

Who's Who, 1900. Fifty-second year. Adam and Charles Black, Soho Square.

A useful consultant's friend and consulting-room requisite alike from the completeness of the work, as well as from its convenient alphabetical form, untrammelled by any classification under subdivisions, as Peerage, Knighthood, etc. The idea of giving the "recreations" of the élite savours of the Gilbert and Sullivan operetta; yet it is hardly a fault.

R. Lake.

NEW PREPARATIONS.

"Tabloid" Quinine Hydrobromide.

We have received from Messrs. Burroughs Wellcome and Co., of Snow Hill Buildings, London, E.C., a specimen of "Tabloid" Quinine Hydrobromide, gr. 3 (0.194 gramme).

As is well known, the great advantage which observers ascribe to quinine hydrobromide is that, whilst retaining in full the therapeutic properties of quinine, it is very free from the tendency to produce quinism.

Many patients who are altogether prevented from taking the ordinary quinine salts even in small doses can take 5 grains or larger doses of "Tabloid" Quinine Hydrobromide without the slightest unpleasant symptom.

In combination with this advantage, the "Tabloid" product presents the further one of being pleasant and easy to take. It thus overcomes the usual objections to quinine, both as regards taste and liability to produce headache and similar symptoms. It is therefore of conspicuous value in conditions indicating quinine when susceptibility to quinism and a strong objection to the taste of the drug co-exist.

The "Tabloid" is issued in two sizes, containing 3 and 5 grains in each.

Rogers' Modified Lozenge.

MR. FRANK ROGERS, of 327, Oxford Street, W., known to English laryngologists for his endeavours to give to sprays the most practical form, has sent us a lozenge which he informs us he has made to meet the requirements of lozenge users and lozenge prescribers.

His idea, which we are fully in accord with, is that it is not so much the size of the lozenge as the *constant* lavage of the oropharynx by a medicated saliva that is required.

Mr. Rogers has accomplished this by so cutting the lozenge that it can be broken easily into two or four portions. Many surgeons tell their patients with swelling at the base of the tongue to break up the lozenge into quarters, and practically always have a quarter in the mouth. By this means it will be seen Rogers' lozenges obtain four times the effect of ordinary lozenges, or, in other words, one of these lozenges is equal in effect to four of the ordinary P. B. lozenges, and without the same risk of disturbing the digestive, etc., functions. They will prove invaluable to patients with easily-disturbed digestions, and enable those who have feared astringent, etc., effects on the stomach to now use lozenges freely.

APPOINTMENTS.

DR. JOBSON HORNE has been appointed pathologist to the Throat Hospital, Golden Square, London.

DR. FURNISS POTTER has been elected to the senior staff of the London Throat Hospital.

DR. FRANCIS J. QUINLAN and DR. R. C. MYLES have been elected Professors of Laryngology and Rhinology at the New York Polyclinic.

MR. MACLEOD YEARSLEY and MR. RICHARD LAKE have been elected full surgeons to the Royal Ear Hospital, London.

NOTICES.**BRITISH MEDICAL ASSOCIATION.**

SIXTY-EIGHTH ANNUAL MEETING, IPSWICH.

Section K.—Laryngology and Otology.

The Meeting of the British Medical Association will be held this year in Ipswich from JULY 31ST to AUGUST 3RD inclusive.

It has been decided to hold a combined Section of Laryngology and Otology.

Foreign visitors will be cordially welcomed in the Section, and are requested to send in their names, together with the title of any communication they may wish to make, as soon as possible, to the Honorary Secretaries.

There will be two set subjects for special discussion, viz., "The Indications for Intranasal Treatment in Ear Disease," and "The Pathology and Treatment of Toxic Paralysis of the Larynx."

Gentlemen having any specimens of interest, Röntgen ray photographs, etc., connected with the subjects of the Section, are invited to exhibit them at the meeting, and to forward them, carriage paid, before Saturday, July 28, to Dr. A. Y. PRINGLE, 64, St. Matthew's Street, Ipswich.

It is particularly requested that titles of papers or communications be sent as soon as possible.

All communications to be addressed to "The Secretaries, 48, Harley Street, London, W."

THIRTEENTH INTERNATIONAL MEDICAL CONGRESS.

