The Canadian Journal on Aging is a refereed, quarterly publication of the Canadian Association on Gerontology. It publishes manuscripts on aging concerned with biology, health sciences, psychology, social sciences, and social policy and practice. The Journal welcomes articles reporting original research, as well as conceptual and theoretical papers which significantly advance knowledge or understanding in gerontology. Although focused on Canadian research, manuscripts from authors outside Canada are welcome. Authors are asked to bear in mind the multidisciplinary nature of the readership when writing their manuscripts. In particular, care should be taken to draw out the implications of the analysis for readers in other fields and other disciplines.

Journal space is also available for research notes, brief reports and clinical case studies with theoretical and/or practical implications. The maximum length for these submissions is 10-12 manuscript pages including references, figures and tables. This section can be used to present important case studies, psychometric reports, Canadian norms for standardized tests, assessment of methodological approaches, findings from pilot and replication studies, and summaries of program evaluation studies. Authors of a brief report must indicate, when applicable, that a more detailed report will be provided upon request

La Revue canadienne du vieillissement est une publication trimestrielle de l'Association canadienne de gérontologie, dotée d'un comité de lecture. Elle publie des articles qui portent sur le vieillissement dans les disciplines suivantes: biologie, politique et pratique sociales, psychologie, sciences de la santé et sciences sociales. La Revue accepte les comptes rendus de recherches originales ainsi que les textes conceptuels ou théoriques qui font avancer de façon appréciable les connaissances ou la vision de la gérontologie. Bien qu'elle soit une revue canadienne, les auteurs d'autres pays sont encouragés à y soumettre leur travaux de recherche. On demande aux auteurs de tenir compte de la multidisciplinarité du lectorat. Il peut s'avérer particulièrement approprié de relier certains aspects de l'analyse à d'autres domaines de savoir.

Il est également possible de proposer à la Revue des notes de recherche, des rapports sommaires, ainsi que des études de cas cliniques, accompagnées de leurs retombées théoriques et/ou pratiques. Les articles ne doivent pas dépasser 10 à 12 pages manuscrites, références, illustrations et tableaux compris. Cette rubrique peut servir à présenter divers documents: importantes études de cas, rapports psychométriques, normes canadiennes régissant les tests standardisés, évaluation d'approches méthodologiques, résultats d'études pilotes et répétées, et résumés d'études d'évaluation de programme. Les auteurs de rapports sommaires doivent indiquer, le cas échéant, qu'ils sont prêts à fournir un rapport plus détaillé sur demande.
