CONTENTS

PAGE

Abian, S. (*Joint author*). Some properties of skew-symmetric elements of a ring . . 549

Adams, J. F. An example in homotopy theory. (*Research note*) 922

Afriat, S. N. Orthogonal and oblique projectors and the characteristics of pairs of vector spaces 800

Altmann, S. L. On the symmetries of spherical harmonics 343

Barnes, E. S. On a theorem of Voronoi. (*Research note*) 537

Barnett, I. A. and **Abian, S.** Some properties of skew-symmetric elements of a ring . 549

Bassali, W. A. Transverse bending of infinite and semi-infinite thin elastic plates. I . 248

Bassali, W. A. Thin circular plates supported at several points along the boundary . 525

Bassali, W. A. The transverse flexure of thin elastic plates supported at several points 728

Bassali, W. A. The transverse flexure of thin perforated elastic plates supported at several points 744

Bassali, W. A. and Dawoud, R. H. Green's functions for thin isotropic plates containing holes 755

Bastin, E. W. and Kilmister, C. W. The concept of order. III. General relativity as a technique for extrapolating over great distances 462

Baumslag, Gilbert. A theorem on infinite groups 545

Bellman, Richard. On a generalization of the fundamental identity of Wald. (*Research note*) 257

Besicovitch, A. S. Analysis of tangential properties of curves of infinite length . . 69

Besicovitch, A. S. On families of domains 73

Bhattacharya, P. B. The Hilbert function of two ideals 568

Birch, B. J. Another transference theorem in the geometry of numbers . . . 269

Birch, B. J. A grid with no split parallelepiped. (*Research note*) 536

Blackburn, N. On prime-power groups in which the derived group has two generators 19

Blackburn, W. S. Second order effects in the flexure of isotropic incompressible elastic cylinders 907

Borwein, D. On a scale of Abel-type summability methods 318

Bolton, H. C. and **Scoins, H. I.** Eigenvalue problems treated by finite-difference methods. II. Two-dimensional Schrödinger equations 150

Broadbent, S. R. and **Hammersley, J. M.** Percolation processes. I. Crystals and mazes 629

Brush, S. G. A simplified method for integrating over Feynman histories . . . 651

Buckingham, A. D. and **Pople, J. A.** The polarization of a hydrogen atom in combined electric and magnetic fields. (*Research note*) 262

Budden, K. G. and **Clemmow, P. C.** Coupled forms of the differential equations governing radio propagation in the ionosphere. II 669

Burkill, J. C. An integral for distributions 821

Cade, R. The charge density near a sharp point on a conductor 870

Carlitz, L. Some arithmetic properties of the Legendre polynomials 265

Chester, C., Friedman, B. and **Ursell, F.** An extension of the method of steepest descents 599

Clemmow, P. C. (*Joint author*). Coupled forms of the differential equations governing radio propagation in the ionosphere. II 669

https://doi.org/10.1017/S0305004100032874 Published online by Cambridge University Press

Clemmow, P. C. and **Willson, A. J.** A relativistic form of Boltzmann's transport equation in the absence of collisions 222

Clenshaw, C. W. The numerical solution of linear differential equations in Chebyshev series 134

Cochran, W. A suggested experiment on the clock paradox 646

Coles, W. J. On a theorem of van der Corput on uniform distribution 781

Collingwood, E. F. and **Lohwater, A. J.** Applications of the theory of cluster sets to a class of meromorphic functions 93

Davenport, H. Note on a theorem of Cassels. (*Research note*) 539

Davies, H. Summation over Feynman histories: the free particle and the harmonic oscillator 199

Dawoud, R. H. (*Joint author*). Green's function for thin isotropic plates containing holes 755

Dvoretzky, A., Erdős, P., Kakutani, S. and **Taylor, S. J.** Triple points of Brownian paths in 3-space 856

Ehrman, Joachim B. On the unitary irreducible representations of the universal covering group of the $3+2$ deSitter group 290

Elcock, E. W. The cooperative behaviour of a two-dimensional defect crystal . . 863

Erdős, P. (*Joint author*). Triple points of Brownian paths in 3-space 856

Fisher, Michael E. On the continuous solution of integral equations by an electronic analogue. I 162

Fox, Charles. Some applications of Mellin transforms to the theory of bivariate statistical distributions 620

Franklin, Joel and **Friedman, Bernard.** A convergent asymptotic representation for integrals 612

Friedman, B. (*Joint author*). An extension of the method of steepest descents . . 599

Friedman, Bernard. (*Joint author*). A convergent asymptotic representation for integrals 612

Froese, Charlotte. The self-consistent field with exchange for some 10 and 12 electron systems 206

Froese, Charlotte and **Hartree, D. R.** Wave functions for the normal states of Ne^{+3} and Ne^{+4} 663

