

New Books for Marine Biologists from Oxford

Research on Dolphins

Edited by M. M. Bryden and Richard Harrison

More than twenty recognized authorities bring together their expertise in this volume to provide an authoritative survey of the present state of knowledge on the biology of dolphins, and to point the way for future research.

0 19 857606 4, 464 pp., illus., Clarendon Press, 1986

£45

The Biological Chemistry of Marine Copepods

Edited by E. D. S. Corner and S. C. M. O'Hara

This is the first book to deal specifically with this topic. It is essentially a collection of critical reviews outlining the present state of knowledge and indicating future developments.

0 19 854714 5, 360 pp., illus., Clarendon Press, 1986

£40

A Handbook for the Identification of Cephalopod Beaks

Edited by Malcolm R. Clarke

This definitive work, based on collections made throughout the world, was made possible by the collaboration of most of the world's experts on living cephalopods. It provides detailed instructions for collecting, preserving, transporting, examining, and identifying the lower 'beaks' or mandibles of cephalopods belonging to almost all the known living genera.

0 19 857603 X, 288 pp., illus., Clarendon Press, 1986

£30

Marine Pollution

R. B. Clark

An introductory text on marine pollution, assuming only a modest background in chemistry and biology. It explains the major inputs of wastes to estuaries and the sea and their effects, and provides the scientific basis for a dispassionate evaluation of the impact of marine pollution.

0 19 854183 X, 228 pp., illus., Clarendon Press, 1986

£19.50

0 19 854182 1, paperback

£9.95

Underwater Photography and Television for Scientists

Edited by J. D. George, G. I. Lythgoe, and J. N. Lythgoe

This volume reviews the achievements and limitations of underwater photography and television, and provides basic information on the methods that can be used.

Underwater Association Special Volume No. 2

0 19 854141 4, 200 pp., illus., Clarendon Press, 1985

£32.50

THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

Since its foundation the Association has been supported by subscriptions and donations from private members, universities, learned societies, the Fishmongers' Company and other public bodies. For some time past, however, the main financial support for the work of the Plymouth Laboratory has come from Government funds, and since 1965 the Laboratory has been grant-aided through the Natural Environment Research Council.

The Marine Biological Association, under the direction of its Council, undertakes research in all branches of marine science and the main results are published in this journal. Accounts of the laboratory and aquarium are to be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281), and summaries of the activities and research of the Association are given annually in the Report of the Council in the November issue of the Journal.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found on the inner page of the front cover. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by three research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

TERMS OF MEMBERSHIP

	per annum	£
Annual Members, receiving the Journal	per annum	15.00
Annual Members, without the Journal	per annum	3.00
Founders		100.00
Governors		500.00

Annual subscriptions become due on 1 January.

Members of the Association have the following rights and privileges; they elect annually the Officers and Council; they are entitled to receive the Journal of the Association at a reduced rate; they are admitted to view the laboratory at Plymouth; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc.; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth during working hours.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscriptions paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth, PL1 2PB.

The *Journal of the Marine Biological Association* is published quarterly. The subscription price of volume 67, 1987, of the Journal to non-members of the Association is £115.00 net a volume of four parts, post free, or US \$250.00 in USA and Canada, payable in advance. Single parts cost £30.00 (US \$73.00 in USA and Canada) plus postage. Subscriptions may be sent to any bookseller or to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, or in USA and Canada, to Cambridge University Press, 32 East 57th Street, New York, 10022. Second class postage paid at New York, NY and at additional mailing offices. POSTMASTER: send address changes in the USA and Canada to *Journal of the Marine Biological Association*, Cambridge University Press, 32 East 57th Street, New York, NY 10022. All orders must be accompanied by payment.
