PARASITES AND PARASITISM

THOMAS W. M. CAMERON

Professor of Parasitology, McGill University

Based on thirty years teaching of the subject to a wide variety of students, this provides a completely new approach to parasitology. Not only is it evolutionary in its viewpoint, but it treats parasitism as a natural biological phenomenon, as a branch of ecology, co-equal in importance and interest with terrestrial, fresh-water and marine creatures. Its basic tenet is that as there are more species of parasites than there are of hosts, the parasite must normally have adopted a *modus vivendi* with the host and so normally is not pathogenic. Disease, therefore, is not a necessary consequence of parasitism and parasites must be considered as part of the host's environment.

The book falls into three parts. First there is a general survey of parasites, in which representative types are discussed. The second part considers the evolution and development of the defence mechanism of the host, while the third is concerned with the consequences of parasitism—including natural history of disease.

BULLETIN OF ENTOMOLOGICAL RESEARCH

Published quarterly and containing original articles on Economic Entomology. *Issued Post Free.*
Annual Subscription (payable in advance) 60s. od.

Prices of back parts and volumes on application.

REVIEW OF APPLIED ENTOMOLOGY

Consisting of abstracts or reviews of all current literature on Economic Entomology throughout the world. Published monthly in two series:

Series "A" dealing with insect and other Arthropod pests of cultivated plants, forest trees and stored products of animal and vegetable origin.

Series "B" dealing with insects, ticks, etc. conveying disease or otherwise injurious to man and animals. *Issued Post Free.*

Annual Subscription (payable in advance) *Series "A"* 40s. od. *Series "B"* 20s. od.

Prices of back parts and volumes on application.

ZOOLOGICAL RECORD, part INSECTA

Published annually about October each year and containing as complete a record as possible of the literature of the previous year, chiefly from the systematic standpoint.

Annual Subscription (including postage) 30s. 6d.

Prices of back volumes on application.