Fuller, A. T. Stability criteria for linear systems and realizability criteria for RC networks 878

Garstang, R. H. The computation of quadrupole line strengths 214

Godwin, H. J. On totally complex quartic fields with small discriminants . . . 1

Grünbaum, B. A simplified proof of Borsuk's conjecture in three dimensions. (*Research note*) 776

Hammersley, J. M. (*Joint author*). Percolation processes. I. Crystals and mazes . 629

Hammersley, J. M. Percolation processes. II. The connective constant . . . 642

Hartree, D. R. (*Joint author*). Wave functions for the normal states of Ne^{+3} and Ne^{+4} 663

Heading, J. The Stokes phenomenon and certain nth-order differential equations. I. Preliminary investigation of the equations 399

Heading, J. The Stokes phenomenon and certain nth-order differential equations. II. The Stokes phenomenon 419

Jones, D. S. and **Whitham, G. B.** An approximate treatment of high-frequency scattering 691

Joseph, V. Physical properties of some empty space-times 836

Juncosa, M. L. and **Young, David.** On the Crank–Nicolson procedure for solving parabolic partial differential equations 448

Kakutani, S. (*Joint author*). Triple points of Brownian paths in 3-space . . . 856

Karp, Samuel N. An application of Sturm–Liouville theory to a class of two-part boundary-value problems 368

Karp, S. N. and **Williams, W. Elwyn.** Equivalence relations in diffraction theory . 683

Kilmister, C. W. (*Joint author*). The concept of order. III. General relativity as a technique for extrapolating over great distances 462

Leech, John. Some solutions of Diophantine equations. (*Research note*) . . . 778

Lehrer, Y. Note on simultaneous linear differential equations with constant coefficients. (*Research note*) 256

Levine, Harold. The torque on an infinite strip exposed to plane sound waves . . 234

Lohwater, A. J. (*Joint author*). Applications of the theory of cluster sets to a class of meromorphic functions 93

Longuet-Higgins, M. S. On the transformation of a continuous spectrum by refraction 226

Longuet-Higgins, M. S. On the velocities of the maxima in a moving wave-form . 230

Lowig, H. F. J. On the existence of freely generated algebras 790

Mahler, K. On the Taylor coefficients of rational functions. (*Addendum*) . . . 544

Marder, L. On uniform acceleration in special and general relativity 194

Martinek, J., Yeh, G. C. K. and **Zorn, H.** Potential and stream function of a vortex disk in the presence of a rigid sphere 717

Maude, Ronald. Exceptional sets with respect to order of integral functions of two variables 323

Mauldon, J. G. On non-dissipative Markov chains 825

McLain, D. H. The existence of subgroups of given order in finite groups . . . 278

McMinn, Trevor J. Linear measure of some sets of the Cantor type 312

Moffat, John. The foundations of a generalization of gravitation theory . . . 473

Moffat, John. The static spherically symmetric solutions in a unified field theory . 489

Moliner, F. Garcia and **Simons, S.** An extension of the general variational principle of transport theory 848

Moran, P. A. P. Numerical evaluation of a class of integrals. (*Addendum*) . . 928

Munn, W. D. Matrix representations of semigroups 5

Munn, W. D. The characters of the symmetric inverse semigroup 13

Musgrave, M. J. P. On whether elastic wave surfaces possess cuspidal edges . . 897

Nanda, V. S. Bipartite partitions 273

Noble, M. E. A converse theorem on overconvergence of sequences of partial sums . 592

Northcott, D. G. On the notion of a first neighbourhood ring with an application to the $AF+B\Phi$ theorem 43

Northcott, D. G. A note on the global dimension of polynomial rings 796

Oldroyd, J. G. The rheology of some two-dimensional disperse systems . . . 514

Palmer, D. S. Properties of random functions. (*Corrigenda*) 264

Petersen, G. M. The norm of iterations of regular matrices 286

Percival, I. C. and **Seaton, M. J.** The partial wave theory of electron-hydrogen atom collisions 654

The following papers have been accepted for publication and will appear shortly:

Good, I. J. Legendre polynomials and trinomial random walks.

Good, I. J. Random motion and analytic continued fractions.

Harrop, R. On the existence of finite models and decision procedures for propositional calculi.

Domb, C. and Fisher, M. E. On random walks with restricted reversals.

Halton, J. H. Elliptical whirl of flooded journal bearings.

Rikitake, Tsuneji. Oscillations of a system of disc dynamos.

Wallace, D. A. R. Note on the radical of a group algebra.

Lawton, B. Bounded representations of the positive values of an indefinite quadratic form.

Armstrong, Ruth. Finite groups in which any two subgroups of the same order are isomorphic.

Stephen, M. J. Double refraction phenomena in quantum field theory.
