

The Venetian Money Market

Banks, Panics, and the Public Debt, 1200-1500

REINHOLD C. MUELLER

“The book will stand as the unavoidable model for the scholars who eventually do the history of banking and the public debt in other major commercial capitals.”—Richard Goldthwaite, The Johns Hopkins University

\$65.00 hardcover

Safety First

Technology, Labor, and Business in the Building of American Work Safety, 1870-1939

MARK ALDRICH

“In the first extensive history of the Safety First movement, Mark Aldrich offers a unique and balanced view of changes in workplace safety. Applying his economist’s eye and training, Aldrich describes these developments as a combined function of economic and employment changes, union and political pressure, corporate decision making, and the intervention of new professionals.”—Walter Licht, University of Pennsylvania

Studies in American Political Development

**CAMBRIDGE
UNIVERSITY PRESS**

Editors

Karen Orren, University of California, Los Angeles
Stephen Skowronek, Yale University

Studies in American Political Development publishes high quality scholarship covering American political change and institutional development from a historical perspective. Articles focus on government institutions and their social, economic and cultural environment. The journal features in-depth original articles, which allow scholars to elaborate on the complex patterns of state-society relations. These longer articles also encourage an interdisciplinary approach—tying in relevant issues and related themes. In addition, *SAPD* recognizes the importance of comparative politics to the study of American institutions.

MACROECONOMIC DYNAMICS

Editor

WILLIAM A. BARNETT, Washington University, St. Louis

This inaugural special edition includes such important contributors as:

He Huang, Selahattin Imrohoroğlu, Thomas J. Sargent, Kenneth L. Judd, Jess Gaspar, John Heaton, Deborah Lucas, Andrew W. Lo, A. Craig MacKinlay, A. Ronald Gallant, George Tauchen, Jennifer Huang, Jiang Wang, Wilbur John Coleman II, Harold H. Zhang, Michael A. Trick, Stanley E. Zin, Lars Peter Hansen, Timothy G. Conley, Wen-Fang Liu, John H. Cochrane, Yacine Ait-Sahalia, Jesus Saa-Roquejo, Lawrence J. Christiano, Jonas D.M. Fisher, Ravi Bansal, Bruce Lehmann, Wouter den Haan, Anthony Smith, Per Krusell, Pamela Labadie, Kent Daniel, David Marshall, William Barnett, Yi Liu, Haiyang Xu, Mark Jensen, and Clifford R. Wymer.

Macroeconomic Dynamics will publish theoretical, empirical or quantitative research of the highest standard. Papers are welcomed from all areas of macroeconomics and from all parts of the world. Major advances in macroeconomics without immediate policy applications will also be accepted, if they show potential for application in the future. Occasional book reviews, announcements, conference proceedings and interviews will also be published. An electronic version of the journal will be published simultaneously with the paper version enabling immediate access to the best current research in macroeconomics.

Quarterly, ISSN 1365-1005
Subscription to Volume 1, 1997:
Institutions \$149.00;
Individuals \$75.00.

The Great Famine

Northern Europe in the Early
Fourteenth Century

William Chester Jordan

The horrors of the Great Famine (1315–1322), one of the severest catastrophes ever to strike northern Europe, lived on for centuries in the minds of Europeans. Until now, though, no one has offered a perspective of what daily life was actually like, nor has anyone probed far into the Famine's causes. Here the distinguished historian William Jordan provides the first comprehensive history of the Great Famine. In this revealing portrait of medieval life, we see the complex interplay of social and environmental factors that caused this disaster and allowed it to continue for so long.

"In this extraordinary book, William Jordan has crafted the most comprehensive study of the Great Famine. . . . There is no book. . . . that provides as exhaustive a discussion of the Great Famine as does Jordan's work. It is a *tour de force*."—Teofilo Ruiz

City of Capital

Politics and Markets in the English
Financial Revolution

Bruce G. Carruthers

While many have examined how economic interests motivate political action, Bruce Carruthers explores the reverse relationship by focusing on how political interests shape a market. He sets his inquiry within the context of late Stuart England, when an active stock market emerged and when Whig and Tory parties vied for control of a newly empowered Parliament.

