

**JOURNAL OF
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge
Silver Street, Cambridge, CB3 9EW, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy,
University of Manchester, Manchester M13 9PL, England*

PROF. W. B. THOMPSON

*Department of Physics,
University of California, La Jolla, California 92093, U.S.A.*

Authors wishing to have papers published in the **JOURNAL** should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the **JOURNAL** free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the Cambridge or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 110, Cambridge CB2 3RL and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 19 and 20 (1978) are £36.00 net per volume (US \$80.00 in the U.S.A. and Canada) for institutions; £18.00 (US \$40.00) per volume for individuals. Single parts cost £15.00 net (US \$33.50 in the U.S.A. and Canada) plus postage.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

CONTENTS OF VOLUME 20

PART 1 AUGUST 1978

| | |
|--|---------------|
| Dynamic feedback for multi-mode plasma instabilities. A. K. SEN | <i>page 1</i> |
| The collisionless flow of unmagnetized plasmas around bodies. B. KÖNEMANN | 17 |
| Merging of magnetic fields with field-aligned plasma flow components. H. G. MITCHELL and J. R. KAN | 31 |
| Electrostatic heat flux instabilities. S. P. GARY | 47 |
| Numerical parameter study of stability against resistive axisymmetric modes for doublets. T. H. JENSEN and F. W. McCLAIN | 61 |
| On the theory of Buneman's instability in hot ion plasma. I. A. EL-NAGGAR, SH. M. KHALIL and V. L. SIZONENKO | 75 |
| A strictly Markovian expansion for plasma turbulence theory. F. C. JONES | 87 |
| Resonant wave-particle interaction at the half-integer cyclotron harmonics. J. P. M. SCHMITT and Y. LAPIERRE | 95 |
| Ionization waves in plasma columns detected by microwaves. G. CICCONI, C. ROSATELLI and V. MOLINARI | 107 |
| Damping of nonlinear magneto-acoustic waves. G. L. KALRA and V. B. BHATIA | 125 |
| Excitation of Alfvén waves by fast particles in a finite pressure plasma of adiabatic traps. B. I. MEERSON, A. B. MIKHAILOVSKII and O. A. POKHOTELOV | 137 |

PART 2 OCTOBER 1978

| | |
|---|-----|
| Effect of finite ion Larmor radius on the Kelvin-Helmholtz instability. H. NAGANO | 149 |
| Confinement times in quasi-trapping orbits. D. C. SCHEETZ and R. W. FLYNN | 161 |
| Linearized expressions for perturbed quantities for propagation at arbitrary angle to the static magnetic field in plasmas with non-uniform density and thermal anisotropy. R. KOCH | 171 |
| Solitary surface waves. M. Y. YU and I. ZHELYAZKOV | 183 |
| Nonlinear propagation of lower-hybrid waves in an inhomogeneous plasma. M. Y. YU, P. K. SHUKLA and K. H. SPATSCHEK | 189 |

| | |
|---|-----------------|
| Derivation of the quasi-linear equation in a magnetic field. H. L. BERK | <i>page</i> 205 |
| Optimization of plasma quiescence. R. JONES | 221 |
| Stability of the solar wind against the whistler mode. P. REVATHY | 225 |
| Anomalous transport coefficients in a turbulent plasma. R. BALESCU and I. PAIVA-VERETENNICOFF | 231 |
| A model for precursor structure in supercritical perpendicular, collisionless shock waves. D. SHERWELL and R. A. CAIRNS | 265 |
| Small amplitude waves in a hot relativistic two-fluid plasma. S. HYUN and C. F. KENNEL | 281 |
| Nonlinear interaction of a magnetized overdense plasma with relativistically strong electromagnetic waves. L. Y. SHIH | 289 |
| Ray-tracing in the electron-cyclotron frequency region. F. DE LUCA and C. MAROLI | 299 |

PART 3 DECEMBER 1978

| | |
|---|-----|
| On the stability of self-consistent large amplitude waves in a cold plasma. Part 1. Transverse circularly polarized waves in the absence of a large scale magnetic field. M. A. LEE and I. LERCHE | 313 |
| Clebsch representations in the theory of minimum energy equilibrium solutions in magnetohydrodynamics. H. RUND, D. R. WELLS and L. C. HAWKINS | 329 |
| On the periodicity of ion-acoustic waves in an inhomogeneous plasma. M. D. GUNZBURGER | 345 |
| Anomalous ion beam scattering by shear Kelvin-Helmholtz wave interactions. J. P. HAUCK and G. BENFORD | 351 |
| Beat Hamiltonians and generalized pondermotive forces in hot magnetized plasma. S. JOHNSTON, A. N. KAUFMAN and G. L. JOHNSTON | 365 |
| Numerical simulation of plasma double layers. G. JOYCE and R. F. HUBBARD | 391 |
| Thermal flux reduction by electromagnetic instabilities. T. OKADA, T. YABE and K. NIU | 405 |
| Structure of shock waves in partially ionized argon. V. SHANMUGASUNDARAM and S. S. R. MURTY | 419 |
| On energy of non-resonantly growing plasma waves. A. HIROSE | 453 |
| Nonlinear saturation of trapped electron instability. A. K. SEN | 459 |

| | |
|---|-----------------|
| Multiple water-bag model and nonlinear plasma oscillations: appearance of a new pole. M. GROS, P. BERTRAND and G. BAUMANN | <i>page</i> 465 |
| Stability of relativistic transverse cold plasma waves. Part 1. Circularly polarized waves. F. J. ROMEIRAS | 479 |
| Stability criterion for symmetric MHD equilibria by minimizing the potential energy. J. W. EDENSTRASSER | 503 |
| INDEX TO VOLUME 20 | 521 |
