Hong Kong Academy of Medicine First International Congress

Challenges to Specialists in the 21st Century

DATE : 26 - 29 November 1998

VENUE : Hong Kong Academy of Medicine Building
Wong Chuk Hang, Hong Kong

The Hong Kong Academy of Medicine cordially invites you to attend its First International Congress to celebrate the inauguration of the new Academy building. Internationally renowned speakers have been invited to speak on the main theme. The scientific program will feature 6 plenary lectures and 21 multidisciplinary symposia on the following topics:

Plenary Lectures

- **Challenges to the Specialist Beyond 2000**
Dr. David Fang, President
Hong Kong Academy of Medicine
- **Evidence Based Medicine**
Prof. Tony Dixon
The University of Hong Kong
- **Survival of the Generalist in a Specialist World**
Prof. Sir Leslie A. Turnberg, President
Academy of Royal Colleges UK
- **The Quest for Transplantation Tolerance**
Prof. Clyde F. Barker
University of Pennsylvania Medical Center
- **The Training of Our Specialists into the Next Millennium**
Prof. Alex Cohen
University of Western Australia
- **Pain Free State: Is It Possible?**
Prof. Michael Stanton-Hicks
University of Colorado

Symposia

- Medical Ethics
- Congenital Anomalies
- Nasopharyngeal Carcinoma
- Transplantation
- Gene Therapy
- Substance Abuse
- Managed Care
- Medical Education and Training
- Trauma
- Hepatocellular Carcinoma
- Applications of Laser
- Maintaining Standards of Specialists
- Infectious Disease
- Pain Management
- Sleep and Psychiatric Disorders
- Osteoporosis
- Minimally Invasive Procedures
- Breast Cancer
- Thalassaemia
- Diabetes Mellitus
- Traditional Chinese Medicine

Registration Fee

	Before 1 August 98	On or after 1 August 98
Overseas Delegate	US\$300	US\$350
Accompanying Person	US\$100	US\$100

INSTRUCTIONS FOR AUTHORS

1. Original Articles which have not been published elsewhere are invited and should be sent to the Editors. Articles should not normally exceed 7,500 words. Audit articles must demonstrate that the 'audit cycle' has been completed. Articles concerning medico-legal matters are also welcome. Longer articles or theses will be considered for publication as *Supplements* but, in such instances, the costs of publication must be met by the authors or their employing authorities.

2. Review Articles, preferably not exceeding 3,000 words, will be considered but the authors are expected to be recognized authorities on the subject.

3. Historical articles of well known characters or events should provide some new information or interpretation: those from within a Hospital's own department highlighting a hitherto less well known contribution are also welcome.

4. Short reports where radiology, pathology or medical oncology have been critical in diagnosis or management will be published on a monthly or bimonthly basis under the headings Radiology, Pathology or Oncology in Focus. Such articles should not normally be longer than 4 pages of A4 text (excluding title page and references) and must emphasise a problem of particular clinical interest. The pathologist, radiologist or oncologist who has been involved will normally be expected to be a co-author and will be expected to sign the covering letter submitted with the paper.

5. Clinical Records (Case Reports) should be brief (as with short reports, no more than 4 pages of A4 text) and should be confined to single cases without precedent in the world literature or to cases which illustrate some entirely new facet in management or investigation. Reports of relative rarities are only welcome when they add to our understanding of a clinical issue.

6. All manuscripts are considered on the understanding that they have been submitted solely to this Journal and that, if accepted, subsequent reproduction in whole or in part will not be permitted without the explicit written consent of the principal Author and Editors. In all cases where such permission is granted the customary acknowledgements must be made.

7. All papers must be accompanied by a covering letter. This should contain a declaration, to be signed by each author, to confirm that they have read and approved the contribution bearing their name. Authors should also individually indicate the part they have played in data collection, analysis or authorship. The principal investigator (who should normally be the first author) should also indicate that he or she is prepared to take total responsibility for the integrity of the content of the manuscript.

In the same letter the authors must list any potential or actual conflicts of interest: where none have occurred this should be clearly stated. Conflicts of interest include affiliations with, or financial involvement in, organizations or entities described in the manuscript and include grant monies, honoraria, fees or gifts related to the work as well as indirect financial support where equipment or drugs have been supplied.

8. Manuscripts must be typewritten in duplicate on one side of the paper only (A4 297 × 210 mm). Double spacing with wide margins (5 cm for the header and 2.5 cm for the remainder) should be used throughout. The pages should be sequentially numbered.