WE have been asked by the Executive Committee of the Congress to state: That in response to numerous inquiries the Executive Committee has decided that dentists who, without being doctors in medicine, hold a state diploma, French or foreign, may inscribe themselves as members of the Congress in the section of Stomatology. Adhesions are to be sent to the offices of the Congress, 21, Rue de l'École de Médecine, Paris.

INDEX TO VOL. XV., 1900.

	PAGE
Abductor paralysis, bilateral (Wyatt Wingrave)	392
——— double, under treatment by intra-muscular injections (L. H. Pegler)	83
——— simulated by compression of the trachea by aneurism of the arch of the aorta (Courtade : abstract)	337
Abscess: case of abscess round the sigmoid sinus without suppuration of the mastoid (Professor Politzer)	322
——— cerebellar (Rimini : abstract)	58
——— (Dieulafoy : abstract)	567
——— due to otitis : two cases, one cured (Hansberg : abstract)	110
——— following chronic middle-ear suppuration, specimens (W. Milligan)	137
——— following otitis suppurativa (Bonain : abstract)	445
——— operated upon (W. Milligan)	137
——— sequestration of cochlea in cured case (E. B. Waggett)	144
——— (cerebral) and mastoid disease in case of suppurative otitis: necropsy (H. Blake : abstract)	618
——— formation of a circumscribed inter-dural abscess at the site of the sacculus endolymphaticus (W. Jobson Horne)	293
——— large subperiosteal, over base of mastoid process (Dr. Hasslauer : abstract)	403
——— of antrum : asthma as reflex manifestation from (Richardson : abstract)	105
——— of brain, acute bilateral (double) after opening the mastoid; re- covery (H. Seligman : abstract)	230
——— rare case due to otitis (W. Lindt, jun. : abstract)	451
——— of occipital part of brain of otitic origin (Heiman : abstract)	402
——— (orbital) with frontal sinus empyema (Martin : abstract)	105
——— multiple, of tonsils, in pharyngeal and naso-pharyngeal diphtheria (Sendziak : abstract)	327
——— peritonsillar (Sendziak : abstract)	396
——— with hæmorrhage (W. F. Chappell)	313
——— retropharyngeal (Traver : abstract)	624
——— of auricular origin (Urbano Melzi)	25
——— temporal, of otitic origin (A. Broca : abstract)	224
——— tonsillar and circumtonsillar abscess (G. A. Leland : abstract)	328
Abstracts of literature : diphtheria, etc.	94, 287, 327, 394, 439, 614
——— ear	56, 107, 223, 342, 402, 567, 618, 672
——— larynx	51, 97, 218, 290, 336, 399, 444, 511, 668
——— mouth, etc.	46, 96, 210, 287, 327, 395, 439
——— nose	47, 97, 212, 289, 331, 397, 441, 510, 617, 667
——— pharynx	231, 624, 675
——— therapeutics	455
ACLAND (Mr.), new instruments for the treatment of antral empyema	375
Acoumetric notation (Pierre Bonnier)	286
Acoumetry, a universal notation (F. Schiffers, and A. Hartmann)	556, 558
——— simple method of (Bonnier)	90

	PAGE
Acoustic exercises for deaf-mutes (V. Urbantschitsch and Dr. Schwendt)	558, 560
Adeno-carcinoma: removal of large part of auricle and whole of meatus for adeno-carcinoma (A. Cheatle)	144
Adeno-sarcoma of nasal septum (Baker: abstract)	212
Adenoid reflexes: hiccup, photophobia (Thomas: abstract)	398
—— vegetations (H. Cuvellier)	593

