I N D E X.

	PAGE
ALLARDICE, Professor.	
Note on four circles touching a common circle, -	7
On the nine-point conic, - - - -	23
On a cubic curve connected with the triangle, -	62
 CARSLAW, H. S.	
Oblique Incidence of a train of Plane Waves on a Semi-Infinite Plane, - - - -	71
 CHRYSTAL, Professor.	
Some Elementary Theorems regarding Surds, - -	46
 CRAWFORD, LAWRENCE.	
The General Equation of a Geodesic on a Surface of Revolution applied to the Sphere, - -	57
 DAVIS, R. F.	
Euclidean Proof of Pascal's Theorem [Title], - -	2
A note on the focal relations of a bicircular quartic, -	66
 DOUGALL, JOHN.	
Note on the application of complex integration to the equation of Conduction of Heat, with special reference to Dr Peddie's problem, - -	50
 GIBSON, Professor.	
An Extension of Abel's Theorem on the Continuity of a Power Series, - - - -	67

	PAGE
JACK, Professor.	
Alternative Proof of a Theorem in Change of Axes, -	5
Tangents to a conic (or to confocal conics) at right angles meet on a circle [Title], - - -	34
MAIR, DAVID.	
The n^{th} root of a prime number cannot be the root of an equation of degree less than n with rational coefficients, - - - - -	33
MUIRHEAD, R. F.	
Inequalities relating to some Algebraic Means, -	36
OFFICE-BEARERS, - - - - -	1
PEDDIE, W.	
Note on the Cooling of a Sphere in a mass of well- stirred Liquid, - - - - -	34
THIRD, J. A.	
Triangles triply in perspective, - - -	10
TWEEDIE, CHARLES.	
Note on the expression for the area of a triangle in Cartesian Coordinates, and a general proof of the Addition Theorem in Trigonometry connected therewith, - - - - -	2