Begin each section on a new page in the following sequence: title page, abstract, text, acknowledgements, references, tables and legends. The following details should apply to each of these sections:

(a) **Title Page**—This should contain a succinct title for the paper and the names of the authors together with their principal higher degree(s). Below this should be the details of the departments in which the authors work and the name of their affiliated institution(s). An address for correspondence and the name of the author who is to receive this should be typed at the foot of the title page: this will ultimately appear beneath the list of references.

If the paper was presented at a meeting, the details must be given and will be inserted at the foot of the first page of printed text.

(b) **Abstract and Key Words**—The abstract should be no longer than 150 words and should include a statement of the problem, the method of study, the results obtained and the conclusions drawn. A separate 'summary' section in the main manuscript is not permitted.

Following the abstract should be those key words which can be used to index the article. Only the words appearing as Medical Subject Headings (MeSH) in the supplement to *Index Medicus* may ordinarily be used: in exceptional circumstances, and where no appropriate word(s) are listed, those dictated by common usage should be supplied.

No paper will be accepted without an abstract and appropriate key words.

(c) **Text**—The text should normally follow the common outlines, i.e., introduction, materials and methods, results and analysis, discussion, conclusion(s). The latter sections should clearly indicate how this work fits with the current body of world literature.

(d) **Illustrations**—Tables and charts should be adjuncts to the text and must not repeat material already presented. They should be numbered consecutively, with Roman numerals, and must be marked with a clear legend.

Photographic illustrations should be unmounted, should not exceed 80 mm in width and should be high quality black and white prints: reproduction of coloured prints will normally be charged to the authors. Two sets of photographic illustrations, one with each copy of the manuscript, should be supplied and each should be clearly identified on the back with the figure number and the first author's name. Where any ambiguity might result the top edge should be identified with an arrow to aid orientation. Colour illustrations from papers are occasionally selected by the editor for use on the front cover of the journal at no cost to the authors. If appropriate a colour version of one of the black and white photographs submitted can be included for this purpose.

Photomicrographs of histopathological specimens must be accompanied by details of the staining method and the magnification used.

Photographs which could result in the person illustrated being identified must be accompanied by a signed release giving specific consent to publication. For minors signed parental permission is required.

Written permission from the publisher to reproduce any illustration with copyright elsewhere must be obtained and, where necessary, the consent of the senior author must also be acquired.

(e) **Measurements**—These must be in metric units with Systeme Internationale (SI) equivalents given in parentheses.

(f) **References**—The Harvard system should be used. Other systems are not permissible.

In the list of references all authors should be included and references should be in alphabetical order (by name of first author). The following format should be used:

For papers the names of the authors, the year of publication, the title and the journal name in full should be given followed by the volume and page numbers, e.g., Green, C., Brown, D. (1951) The tonsil problem. *Journal of Laryngology and Otology* 65: 33–38.

For single author books the title used should be Green, C. (1951) The tonsil problem. 2nd Edition. vol. 1, Headley Brothers Ltd., Ashford, Kent, pp 33–38.

For papers in multi author books with one or more editors the reference should include the title of the chapter and the names of the editors together with the number of the edition as in: Brown, D. (1951) Examination of the Ear. In *Diseases of the Ear Nose and Throat*. 2nd Edition. (White, A., Black B., eds.) Headley Brothers Ltd., Ashford, Kent, pp 33–38.

Within the body of the text references should be in parentheses and should cite the author(s) and the year of publication. A paper written by three or more authors should be abbreviated e.g., Green *et al.*, 1951.

The authors should personally verify the accuracy of every reference before submitting a paper for publication.

(g) **Drugs**—The proper names of drugs should be used. One reference to a proprietary name may be given if this is felt to be important to the study.

9. **Submission of manuscripts**—Manuscripts should be sent to the Editors, The Journal of Laryngology and Otology, 2 West Road, Guildford, Surrey GU1 2AU (Fax: +44(0)1483-451874). All authors should send a facsimile number where possible to speed communication. Material submitted on floppy disk or sent by e-mail is not acceptable.

Page proofs sent to authors should be corrected and returned within 5 working days. No extra material should be added to the manuscript at this stage. Orders for reprints must be made on the form provided at the time of returning the proofs.

10. **Rejection of manuscripts**—All manuscripts that are rejected will no longer be returned to the authors and those submitting papers should, therefore, ensure that they retain at least one copy. The exception will be manuscripts containing coloured illustrations where the illustrations only will normally be returned automatically by Surface Mail.

11. **Subscriptions, advertising and business communications**—Information concerning these matters can be obtained from The Editors, c/o The Journal of Laryngology and Otology, Headley Brothers, The Invicta Press, Ashford, Kent TN24 8HH.