CASTEX on causes and prognosis of facial palsy following operations	285
— on certain vocal affections	286
— on diplacusis	89
— tonsillar infection revealed by morcellement	89
Catarrh, catarrhal deafness, so-called, prognosis and treatment (D. Ray)	673
— dry chronic, of the middle ear, in connection with subperiosteal abscess over base of mastoid process (Dr. Hasslauer: abstract)	403
— nasal, prevention (Rogers: abstract)	97
— painful recurrent, of frontal sinus, due to stenosis of the fronto-nasal duct (Dr. Luc)	609
CATHCART (George C.), case of laryngeal affection in a tubercular patient for diagnosis	201
Catheter, rubber, use as tracheal cannula in treatment of cancer of larynx and trachea (A. Courtade)	603
Cauterization, accidental, of larynx by caustic poisons (Courtade)	93
— of middle ear (Dioniso: abstract)	56
— through ostium maxillare and of frontal sinus in purulent nasal discharges (E. W. Roughton)	243, 244
Cells: anterior ethmoidal, chronic suppuration (P. G. Kingston: abstract)	617
— ethmoidal, anatomy (A. Hartmann)	64
— empyema causing exophthalmos (Buller and Byers: abstract)	442
— emphysema of orbital wall of anterior ethmoidal cells caused by blowing nose (J. Dundas Grant)	163
Cellulitis of the neck (Plücker: abstract)	330
Cerebellum: abscess (Himani: abstract)	58
— due to otitis: two cases, one cured (Hansberg: abstract)	110
— following chronic middle-ear suppuration, specimens (W. Milligan)	137
— operated upon (W. Milligan)	137
— sequestration of cochlea in cured case (E. B. Waggett)	144
Cerebro-spinal fluid: profuse escape for five weeks without cerebral symptoms (A. Lucae: abstract)	452
Chaff-cutter suffering from hoarseness from laryngitis secondary to rhinitis (J. Dundas Grant)	164
CHALMERS (Albert J.), report on "henpuye" in the Gold Coast Colony (abstract)	213

	PAGE
CHAMPEAUX (P. de), on pulmonary lesion due to a benign growth in the larynx (abstract)	400
Chancre of the palate (G. Baudouin : abstract)	395
Chancriform angina (Mariau : abstract)	440
CHAPPELL (W. F.), hæmorrhage from a peritonsillar abscess	313
CHAVEAU (C.), a case of leucocythæmia symptomatic of a lympho-sarcoma of the tonsil	592
—— hysterial paralysis of the left vocal cord, with concomitant paresis of sterno-mastoid and trapezius of the same side; anæsthesia and paresis of the soft palate, difficulty in swallowing, and hypersecretion	592
CHEATLE (Arthur H.), the petro-squamosal sinus: its anatomy and pathological importance	13
—— a case of chronic middle-ear suppuration and thrombosis of the lateral sinus, in which the internal jugular vein was not ligatured: recovery	144
—— a patient in whom a large part of the auricle and the whole of the meatus had been removed for adeno-carcinoma, and in whom the post-aural operation had been performed, with specimen, and microscopical section	144
—— chronic middle-ear suppuration, with thrombosis of the lateral sinus, in which the internal jugular vein was not ligatured: recovery (abstract)	224
—— cases of epithelioma of the meatus and chronic middle-ear suppuration	316
CHIARI on the prognosis of laryngeal cancer (abstract)	337
—— vocal nodules	507
Child with curtain-ring in pharynx for eight years (H. L. Lack : abstract).	676
Children: bleeding and refrigerants in acute otitis media in children (Miot : abstract)	453
—— papillomata of larynx in (E. T. Dickerman : abstract)	668
Chin: deep median furrow of lower lip and chin (P. Redard and Frank Michel: abstract)	46
Choana, osseous atresia and radical operation of (Flatau : abstract)	333
—— radical operation on bony occlusion of choanæ (T. S. Flatau : abstract)	47
Cholesteatoma, large, removed from mastoid in boy aged fourteen (H. Tilley).	144
—— operated on by a modification of Körner's plastic (F. Siebenmann : abstract)	230
—— removed through meatus (U. Pritchard)	143
Chorditis vocalis inferior hypertrophica (so-called), etiology (Baurowicz : abstract)	97
Chromic acid solution in the treatment of malignant tumours of mucous membrane of pharynx, nose, and larynx (Hamon de Fougeray)	605
CIECHOMSKI, on a syphilitic tumour of the tonsil simulating malignant neoplasm (abstract)	395
CIEGLEWICZ, the therapeutic action of ichthyol in catarrhal inflammation of the mucous membrane of the larynx (abstract)	98
CLARK (J. Payson), cyst of the larynx	309
—— on bulbous middle turbinates	309
"Cleavage" of the middle turbinate (so-called), simulated by case of chronic ethmoiditis (H. Tilley)	385
Clinical examination of genuine acute exudative middle-ear inflammation (Nadoleczny : abstract)	673
—— studies in complications of acute and chronic middle-ear suppuration (Leutert-Konigsberg : abstract)	451
COBBETT (Louis), diphtheria in the horse (abstract)	614
Cocaine: economy in employment of (W. Wingrave)	658
Cochlea, sequestration, in cured case of cerebellar abscess (E. B. Waggett)	144
Coin, small silver, lodged in larynx for four weeks; removal with forceps under cocaine (Walker Downie: abstract)	101
COLE, some observations on the anatomy and physiology of the ear (abstract)	56

