

Parasitology

Edited by

D. W. T. CROMPTON

Lecturer in Parasitology, University of Cambridge

B. A. NEWTON

*Director of the Medical Research Council Unit for Biochemical Parasitology and
Head of the Department of Parasitology, University of Cambridge*

Parasitology publishes original results from pure and applied studies of parasites and host-parasite relationships.

In addition to papers describing the taxonomy, life cycles and ecology of parasites, the journal includes reports of experimental work on biochemical, immunological and physiological aspects of parasitism and on the chemotherapy of parasitic diseases. Brief book notices are also published.

With effect from Volume 80, Parasitology regularly publishes articles in which Trends and Perspectives in parasitology are discussed. These titles are intended

- 1 To focus attention on developing and growing topics in parasitology.
- 2 To identify new and old problems in need of research.
- 3 To explain how results from one area of biology might have some bearing on current studies in parasitology.
- 4 To present teachers and students with concise summaries of recent discoveries and new theories.

Current Issues

Volume 82: February, April and June 1981

Volume 83: August, October and December 1981

**Subscription: Volume 82 £43.00, Volume 83 £32.00 and £75.00 per year
Single parts: £12.00 (postage extra)**

Orders may be sent to any bookseller, subscription agent or direct,
with payment, to

JOURNALS PUBLISHED FOR THE
NUTRITION SOCIETY

The British Journal of Nutrition

Editor: G. A. J. Pitt (Chairman)

Department of Biochemistry, University of Liverpool

The Journal publishes original work in all branches of nutrition, including clinical and human nutrition, experimental nutrition (including descriptions of new apparatus and techniques) and the nutrition of farm animals.

Selected contents of Volume 45 Number 1 January 1981

Iris Robertson, J. A. Ford, W. B. McIntosh and M. G. Dunnigan: The role of cereals in the aetiology of nutritional rickets: the lesson of the Irish National Nutrition Survey 1943–8

Sheila Bingham, N. I. McNeil and J. H. Cummings: The diet of individuals: a study of a randomly-chosen cross-section of British adults in a Cambridgeshire village

Thierry Brun, Fanny Bleiberg and Samuel Goihman: Energy expenditure of male farmers in dry and rainy seasons in Upper-Volta

Current Issues:

Volume 45: January, March and May 1981

Volume 46: July, September and November 1981

£40.00/\$115.00 per volume, £80.00/\$230.00 per year

Single parts: £16.00/\$46.00

The Proceedings of the Nutrition Society

Editor: G. A. J. Pitt (Chairman)

Department of Biochemistry, University of Liverpool

The Proceedings contain complete records of invited papers read at the Symposia of the Society and Abstracts of Communications read by members at the Society's scientific meetings.

Selected contents of Volume 44 Number 1 January 1981

Symposium Proceedings

Nutrition and Cancer: 22nd July 1980

Nutrition and Toxicology: 23rd July 1980

Integration of Metabolism: 9–10th September 1980

Abstracts of Communications

Current Issues:

Volume 40: January, May and September 1981

£40.00/\$115.00 per volume Single parts: £15.50/\$44.50

WORLD ASSOCIATION OF VETERINARY FOOD HYGIENISTS EIGHTH SYMPOSIUM

August 30th – September 4th, 1981

Dublin – Ireland

The Symposium has as its general theme, "Animal Health, Food Safety and the Consumer" and plenary sessions will be held on:

- "Meat and poultrymeat inspection: current and future developments and problems"
- "Recent trends in food-borne diseases"
- "New developments in the detection of disease agents in foods"
- "Water hygiene and management in food production and processing"
- "Food habits and food-borne diseases"

The programme will also include short communications and poster sessions on these and other topics, as well as an attractive social programme for accompanying persons.

The official languages of the Symposium will be English, French and German. Simultaneous translation facilities will be available.
