ROMAN LAW

By D. G. CRACKNELL, LL.B., *Barrister-at-Law*

A comprehensive reference work which, when used in conjunction with existing textbooks, will help the student towards a better understanding of a subject which forms an important part of modern legal education.

It will be particularly useful to those studying for Bar and university examinations, and will also be valuable to anyone interested in Roman-Dutch, French or Scottish Law, all of which have Roman Law as their basis.

## STARKE'S STUDIES IN INTERNATIONAL LAW

By J. G. STARKE, Q.C., B.C.L.(Oxon.)

These eleven important studies, collected together here from divers sources, have been annotated wherever it has been necessary to update material, cite new references or introduce fresh points. Undoubtedly the most outstanding article is that dealing with the 1936 Drugs Convention and the Single Narcotics Convention concluded in New York some three years ago. It is the only study on the subject ever published.