	PAGE
COLLIER (H. Stansfield) and SPICER (R. H. Scanes), sarcoma of the carotid sheath; removal of the growth, together with portions of the carotid arteries, internal jugular vein and pneumogastric nerve: recovery (abstract)	55
COLLIER (Mayo), case of complete abductor paralysis of the left vocal cord	268
Commissure, anterior, pseudo-membranous adhesion in (Sir Felix Semon)	256
COMPAIRED, perforating ulcer of the mouth (abstract)	440
Congenital laryngeal obstruction (C. H. McIlraith: abstract)	671
— cleft palate in a man aged twenty-eight (D. Vinrace)	666
Conjunctiva, chronic pemphigus of (Otto: abstract)	339
CONNELL (J. C.), the cure of stammering and stuttering (abstract)	439
Consanguineous marriage: see <i>Marriage</i> (consanguineous).	
CORDES (Hermann), the treatment of the diseases of the sphenoidal sinus (abstract)	214
Coryza: importance of auto-intoxication in periodic and aperiodic coryza (Dr. Mounier)	598
Cough, hysterical (Bournoville: abstract)	337
— treatment, particularly in laryngeal tuberculosis (W. Freudenthal: abstract)	103
Coughing, violent, causing anomalous central hæmorrhage (P. Macleod Yearsley)	425
CONNAL (Dr. J. G.), appointed Lecturer on Aural Surgery in Anderson's Medical College, Glasgow	63
COURTADE, detection of simulated unilateral deafness by a deep-toned fork	91
— modifications of the counter-pressure tongue-depressor	93
— nasal and aural speculum-holder	93
— two cases of accidental cauterization of the larynx by caustic poisons	93
— hysterical deaf-mutism in little girl aged three and a half	286
— on the compression of the trachea by an aneurism of the arch of the aorta simulating paralysis of the abductors (abstract)	337
— palliative treatment of cancer of the trachea and larynx, use of rubber catheter as tracheal cannula	603
COUSTEAU, pulmonary emphysema due to experimental nasal obstruction	604
COX (Robinson), Graves' disease, with report of the successful treatment of a case (abstract)	100
COZZITINO on bacteriological and histological study of ozæna (abstract)	332
CREEL (M. P.), on treatment of recurrent attacks of spasmodic croup (abstract)	219
Creosote, carbonate of, in injections for fetid breath (Bayer: abstract)	209
Cricoid cartilage, echondroma of (Lenzmann: abstract)	401
Croup, recurrent spasmodic treatment (M. P. Creel: abstract)	219
CROWFOOT (Dr.), discussion on the pathological distribution of the diphtheria bacillus and the bacteriological diagnosis of diphtheria	588
Crusts in cases of chronic purulent nasal discharges (E. W. Roughton)	241
CUMBERBATCH (A. E.), on selection of suitable cases for the complete mastoid operation for the cure of chronic suppurative disease of the middle ear	191
Cushions, Eustachian: approximation of remains of Luschka's tonsil and Eustachian cushions producing recesses in naso-pharynx (StClair Thomson)	366
Cut-throat: see <i>Throat</i> .	
Curtain-ring exhibited, removed from pharynx of a child (H. L. Lack)	379
— for eight years in pharynx of child (H. L. Lack: abstract)	676
CURTIS (Holbrook), discussion on intra-nasal treatment of ear-disease	487
CUVELLIER (H.), hypertrophy of the tonsils and adenoid vegetations	593
Cyst at base of tongue in child aged three (H. FitzGerald Powell)	437
— (bony) of middle turbinate bone (H. Tilley)	154
— cystic degeneration of the mucous membrane of the nose and accessory sinuses (Fr. Schlagenhauser: abstract)	335

Index.

