<i>Preface to Second Edition</i>	<i>page</i> xiii
<i>Preface</i>	xv
5 Trees and the Composition of Generating Functions	1
5.1 The Exponential Formula	1
5.2 Applications of the Exponential Formula	11
5.3 Enumeration of trees	23
5.4 The Lagrange inversion formula	37
5.5 Exponential structures	45
5.6 Oriented trees and the Matrix-Tree Theorem	55
Notes	66
Exercises	72
Solutions	109
6 Algebraic, D-finite, and Noncommutative Generating Functions	174
6.1 Algebraic generating functions	174
6.2 Examples of algebraic series	184
6.3 Diagonals	194
6.4 <i>D</i> -finite generating functions	202
6.5 Noncommutative generating functions	211
6.6 Algebraic formal series	218
6.7 Noncommutative diagonals	225
Notes	228
Exercises	233
Solutions	271

7	Symmetric Functions	318
7.1	Symmetric functions in general	318
7.2	Partitions and their orderings	319
7.3	Monomial symmetric functions	321
7.4	Elementary symmetric functions	322
7.5	Complete homogeneous symmetric functions	326
7.6	An involution	328
7.7	Power sum symmetric functions	330
7.8	Specializations	334
7.9	A scalar product	339
7.10	The combinatorial definition of Schur functions	341
7.11	The RSK algorithm	349
7.12	Some consequences of the RSK algorithm	355
7.13	Symmetry of the RSK algorithm	358
7.14	The dual RSK algorithm	366
7.15	The classical definition of Schur functions	369
7.16	The Jacobi–Trudi identity	377
7.17	The Murnaghan–Nakayama rule	380
7.18	The characters of the symmetric group	385
7.19	Quasisymmetric functions	392
7.20	Plane partitions and the RSK algorithm	401
7.21	Plane partitions with bounded part size	407
7.22	Reverse plane partitions and the Hillman–Grassl correspondence	415
7.23	Applications to permutation enumeration	418
7.24	Enumeration under group action	427
	Notes	434
	Exercises	444
	Solutions	491
	Supplementary Problems	574
	Supplementary Solutions	626
Appendix 1	Knuth Equivalence, Jeu de Taquin, and the Littlewood–Richardson Rule	687
A1.1	Knuth equivalence and Greene’s theorem	687
A1.2	Proofs of Theorems A1.1.1 , A1.1.4 and A1.1.6	690
A1.3	Jeu de taquin	693
A1.4	The Schützenberger involution	700
A1.5	The Littlewood–Richardson Rule	703
A1.6	Variations of the Littlewood–Richardson rule	709
A1.7	Notes	712

<i>Appendix 2</i>	The Characters of $GL(n, \mathbb{C})$	714
A2.1	Basic definitions and results	714
A2.2	Two operations on symmetric functions	720
	<i>Bibliography</i>	725
	<i>Index</i>	743
