

Scope of the Journal

Clay Minerals - Journal of Fine Particle Science publishes electronically and in paper form research papers about clays, clay minerals and related materials, natural or synthetic. Aspects covered include: Earth Processes (interactions in 'system earth' ± soil science, and geology/mineralogy) including genesis/synthesis, phase transformations, stability, weathering, soil-organic interactions, ion-exchange, basin analysis, clay petrology; Solid State Chemistry/Materials Science ± synthesis, structure and dynamics, reactivity, crystal chemistry, mechanical, thermal, electrical properties, micro and nanophase materials; Environmental Science ± analytical methods, elemental distribution, waste containment, health issues, environmental impact assessment, conservation of cultural heritage; Colloid/Surface Science ± adsorption, colloid stability, surface chemistry, reactivity; and Applied Science and Technology ± industrial uses and technical applications, including mining and processing of clay, zeolite (and other) deposits and application in ceramics, paper, paint, polymer, ion-exchange, sorption, catalysis etc.

Submission of manuscripts

In a letter accompanying the manuscript, the submitting author must state that all authors agree with the final version of the manuscript. The letter must also state that the manuscript has not previously been published elsewhere, either in full or in part, and that, while under review for Clay Minerals, it will not be submitted to any other publication. Authors are encouraged to suggest up to three possible reviewers for their papers.

All manuscripts are to be submitted online at <http://www.edmgr.com/clayminerals/>. The current set of instructions for authors is available at: <https://www.cambridge.org/CLM>

All authors are allowed, free of charge, an e-print of their papers published in the journal.

Join the Mineralogical Society today

If you are a regular reader of Clay Minerals consider joining the Society and receiving your own copy four times a year at a very modest cost. Membership currently starts at £55 per annum. For this, you will receive bi-monthly copies of Elements, our international membership magazine (in full colour) on mineralogy, geochemistry and petrology as well as online access to Mineralogical Magazine, Clay Minerals and Elements. You may also opt to pay an additional premium in order to continue receiving paper copies of our journals. Full details on how to join the Society and an application form can be found on the Society's website at www.minersoc.org. Membership of the Society introduces you to a vibrant community of those interested in the mineral sciences. Through membership of one or more of the Society's eight special interest groups you can take an active part in the Society's numerous scientific meetings and conferences as described on the website.

Mineralogical Society Journals

Mineralogical Magazine

International journal of mineral sciences which covers the fields of mineralogy, crystallography, geochemistry, petrology, environmental geology and economic geology. This journal is available primarily as an e-journal.

Clay Minerals

International journal of clay minerals and fine particle science, published four times a year, including research papers about clays, clay minerals and related materials, natural or synthetic. The journal includes papers on Earth processes, soil science, geology/mineralogy, chemistry/material science, colloid/surface science and applied science and technology. The journal is available primarily as an e-journal.

Copyright

For both the paper and electronic versions, copyright of all papers accepted shall be assigned to the Mineralogical Society before publication, except where Crown Copyright is reserved.

CONTENTS

Articles

CHEDLIA OUNISSI, SALAH MAHMOUDI, LUCA VALENTINI, ALI BENNOUR, ENRICO GARBIN, GILBERTO ARTIOLI and MABROUK MONTACER: Potential use of Kebilian clay reserves (southern Tunisia) for the production of geopolymer materials 101

ANNA STAVITSKAYA, CHRISTINA SHAKHBAZOVA, YULIA CHEREDNICHENKO, LÄYSÄN NIGAMATZYANOVA, GÖLNUR FAKHRULLINA, NAIL KHAERTDINOV, GALIYA KURALBAYEVA, ALLA FILIMONOVA, VLADIMIR VINOKUROV and RAWIL FAKHRULLIN: Antibacterial properties and *in vivo* studies of tannic acid-stabilized silver–halloysite nanomaterials 112

YONCA AVCI DUMAN, A. UĞUR KAYA and ÇIĞDEM YAĞCI: Three-phase partitioning and immobilization of *Bacillus methylophilus* Y37 cellulase on organo-bentonite and its kinetic and thermodynamic properties 120

ALI BOUKHEMKHEM, ALEJANDRO H. PIZARRO and CARMEN B. MOLINA: Enhancement of the adsorption properties of two natural bentonites by ion exchange: equilibrium, kinetics and thermodynamic study 132

MAJA MILOŠEVIĆ, MIHOVIL LOGAR and BILJANA DJORDJEVIĆ: Mineralogical analysis of a clay body from Zlakusa, Serbia, used in the manufacture of traditional pottery 142

TOHID NOURI, PARVIN NAJAFZADEH TEHRANI, RAHIM MASOUMI and GEORGE E. CHRISTIDIS: Rare earth element geochemistry of altered pyroclastic rocks in the Hashtjin area of north-west Iran 150

Review Article

RASIDI SULE and IAKOVOS SIGALAS: Influence of excess alumina on mullite synthesized from pyrophyllite by spark plasma sintering 166

Articles

ALEXANDRE ZACCARON, VÍTOR DE SOUZA NANDI, MARCELO DAL BÓ, MICHAEL PETERSON, ELÍDIO ANGIOLETTO and ADRIANO MICHAEL BERNARDIN: Characterization and use of clays and argillites from the south of Santa Catarina State, Brazil, for the manufacture of clay ceramics 172

NIA GRAY-WANNELL, PETER J. HOLLIMAN, H. CHRISTOPHER GREENWELL, EVELYNE DELBOS and STEPHEN HILLIER: Adsorption of phosphate by halloysite (7 Å) nanotubes (HNTs) 184

HAMIDA BELHANAFI, ABDELLAH BAKHTI and NOUREDDINE BENDERDOUCHE: Study of interactions between rhodamine B and a beidellite-rich clay fraction 194