Cyst (dental): dental cysts of superior maxilla (P. Jacques and G. Michel: abstract)	440
—— dentiferous, of superior maxilla (P Berger: abstract)	210
—— of epiglottis (H. D. Hamilton: abstract)	52
—— lantern demonstration (W. Jobson Horne)	147
—— of floor of the external auditory meatus (Dr. Ephraim: abstract)	220
—— of the larynx (J. P. Clark)	309
—— probably cystic nature of new growth in vocal cord (J. Dundas Grant)	41
—— serous, of the auricle (Guranowski: abstract)	402
—— suppurative, of turbinal bone (H. A. Davis)	260
—— of the tonsils (Mounier: abstract)	211
DALBY (Sir William), Presidential Address at meeting of Otological Society of United Kingdom	134
—— on cases of chronic purulent otorrhœa suitable for the mastoid operation	190
DALY, Mrs. A. C. (of Pittsburg), obituary notice	63
DANA (Charles L.), the common forms of meningitis and their recognition, with special reference to serous meningitis (abstract)	342
DAVIS (Henry J.), case of suppurative cyst of turbinal bone	260
—— case of extreme hypertrophy of inferior turbinals in a boy	261
—— case of enlargement of lingual tonsils in a woman aged thirty, with secondary syphilis	388
—— case of ulceration of larynx (shown for Mr. S. Paget)	393
Deaf-mutes, acoustic exercises for (V. Urbantschitsch, and Dr. Schwendt)	558, 560
Deaf-mutism and consanguineous marriage (A. H. Huth: abstract)	446
—— hysterical, in little girl aged three and a half (Courtade)	286
Deafness, catarrhal, so-called, prognosis and treatment (D. Roy: abstract)	673
—— complete, following railway accident (collision) (Pollak: abstract)	112
—— due to tumour of medulla and pons (A. A. Gray)	29
—— hysterical (Lannois et le Marc Hadour: abstract)	450
—— cured by suggestion (Taptas: abstract)	454
—— in right ear for twelve months, occurring in case of discharge of pus and blood from naso-pharynx for over twelve months (Barclay Baron)	160
—— simulated unilateral, detection by deep-toned fork (Courtade)	91
DE BLOIS (T. A.) on fractures of the nose	298
DECKER (Alfred), on the operation for adenoid vegetations (abstract)	208
Decortication of the face (Dr. Goris)	606
Deflections of the cartilaginous septum, Asch's operation for (Thorner: abstract)	510
—— of the septum, treatment (E. J. Moure)	598
Degeneration, cystic, of the mucous membrane of the nose and accessory sinuses (F. Schlagenhauser: abstract)	335
DE GUY on hæmatemesis in diphtheria (abstract)	327
DELAGÉNIÈRE on tracheotomy in bucco-pharyngeal operations (abstract)	337
DELAVAN (D. Bryson) on methods of treatment and the statistical results	306
—— a consideration of the statistics of the operations for the relief of malignant disease of the larynx	645
DELIE, considerations on the operative treatment of fibrous naso-pharyngeal polypi (abstract)	333
DELSTANCHE, Professor, committee for organizing manifestation in his honour	63
—— obituary notice	121, 134
—— portrait of	184
DELSTANCHE (jun.) on importance of ophthalmoscopic examination in purulent affections of the ear (abstract)	206
DENCH (E. B.), synechiotomy of the stapes for improving the hearing in chronic suppurative otitis media residua (abstract)	107

