

ANIMAL PRODUCTION

JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

APRIL 1977

VOL. 24 PART 2

LONGMAN

INFORMATION FOR CONTRIBUTORS TO
ANIMAL PRODUCTION

Detailed notes for guidance in the preparation of manuscripts are printed in Volume 13, pages ix to xx. A few general points are given below.

Animal Production publishes reports in English of *original* work in the field of animal production, or in any related scientific field. The Editors will consider articles on any aspect of research or development, providing the work described has been carried out in a systematic way, and articles critically re-examining published information. Reviews of the literature are not accepted. Reports on techniques will be published only as appendices to scientific papers. Contributions should be concise. Results of research which do not warrant a comprehensive presentation may be submitted for consideration as *Notes*. Notes are not intended for the publication of interim results. They should not exceed 2000 words or the equivalent inclusive of tables and illustrations.

Papers are published on the understanding that they have not been and, with the exception of authors' summaries, will not be published elsewhere without the Editors' written permission. Authors' summaries can be reproduced if full acknowledgement of the source is made.

Manuscripts should be typewritten in double spacing with wide margins. Each page and the lines on each page should be numbered. *Two* copies of the typescript (and of illustrations) should be sent to

Professor J. A. F. Rook,
Animal Production,
The Hannah Research Institute,
Ayr KA6 5HL, Scotland

Manuscripts are not returned with proofs; authors should therefore retain copies.

Units of measurement. Metric units should be used. SI units will be accepted but are not obligatory.

Symbols and abbreviations. Authors should consult the notes prepared for guidance. Levels of statistical significance which can be indicated without explanation are: * = $P < 0.05$, ** = $P < 0.01$, *** = $P < 0.001$.

Illustrations. The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board, stout tracing paper or plastic film. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be inserted in Indian ink. Marginal lettering may, if preferred, be inserted lightly in pencil.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors.
- (c) Colour plates are unlikely to be accepted unless authors bear the cost.

All you've always wanted to know about the **SCIENCE CITATION INDEX**[®] but never found time to ask.

If you've heard about the *Science Citation Index*, wondered how it works or compares with traditional subject indexes, here's your chance to get the full story.

A comprehensive booklet discusses every facet of this unique indexing system. And it's available to you without cost or obligation.

The booklet is full of facts, figures, theory and how-to-use-it information. For example, you'll find discussions of:

- How the *SCI*[®] employs citation and Permuterm[®] subject indexing to avoid use of ambiguous terminology.
- How the *SCI* covers over 90% of the significant scientific and technical journal literature.
 - What citation indexing is.
 - How the *SCI*'s sophisticated, computer-based information processing reduces the time lag between original publication and indexing to a bare minimum.
- How to perform four basic types of literature searches—with sample indexing entries shown in detail.

So if you want to know all about the *SCI*, now's the time to ask. Send for your free booklet or ask for any reasonable number you may need for your organization.
