# INFECTION CONTROL & HOSPITAL EPIDEMIOLOGY

**The Society for Healthcare Epidemiology of America (SHEA) and the University of Chicago Press are pleased to inaugurate a publishing alliance to bring greater visibility to important research in healthcare epidemiology and infection control. Written by and for infection control practitioners, this peer-reviewed journal will provide you with a monthly forum for all your critical research needs.**

# REPRINTS

# 60%

## fewer BSI's with MaxPlus<sup>®</sup> is only one reason to give us a call.

Simply put, MaxPlus<sup>®</sup> valves are cleaner, safer and easier than other needleless access devices.

That's why one hospital reduced bloodstream infections by 60%

after switching to MaxPlus valves. And another reported a 50% reduction in TPA use.

*MaxPlus comes clean after swabbing (above), while nooks and crannies in ordinary valves (right) harbor orange dye representing bacteria.*

MaxPlus features Tru-Swab Technology which assures a flat, smooth surface that always returns to its original position, allowing for proper friction swabbing during pre-access disinfection. It also flushes 99.34% clear with one 5cc flush of saline.

In addition, MaxPlus can be used on both peripheral and central catheters, reducing confusion and error associated with two different devices and two different clamping procedures.

Call us to learn more. And improve your percentages.

### MaxPlus<sup>®</sup> with Tru-Swab Technology

- Maximum barrier to microbial ingress
- Positive displacement
- Standardization and ease of use
- Saline flush; heparin not required
- Chemotherapy and MRI compatibility
- Simple fluid path; flow rate of 183 ml/min
- Free of latex and DEHP

# Clinical Infectious Diseases

Official publication of the Infectious  
Diseases Society of America

*Clinical Infectious Diseases (CID)* publishes topical research and incisive commentaries from distinguished clinicians and scientists on the diagnosis and treatment of infectious diseases. Each issue contains clinically relevant articles of current interest in:

- Clinical research
- Immune mechanisms
- Medical microbiology
- Epidemiology and prevention
- Pathogenesis
- HIV/AIDS
- New antimicrobial therapies
