

Discovering Chinese Nationalism in China

Modernization, Identity, and International Relations

Yongnian Zheng

Explores the complicated nature of China's new nationalism and presents the reader with a very different picture to that portrayed in Western readings of Chinese nationalism. Zheng shows that the present Chinese leadership is pursuing strategies not to isolate China, but to integrate it into the international community.

American Images of China, 1931–1949

T. Christopher Jespersen

In the 1930s and 1940s, the prevalent American view of China was as a friendly, democratic, and increasingly Christian state, in many ways akin to the United States. This book shows how seeing the Chinese as aspiring Americans helped shape American opinion and policies toward Asia for almost twenty years.

Dragon in a Three-Piece Suit

The Emergence of Capitalism in China

Doug Guthrie

"Guthrie brings new insights and fresh perspectives to the study of organizational change in China during the process of economic reform. The book is exceptionally well written..."

—Barry Naughton

Dragon in a Three-Piece Suit is an innovative examination of what is perhaps the main engine of economic reform in China, the large industrial firm. Doug Guthrie, who spent more than a year in Shanghai studying firms, interviewing managers, and gathering data on firms' performance and practices, provides the first detailed account of how these firms have been radically transformed since the mid-1980s.

With its combination of rigorous argument and uniquely rich detail, this book gives us the most complete picture yet of Chinese economic reform.