Syphilis: congenital syphilitic ulceration of nose (Wyatt Wingrave)	665
—— hereditary, causing hypertrophic laryngitis (StClair Thomson)	366
—— innocently-acquired syphilitic infection of the throat (F. R. Packard : abstract)	212
—— syphilitic tumour of the tonsil simulating malignant neoplasm (Ciechowski : abstract)	395
—— tertiary, of nose, pharynx and larynx (Tresilian)	666
—— specific ulceration of ala nasi (J. Dundas Grant)	85
—— thyrotomy for tertiary syphilitic laryngitis (W. G. Spencer)	204
—— unusual form of ulceration of throat in case of (Wyatt Wingrave)	198
Tabes, case with almost complete laryngoplegia (Sir F. Semon)	148
—— laryngeal crisis in tabetics in relation with the other visceral crises (Touche : abstract)	55
Tabloid Bland pill	680
—— guaiacum resin	60
—— quinine hydrobromide (new preparation)	347
TANTURRI (D.), tuberculosis of the tongue (abstract)	212
TAPTAS, hysterical deafness cured by suggestion (abstract)	454
—— on the radical operation for chronic multiple sinusitis	610
Taste: function of soft palate (Mariau : abstract)	395
TAVEL on strength and preservation of diphtheria antitoxin (abstract)	287
Teeth: examination of upper teeth in chronic purulent nasal discharges (E. W. Roughton)	242
TEICHMANN (M.), statistics of the dangerous complications of suppurative ear diseases and of operations on the mastoid process (abstract)	231
Telephone: over-use of, causing partial paralysis of vocal cords (C. C. Rice)	310
Temporal bone: contribution to the surgery of the temporal bone (R. Saterler : abstract)	229
—— from a case of leukaemia (Dr. Gomperz)	324
—— purulent disease (Körner : review)	58
TEXIER and BAR, contribution to the study of nasal tuberculosis	611
Therapeutics: abstracts of literature	455
Thickening, symmetrical, below anterior part of vocal cords (Sir Felix Semon)	256
THOMAS on adenoid reflexes: hiccup, photophobia (abstract)	398
THOMSON (StClair), female aged twenty-four with enlargement of nose	35
—— male aged fifteen with enlargement of nose	35
—— case of ulceration of the pharynx for diagnosis	204
—— cleft soft palate and well-marked post-nasal adenoids	205
—— case of a female aged twenty-three with obstruction of one nostril from antral affection of uncertain character	254
—— case of a girl with hereditary syphilis causing hypertrophic laryngitis, and showing recesses in the naso-pharynx produced by the approximation of the remains of Luschka's tonsil and the Eustachian cushions	366
—— the bacteriology of the normal nose	405
THORNE (Atwood), nasal case for diagnosis	35
—— a case of stammering in a young man (shown for Dr. William Hill)	165
—— and GRANT (Dundas), retrospect of otology	2
THORNER, remarks on Asch's operation for deflections of the cartilaginous septum (abstract)	510

	PAGE
THRASHER (A. B.), on fibroma of the larynx	310
Throat: conditions of throat and larynx simulating and predisposing to tuberculosis (Lennox Browne)	268
—— (cut) two cases of, with opening of air-passage (E. R. C. Earle: abstract)	102
—— (diseases): cases from Clinic of Professor Pieniazek in Hospital of St. Lazar (Bourowiez: abstract)	98
—— quarterly retrospect of department for (G. T. Ross: abstract)	667
—— innocently acquired syphilitic infection of the throat (F. R. Packard: abstract)	212
—— Röntgen rays in diseases of the nose, throat, and neighbouring organs (John Macintyre: abstract)	350
—— ulceration, extensive: case for diagnosis (R. H. Scanes Spicer)	263
—— unusual form in patient the subject of syphilis (Wyatt Wingrave)	198
—— use of suprarenal capsule in the nose and throat (J. C. Sharp: abstract)	335
—— Year-Book (G. P. Head and A. H. Andrews: review)	678
—— and nose, diseases (J. Price-Brown: review)	455
Thrombo-phlebitis of lateral sinus treated by operation without ligature of internal jugular vein: recovery (J. Dundas Grant)	143
—— of left sigmoid sinus followed by extensive transference of thrombotic material in retrograde direction (Biehl: abstract)	107
Thrombosis: extensive transference of thrombotic material in retrograde direction after otitic thrombo-phlebitis of left sigmoid sinus (Biehl: abstract)	107
—— of lateral sinus, obstructive: a new symptom (F. Voss: abstract)	231
—— cure without operation (Levy: abstract)	110
—— in case of chronic suppuration of middle ear: internal jugular vein not ligatured: recovery (A. H. Cheatle: abstract)	224
—— of otitic origin (H. Knapp: abstract)	449
—— recovery after opening of sinus and ligature of internal jugular vein (T. Barr and J. H. Nicoll: abstract)	223
—— two cases: one with obscure etiology and pathology (S. Lodge, jun.)	493
—— with chronic suppuration of middle ear; operation: recovery (A. H. Cheatle)	144
—— septic, of lateral and longitudinal sinuses with pus in intact middle ear (W. Jobson Horne)	316
—— of sinus cured in a girl of nine (Politzer: abstract)	228
—— of sigmoid and lateral sinus, occurring six years after scarlatinal otitis media (J. M. MacCallum: abstract)	452
Thyroglossal duct: persistence of the lower portion (A. T. Bazin: abstract)	219
Thyroid cartilages: complication of the thyroid cartilages causing laryngeal stenosis (E. Mayer: abstract)	670
—— duct: its removal (Armstrong: abstract)	218
—— gland: effect of iodine upon (L. Gautier: abstract)	52
—— new growth in right lobe (Tresilian)	666
—— tumour of the thyroid (H. v. Schrötter: abstract)	339
—— (T. M. Manley: abstract)	618
Thyrotomy, effects, immediate and remote (Goris)	505
—— for tertiary syphilitic laryngitis (W. G. Spencer)	204
—— indications (Sir F. Semon)	504
—— indications for, and technique of (E. Uruñela)	612
—— technique (Schmiegelow)	505
TILLEY (Herbert), specimen of large cholesteatoma removed from the mastoid in a boy aged fourteen	144
—— specimen of a bony cyst of middle turbinate bone	154
—— case of tumour of nasal septum	265, 369
—— on chronic purulent nasal discharges: their diagnosis and treatment	317
—— purulent nasal discharges: their diagnosis and treatment (review)	344
—— six cases of frontal sinus empyema	367
—— case of abnormal pulsating pharyngeal vessel	369

