

ADDENDUM

Table of Contents - ADDENDUM

doi: 10.1017/S1743921316006293, Published by Cambridge University Press, 27 October 2016.

In the *Astronomy in Focus* series, volume XXIXB, a number of contributions from Focus Meeting 4 and Focus Meeting 17 were omitted. The editor apologizes for this error. The missing contributions are now published, in full, online only and are listed here in the correct running order.

FM 4: Planetary nebulae as probes of galactic structure and evolution

Challenges of AGB modelling with dust	e3
<i>P. Ventura, F. Dell’Aglì, M. Di Criscienzo, D. A. García-Hernández, L. Stanghellini & R. Schneider</i>	
Powering and Shaping Planetary Nebulae: The Physics of Common Envelopes. . .	e4
<i>J. Nordhaus & D. S. Spiegel</i>	
Dust and molecules in extra-galactic planetary nebulae.	e5
<i>D. A. García-Hernández</i>	
The Large Magellanic Cloud PN population	e6
<i>W. A. Reid</i>	
Untangling the History of M31 with Planetary Nebulae.	e7
<i>B. Balick</i>	
Planetary nebula abundances in dwarf galaxies	e8
<i>D. R. Gonçalves</i>	
Chemical abundances from planetary nebulae in local spiral galaxies.	e9
<i>M. G. Richer & M. L. McCall</i>	
Models of stellar population at high redshift, as constrained by PN yields and luminosity function.	e10
<i>C. Maraston</i>	
The Planetary Nebula Luminosity Function and its Issues	e11
<i>R. Ciardullo</i>	
Planetary nebulae as kinematic tracers of galaxy halos	e12
<i>L. Coccato & PNS collaboration</i>	
Extended halos and intracluster light using Planetary Nebulae as tracers in nearby clusters	e13
<i>M. Arnaboldi</i>	

FM 17: Advances in Stellar Physics from Asteroseismology

RR Lyrae stars: New discoveries in the OGLE data	e14
<i>R. Smolec, H. Netzel & I. Soszyński</i>	
Nonlinear convective pulsation models of type II Cepheids	e15
<i>R. Smolec</i>
