

## CLOSING REMARKS BY THE RECTOR OF UNIVERSITAS UDAYANA, DENPASAR

Yang terhormat Bapak Gubernur Kepala Daerah Propinsi,  
Bapak Muspida Tingkat I Bali,  
Bapak Ketua DPRD Tingkat I Bali,  
Distinguished Participants,

On behalf of the Director General for Higher Education of the Ministry of Education and Culture of the Republic Indonesia, I would like to convey my appreciation and thanks to all of you, the participants from overseas as well as from Indonesia, who have been working hard to share ideas and experiences during the course of the discussion on major issues and problems rising up as a consequence of the multi-dimensional view of the topic of the symposium with special emphasis on current aspects of problems of Wolf-Rayet Stars' origin and evolution.

As we understand, this symposium could have been carried out successfully, thanks to the efforts of the Local Organizing Committee, which has laid out the symposium design neatly and has enabled the execution of the symposium very smoothly in cooperation with the Directorate General of Higher Education of the Ministry of Education and Culture, the Indonesian National Committee for UNESCO, and the Ministry of Tourism, Post and Telecommunication of the Republic Indonesia, sponsored by the International Astronomical Union.

We are proud to see that the symposium has been successfully carried out.

I notice that this symposium has been organized with good understanding and has been intellectually deliberated.

Let the outcome of the symposium be a strengthening means for the conduct of cooperation through joint endeavour of scientists from all over the world.

Last but not least may the cultural atmosphere of Bali contribute to the success of the symposium.

We do hope that all of you will extend your stay in Bali to know more about Bali with her thousand smiles, thousand temples, and the intermingled life and culture of Bali.

Finally, may I declare the symposium of International Astronomical Union No. 143 on Wolf-Rayet Stars and the Interrelations with other Massive Stars in Galaxies, on behalf of the Director General for Higher Education of the Ministry of Education and Culture of the Republic Indonesia, officially closed.

Thank you.

*Prof. Dr. I.G.N.P. Adnyana*