Probing connections between politics and markets at both institutional and individual levels, Carruthers ultimately argues that competitive markets are not inherently apolitical spheres guided by economic interest but rather ongoing creations of social actors pursuing multiple goals.

BRUCE G. CARRUTHERS

Globalizing Capital

A History of the International Monetary System

Barry Eichengreen

It has become increasingly apparent that one cannot understand the international economy today without knowing how its monetary system operates. Barry Eichengreen has written a brief, lucid book that tells the story of the international financial system over the past 150 years.

Globalizing Capital is intended not only for economists but also for a general audience of historians, political scientists, and anyone with a broad interest in international economic and political relations.

Cloth \$24.95 ISBN 0-691-02880-X

J.-B. Say

An Economist in Troubled Times

Selected and translated by R. R. Palmer

J.-B. Say is remembered most commonly as a disciple of Adam Smith and in particular as the author of what later economists have called Say's Law: often simplified as the idea that "supply creates its own demand." Here the distinguished historian R. R. Palmer shows that Say was an interesting figure for a multitude of reasons.

Say modified and extended some of Adam Smith's insights, became a friend and correspondent of Thomas Malthus and David Ricardo, and was the first professor of political economy in France. Palmer's outstanding skills as a translator serve well to present a collection of fascinating and hitherto untranslated material.

Cloth \$39.50 ISBN 0-691-01170-2

New in paperback

Twentieth Anniversary Edition

With a foreword by Amartya Sen

and a new preface by the author

The Passions and the Interests

Political Arguments for Capitalism before Its Triumph

Albert O. Hirschman

In this seminal book, Albert Hirschman reconstructs the intellectual climate of the seventeenth and eighteenth centuries to illuminate the intricate ideological transformation that occurred, wherein the pursuit of material interests—so long condemned as the deadly sin of avarice—was assigned the role of containing the unruly and destructive passions of man.

Paper \$12.95 ISBN 0-691-01598-8

A History of Corporate Finance

Jonathan Baskin and Paul J. Miranti, Jr.

"Business corporations, once rare, have become the dominant organization of the modern economy. The corporation as we know it owes its existence to a long history of financial innovations—in institutions, markets, and instruments (securities). This is the first in-depth history to tell us how it all happened, from the merchants and bankers of medieval and Renaissance Italy to today's corporate managers and wizards of Wall Street. Students of business, economics, finance, law, and history will learn much from it."

— Richard Sylla, New York University

The Best in Economics

Democratic Socialism and Economic Policy

The Attlee Years 1945-1951

Jim Tomlinson

This book examines the economic policies of the Attlee Government, integrating the politics of economic policy-making with economic arguments. It stresses the importance of the government's drive for efficiency, and strongly questions the claim that in building a 'welfare state' the government neglected production.

Cambridge Studies in Modern Economic History 3
55095-5 Hardback \$64.95

Goldbugs and Greenbacks

The Antimonopoly Tradition and the Politics of Finance in America, 1865-1896

Gretchen Ritter

Behind the late nineteenth century debate over what sort of financial system America should have, there was a broader dialogue about sectionalism, class relations, and the future course of the American economy and democracy. Professor Ritter contends that there was a distinctive and neglected political tradition in the United States—the antimonopoly tradition—which was championed by nearly every major agricultural and labor group during the period from the Civil War until 1900.

This study documents the growth of the silk industry and the effects of western industrialization, technical progress and changing methods of production.

Cambridge Studies in Modern Economic History 5
58198-2 Hardback \$59.95

Competition and Monopoly in the Federal Reserve System, 1914-1951

A Microeconomic Approach to Monetary History

Mark Toma

Many economists view competition among central banks as leading to an over-issue of money. This book claims that competition among Federal Reserve banks in the 1920s did not result in an over-issue problem. The US Congress imposed a more monopolistic structure on the Fed in the mid-1930s so that it could accommodate an increase in the revenue needs of the Treasury.