Index.

liii

	PAGE
TILLEY (Herbert), case of nasal angiosarcoma shown at last meeting	369
— case of chronic ethmoiditis simulating so-called "cleavage" of middle turbinate	385
— case of radical operation for frontal sinus empyema	393
— case of chronic frontal sinus empyema cured by radical external operation	430
— case of double frontal sinus and antral empyema with great distension of bridge of nose	431
— case of pedunculated tonsil	437
— discussion on intranasal treatment of ear disease	484
— two cases of chronic frontal sinus empyema presenting features of unusual interest	491
— chronic empyema of the frontal sinus, with notes on the treatment of fourteen cases (abstract)	667
Tongue: adhesion, complete, of the epiglottis with the root of the tongue through luetic cicatrices (Rischaevay: abstract)	339
— angiomatica, multiple (Morelli)	326
— cyst at base of tongue in child aged three (H. FitzGerald)	437
— duplication of median glosso-epiglottic ligament (Lubliński: abstract)	104
— hemiatrophy (L. A. Parry: abstract)	616
— malformation, with deep median furrow of lower lip and chin and median division of inferior maxilla (P. Redard and Frank Michel: abstract)	46
— papillomatous condition (J. B. Ball)	153
— sarcoma (Dorner: abstract)	328
— tuberculosis of (D. Tantarri: abstract)	212
— tumours, voluminous, of the base of the tongue obstructing larynx (Didsbury)	287
— ulceration (D. Vinrace)	663
Tongue-depressor: modifications of counter-pressure tongue-depressor (Courtade)	93
Tonsil: cysts of the tonsils (Mounier: abstract)	211
— extirpation of upper half only effectual preventive against phlegmonous tonsillitis (R. Botey)	591
— faucial: acute ulcer (Wyatt Wingrave)	81
— hypertrophy, treatment by morcellement (Ruault)	600
— importance of upper portion of tonsil and of supra-tonsillar fossa in ætiology of phlegmonous peritonsillitis (R. Botey)	591
— infection revealed by morcellement (Castex)	89
— lingual: enlargement of lingual tonsils in case of secondary syphilis (H. J. Davis)	388
— Luschka's: approximation of remains of Luschka's tonsil and Eustachian cushion producing recesses in naso-pharynx (StClair Thomson)	366
— lympho-sarcoma of (Gaudier: abstract)	206
— leucocythæmia symptomatic of (C. Chauveau)	592
— pedunculated (H. Tilley)	437
— pharyngeal, operation on pharyngeal tonsil, hæmophilia; death (R. Sachs)	61
— removal of tonsils benefiting epilepsy (L. Brown)	661
— sarcoma, primary (J. Walker Downie)	426
— of tonsillar fossa simulating phlegmon of that region (Gaudier: abstract)	46
— suppurative inflammation of palatine and lingual tonsils; peritonsillar abscesses (Sendziak: abstract)	396
— syphilitic tumour of the tonsil simulating malignant neoplasm (Ciechomski: abstract)	395
— treatment of digestive disorders associated with chronic tonsillitis (Aviragnet: abstract)	327
— ulceration of uncertain origin (J. Dundas Grant)	371
— (left), ulceration of uncertain origin [? specific] (J. Dundas Grant)	433
Tonsillitis, acute: pathological histology (Goodall: abstract)	96

