JOURNALS

Proceedings of the Nutrition Society

Published on behalf of The Nutrition Society

Editor-in-Chief

K.R. Westerterp, Maastricht University, The Netherlands

Proceedings of the Nutrition Society publishes papers and abstracts presented by members and invited speakers at the scientific meetings of The Nutrition Society. The journal provides an invaluable record of the scientific research currently being undertaken, contributing to 'the scientific study of nutrition and its application to the maintenance of human and animal health.'

Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Katy Christomanou at Cambridge University Press for further details (email: kchristomanou@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 16, 2013 (12 issues):
Internet/print package: £886/\$1700 Americas only/€1420 EU only
Internet only: £675/\$1280 Americas only/€1420 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, including references.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system (eJournalPress). All manuscripts must be submitted online at <http://phn.msubmit.net/>. If any difficulties are encountered, please contact the Publications Office at phn@nutsoc.org.uk

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing

interests. The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

- Childhood obesity
M Tseng, I Haapala, A Hodge and A Yngve 191

Hot topic – Childhood Obesity

- Prevalence and factors associated with overweight and obesity in French primary-school children
H Thibault, C Carriere, C Langevin, E Kossi Déti, P Barberger-Gateau and S Maurice 193

- Family- and school-based predictors of energy balance-related behaviours in children: a 6-year longitudinal study
M Verloigne, W Van Lippevelde, L Maes, J Brug and I De Bourdeaudhuij 202

- Whole grain consumption is inversely associated with BMI Z-score in rural school-aged children
SF Choumenkovitch, NM McKeown, A Tovar, RR Hyatt, VI Kraak, AV Hastings, JB Herzog and CD Economos 212

- Infant feeding practices and prevalence of obesity in eight European countries – the IDEFICS study
M Hunsberger, A Lanfer, A Reeske, T Veidebaum, P Russo, C Hadjiageorgiou, LA Moreno, D Molnar, S De Henauw, L Lissner and G Eiben 219

- Birth weight and obesity risk at first grade of high school in a non-concurrent cohort of Chilean children
S Loaiza and E Atalah 228

- Association of family income with BMI from childhood to adult life: a birth cohort study
DP Gigante, CG Victora, A Matijasevich, BL Horta and FC Barros 233

- Socio-economic and demographic determinants of childhood obesity prevalence in Greece: the GRECO (Greek Childhood Obesity) study
P Farajian, DB Panagiotakos, G Risvas, K Karasouli, V Bountziouka, N Voutzourakis and A Zampelas 240

- Adiposity indices in the prediction of insulin resistance in prepubertal Colombian children
NT Mueller, MA Pereira, A Buitrago-Lopez, DC Rodríguez, AE Duran, AJ Ruiz, CF Rueda-Clausen and C Villa-Roel 248

- Diet–obesity associations in children: approaches to counteract attenuation caused by misreporting
C Börnhorst, I Huybrechts, A Hebestreit, B Vanaelst, D Molnár, S Bel-Serrat, T Mouratidou, LA Moreno, V Pala, M Eha, YA Kourides, A Siani, G Eiben and I Pigeot, on behalf of the IDEFICS consortium 256

Assessment and methodology

- 'I don't have to go to the gym because I ate very healthy today': the development of a scale to assess diet-related compensatory health beliefs
MP Poelman, WM Vermeer, EL Vyth and IHM Steenhuis 267

- Utility of the waist-to-height ratio as an instrument to measure parental perception of body weight in children and its use in a population-based survey of children
S Nambiar, H Truby, I Hughes and PSW Davies 274

- Measurement error of waist circumference: gaps in knowledge
LM Verweij, CB Terwee, KI Proper, CTJ Hulshof and W van Mechelen 281

Epidemiology

- Relationship between markers of inflammation and anaemia in children of Papua New Guinea
N Shinoda, KM Sullivan, K Tripp, JG Erhardt, BMH Haynes, VJ Temple and B Woodruff 289

- Sociodemographic determinants of early weaning: a Finnish birth cohort study in infants with human leucocyte antigen-conferred susceptibility to type 1 diabetes
M Erkkola, M Salmenhaara, BI Nwaru, L Uusitalo, C Kronberg-Kippilä, S Ahonen, R Veijola, M Knip and SM Virtanen 296

- Evidence on the prevalence and geographic distribution of major cardiovascular risk factors in Italy
R Laccetti, A Pota, S Stranges, C Falconi, B Memoli, L Bardaro and B Guida 305

Nutrition and health

- Correlates of anaemia in pregnant urban South Indian women: a possible role of dietary intake of nutrients that inhibit iron absorption
TM Samuel, T Thomas, J Finkelstein, R Bosch, R Rajendran, SM Virtanen, K Srinivasan, AV Kurpad and C Duggan 316

- Iodine status of pregnant women in a population changing from high to lower fish and milk consumption
I Gunnarsdottir, AG Gustavsdottir, L Steingrimsdottir, A Maage, AJ Johannesson and I Thorsdottir 325

- Dietary antioxidants and periodontal disease in community-based older Japanese: a 2-year follow-up study
M Iwasaki, P Moynihan, MC Manz, GW Taylor, A Yoshihara, K Muramatsu, R Watanabe and H Miyazaki 330

- The association between dairy food intake and the incidence of diabetes in Australia: the Australian Diabetes Obesity and Lifestyle Study (AusDiab)
NM Grantham, DJ Magliano, A Hodge, J Jowett, P Meikle and JE Shaw 339

- Coffee consumption and risk of colorectal cancer: a meta-analysis of observational studies
G Li, D Ma, Y Zhang, W Zheng and P Wang 346

- Health behaviours and health-care utilization in Canadian schoolchildren
SFL Kirk, S Kuhle, A Ohinmaa and PJ Veugelers 358

Interventions

- Improving children's dairy food and calcium intake: can intervention work? A systematic review of the literature
GA Hendrie, E Brindal, D Baird and C Gardner 365

- Factors associated with high compliance/feasibility during iron and folic acid supplementation in a tribal area of Madhya Pradesh, India
T Chakma, PV Rao and PK Meshram 377