ABSTRACTS SEARCH ENGINE INSTRUCTIONS TO AUTHORS WHAT'S

The Trustees of the Graham Fraser Foundation invite Applications for the following Memorial Fellowship:

The Trustees of the Graham Fraser Foundation invite applications for a travelling Fellowship in Otolaryngology to research the field of profound deafness. The successful applicant will work with Professor William Gibson in the **University of Sydney, Australia**, for six months commencing 18th January 1999. In addition to research, there will be opportunities for developing operative techniques in otology and cochlear implantation.

Applicants should submit a 500 word abstract indicating their interest in the subject of profound deafness, together with their curriculum vitae and the names of two referees to:

The Graham Fraser Foundation
Tinnitus and Hyperacusis Centre
32 Devonshire Place
London W1N 1PE
Fax: 0171 486 2218
email: jon.hazell@ucl.ac.uk

**Closing date for applications:
16th October. Interview date: 26th October 1998.**

The Tenth British Academic Conference in Otolaryngology 4th – 9th July 1999

The cultural and scholarly city of Cambridge provides the location for this meeting which is considered the academic highlight of the year in the UK. Held every four years, it contains key-note lectures, plenary sessions, mini-symposia, free papers, instructional sessions and dissection demonstrations.

Confirmed speakers include:

PROFESSOR A G D MARAN
Dr. ROBIN COTTON
PROFESSOR H STAMMBERGER
PROFESSOR P VAN DEN BROEK

Accommodation includes local 5-star hotels and rooms within some of the colleges. A host of social events are available and a full partners programme has been arranged.

The Journal of Laryngology and Otology

Edited by Neil Weir and Guy Kenyon

A leading international journal, published monthly and containing original scientific articles and clinical records in all fields of Otolaryngology, Rhinology and Laryngology. Including occasional supplements. Founded in 1886.

Annual subscription for 1998 (calendar year): £120.00 Institution, £90.00 Individual, Students rate £45.00.

ISSN 0022 2151

Supplements still available separately.

The ENT Surgeon looks at the Orbit

by D. F. N. Harrison

This supplement records in some detail Professor Harrison's 'personal experience over a period of 20 years dealing with a wide variety of clinical conditions in which entry into the orbit was a desirable or essential part of treatment'.

Pp 42 Printed 1980

Retail £10.00 (US\$20.00)

20 Years Experience with Homografts in Ear Surgery

by Christian Betow

The author, a professor of Otolaryngology in West Berlin, gives a full account of his pioneering development of homograft materials in reconstructive surgery of the middle ear.

Pp 28 Printed 1982

Retail £10.00 (US\$20.00)

Experimental and Clinical Studies in Otitis Media with Effusion

by Jamsheed A. Khan

An experimental and clinical study on the effects of Carbocisteine on fluid in the middle ear.

Pp 28 Printed 1983

Retail £10.00 (US\$20.00)

Proceedings of the Sixth British Academic Conference in Otolaryngology

Edited by John Ballantyne and John Booth

Pp 134 Printed 1983

Retail £10.00 (US\$20.00)

Second International Tinnitus Seminar

Chairman: Abraham Shulman

A comprehensive study of the problems and treatment of tinnitus.

Forensic Audiology

by Chuang Wei Ping

A clear concise and practical guide to industrial hearing damage by a barrister/physician. This is an unusual and highly specialised aide memoire for the personal injuries practitioner, well illustrated with recent case law. A commendable enterprise by the author.

Pp 57 Printed 1986

Retail £10.00 (US\$20.00)

The Acute Orbit

Preseptal (Periorbital) cellulitis subperiosteal abscess and orbital cellulitis due to sinusitis.

by J. R. Moloney, N. J. Badham and A. McRae

Pp 18 Printed 1987

Retail £10.00 (US\$20.00)

Nasal Mast Cells: A Preliminary Report on their Ultrastructure

by A. B. Drake-Lee, F.R.C.S.

The ultrastructural morphology of mast cells in the nose and the adenoids are compared. Normal cells have a very varied morphology with electron dense granules which have scrolls occasionally. Cells from patients with perennial allergic rhinitis show variable degranulation in all areas examined. Few cells were seen in the surface epithelium. Cells from the adenoids had different degrees of degranulation which suggests that mast cell reactions are not a constant feature.

Pp 17 Printed 1987

The VOROSCOPE illumination system

● THE Voroscope illumination system, part of the Voroscope Coaxial magnification product, is now available in a clip-on version which can be slipped on to the frame of most styles of surgical loupes, such as Keeler, Orascope and Design for Vision. It provides 12,000 lux intensity illumination to converge with the focal point of the optical units. The illumination lasts more than two hours and the battery can be recharged in just over an hour. The unit can be easily inverted from the upright convergent to a coaxial position and can be used with regular operating spectacles or safety glasses.