	PAGE
Tonsillitis streptothricia (P. Hellat)	596
— ulcer- or eroso-membranous : presence of short variety of Löffler's bacillus in exudate of ulcer- or eroso-membranous tonsillitis following operation (Glover : abstract)	94
— ulcerous, fusiform bacillus of Vincent in case of (Lichtwitz and Sabrazès)	92
Tonsils, enlarged, and adenoids, and their removal (D. J. G. Wishart : abstract)	51
— hæmorrhage from a peritonsillar abscess (W. F. Chappell)	313
— hypertrophy of tonsils (H. Cuvellier)	593
— multiple abscesses of tonsils in diphtheria of pharynx and naso-pharynx (Sendziak : abstract)	327
— question of internal secretion (Masini : abstract)	287
— tonsillar and circumtonsillar abscess (G. A. Leland : abstract)	328
Topography of facial nerve in its relation to mastoid operations (R. D. Joyce)	23
TOUCHE, the laryngeal crisis in tabetics in relation with the other visceral crises (abstract)	55
Trachea, cancer of œsophagus spreading to (Appert : abstract)	511
— compressed by an aneurism of the arch of the aorta ; paralysis of the abductors simulated (Courtade : abstract)	337
— intra-tracheal injections in treatment of laryngeal tuberculosis (L. Vacher)	613
— membranous occlusion of (Moblinie : abstract)	291
— resection of, in primary carcinoma (Bruns : abstract)	400
— stenosis (case shown by Mr. Stephen Paget for Dr. Pasteur)	374
— late stenosis of trachea after tracheotomy (P. Reinhard : abstract)	401
— tracheal injections in treatment of pulmonary tuberculosis (T. Morris Murray)	312
— tumours of the trachea (J. Lemoine : abstract)	338
— and larynx : cancer, palliative treatment ; use of rubber catheter as tracheal cannula (A. Courtade)	603
Tracheotomy apart from croup in the child and adult (A. Lorgnon : abstract)	338
— followed by late tracheal stenosis (P. Reinhard : abstract)	401
— in bucco-pharyngeal operations (Delagènière : abstract)	337
Tracheotomy tube, case in which there was difficulty in removing (E. W. Roughton)	371
— small modifications (Botey : abstract)	51
Transillumination for cases of chronic purulent nasal discharges (E. W. Roughton)	242, 243
Transilluminator for frontal sinus (F. Furet)	89
Trapezius and sterno-mastoid muscles, left, paresis in case of hysterical paralysis of left vocal cord (C. Chauveau)	592
TRAYER : retropharyngeal abscess (abstract)	624
TRESILIAN, demonstration of two cases: 1. Tertiary syphilis of nose, pharynx and larynx; 2. Large new growth in the right lobe of thyroid gland	666
Trichloroacetic acid applied to heal perforation (J. Dundas Grant)	316
Tubage without permanent surveillance (Escat : abstract)	220
Tube, tracheotomy : see <i>Tracheotomy</i> tube.	
Tubercle of the larynx (C. J. Symonds)	84
Tuberculoma in naso-pharynx with necrosis of sphenoid and occipital bones (Schmithuisen : abstract)	397
Tuberculosis ; British sanatoria for open-air treatment (review)	291
— conditions of throat and larynx simulating and predisposing to tuberculosis (Lennox Browne)	268
— acute, of middle ear (Gaudier : abstract)	57
— laryngeal affection in tubercular patient for diagnosis (G. C. Cathcart)	201
— laryngeal, an apparatus for treatment by inhalations (P. Lacroix)	232
— intercordal (tubercular) tumour of larynx (J. Dundas Grant)	433
