Cyclability of r-regular r-connected graphs	1
by W. D. McCuaig and M. Rosenfeld	
Sharp estimates of approximation by some positive linear operators	13
by Ashok Sahai and Govind Prasad	
A translation plane of order 81 and its full collineation group	19
by Vito Abatangelo	
p-groups with non-abelian automorphism groups and all automorphisms central	35
by J. J. Malone	
On the Möbius function of $\text{Hom}(P, Q)$	39
by T. P. Speed	
Countable sum theorem for locally closed sets	47
by Satya Deo and Dalip Singh Jamwal	
Existence of solutions of Oseen type integral equations	57
by J. A. Belward	
Small subharmonic functions	67
by P. C. Fenton	
Analytic mappings with negative coefficients in the unit disc	83
by M. L. Mogra	
Stability of functional differential equations of Volterra type	93
by M. Rama Mohana Rao and P. Srinivas	
CONFERENCE IN HONOUR OF KURT MAHLER	
Some suggestions for further research	101
by Kurt Mahler	
p-adic methods in the study of Taylor coefficients of rational functions	109
by A. J. van der Poorten	
The n-dimensional approximation constant	119
by G. Szekeres	
A method of Mahler in transcendence theory and some of its applications	127
by J. H. Loxton	
ABSTRACTS OF AUSTRALASIAN PhD THESES	
A unified theory of causal models	137
by Harri Tapio Kiiveri	
Discrete Green's functions and random resistive networks	139
by Cezary S. Surma	
Optimization in abstract spaces	141
by Leslie Ian Trudzik

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after being evaluated by the Editor and an Associate Editor or another expert. Of course responsibility for the correctness of results published in the BULLETIN remains with the authors.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,

Department of Pure Mathematics, La Trobe University,

Bundoora, Victoria 3083, Australia

but should not send the original typescript of their papers, as material submitted to the BULLETIN will usually not be returned. Authors should note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification.

As even minor revisions are generally not permitted, authors should read carefully all the details listed on the inside back cover.

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 3 months of the degree being approved.
