### ARCHIVES OF NEUROLOGY;

From the Pathological Laboratory of the London County Asylums,  
Claybury, Essex.

EDITED BY

**FREDERICK WALTER MOTT, F.R.S., M.D., F.R.C.P.,**

*Director of the Laboratory and Pathologist to the London County Asylums; Physician-in-Charge of Out-patients, Charing Cross Hospital.*

*All business communications relating to Advertisements to be addressed to Messrs. J. H. Booty & Son, 29, Wood Lane, Usbridge Road, London, W.*

**NOTICE.—STEWARDS and MATRONS of HOSPITALS, ASYLUMS, WORKHOUSES, &c., are strongly recommended to use**

**THE**  **SANITARY POLISHES**  
FOR  
**POLISHED WOOD FLOORS, LINOLEUM, &c.**

**They give a brilliant polish with a minimum of labour, are most economical, and possess valuable Sanitary and Preservative Properties, and impart an agreeable freshness to the atmosphere.**

**NOW EXTENSIVELY USED IN METROPOLITAN AND PROVINCIAL HOSPITALS, WORKHOUSES, &c.**

THE LOCAL GOVERNMENT JOURNAL says:—"When floors are treated with 'Ronuk' they attain a hard, polished, waterproof and germ-proof surface without any greasiness or stickiness, and without any unpleasant odours. It is extremely economical, a very small quantity going a long way, and producing a brilliant gloss, with the expenditure of a remarkably small amount of labour."

**SUPPLIED IN FOURTEEN-POUND TINS.**

A Sample will be sent free to any Institution on application to

**"RONUK," Limited, 83, Upper Thames Street, London, E.C.**

JUST ISSUED.

**The Nervous System and its Constituent Neurones. De-**

signed for the use of Practitioners of Medicine and of Students of Medicine and Psychology; by LEWELLYS F. BARKER, M.B., TOR., Associate Professor of Anatomy in the Johns Hopkins University, and Assistant Resident Pathologist to the Johns Hopkins Hospital; 8vo, 1123 pp., with Two Coloured Plates and 676 Illustrations in the Text, in handsome Roxburgh binding, gilt top, price 25s. net.

This book has been written in the light of the revelations of the most recent investigations in neuropathology, and constitutes the most scientific and complete work on the subject ever published, and one of inestimable value to the practitioner and student of medicine.

"This is unquestionably the most scientific and exhaustive treatise on the nervous system in the English language. The text is elaborately and beautifully illustrated, while the printing and binding are excellent."—ST. LOUIS COURIER OF MEDICINE.

**Hirt's Diseases of the Nervous System: a Text-book for**

Physicians and Students, by Dr. LUDWIG HIRT, Professor of the University of Breslau; Second Edition, translated, with permission of the Author, and revised from the Second German Edition, by AUGUST HOCH, M.D., assisted by FRANK R. SMITH, A.M.(Cantab.), M.D., Assistant Physicians to the Johns Hopkins Hospital; with an Introduction by WILLIAM OSLER, M.D., F.R.C.P., Professor of Medicine in the Johns Hopkins University, and Physician in Chief to the Johns Hopkins Hospital, Baltimore; 8vo, 715 pp., with 181 illustrations, cloth, price 21s. net.

"Weir Mitchell has characterised this work, in the German original, as being exceptionally well arranged and thorough, and Osler was so impressed with its admirable character that he asked the author's permission to have it translated. The more one investigates the text the more reason he finds to concur in the opinion of the above-mentioned authorities. It is indeed a superior treatise, thorough in anatomy, lucid in symptomatology, rational and judicious in treatment."—DENVER MEDICAL TIMES.

"Professor Hirt's classical work has become a standard text-book the world over, and is so recognised by both teachers and students. The illustrations are mostly original, and of excellent character. The text is lucidly and concisely written; at the same time the subjects are thoroughly treated. It is just what its title indicates, and will be found a safe guide in its department of medicine."—NEW YORK MEDICAL TIMES.

**HENRY KIMPTON, Publisher, 82, High Holborn, London, W.C.**

*All business communications relating to Advertisements to be addressed to Messrs. J. H. Booty & Son, 29, Wood Lane, Uxbridge Road, London, W.*

## Male Nurses' (TEMPERANCE) Co-operation,

Only Address—10, THAYER STREET, MANCHESTER SQUARE, W.

Superior Trained MALE NURSES for Medical, Surgical, Mental, Dipsomania, Fever, and Travelling Cases supplied at a moment's notice, Day or Night. All Nurses supplied by this Association are TOTAL ABSTAINERS. SKILLED MASSEURS supplied. *The only Temperance Association of Nurses in the Kingdom.* Terms: £1 11s. 6d. to £2 2s. or upwards per week. # THE THYROID TREATMENT

and the Preparations Manufactured by  
ALLEN & HANBURY'S LTD.

---

**Myxœdema.**—The relief afforded to cases of Myxœdema by the use of the Thyroid Gland during the last five years has marked a totally new departure in the history of medicine. We are beginning to understand the physiological importance of Internal Secretions to the animal economy.

Myxœdema has been recognised as long ago as 1874 by Sir Wm. Gull as a distinct disease, and before that time it had been found that animals invariably succumbed after total extirpation of the Thyroid.

Cretinism, too, had long been recognised to be connected with congenital absence or deficiency in the glandular structure of the Thyroid.

Time enough has now elapsed to prove that those cases of Myxœdema which have been restored to health maintain that condition as long as they continue to take the gland or efficient preparation of its extract.

**Sporadic Cretinism.**—As regards Sporadic Cretinism, we cannot do better than refer the reader to an original article which appeared in the *Lancet*, with Photographs, by W. W. O—, M.D. Oxon., M.R.C.P. London, November 4th, 1893, p. 1113.

All these cases were treated by Allen and Hanburys' Thyroidin Tablets. The results are perhaps more remarkable than those obtained in the allied condition of Myxœdema. The writer observes that these Preparations have given entire satisfaction. The Photographs speak for themselves.

The success attending the use of Thyroid Extract in the Myxœdematous condition of the skin and its appendages has suggested its employment in various skin lesions.

**Psoriasis.**—Very good results have been attained in some cases of obstinate psoriasis by using Thyroidin Tablets.

In a recent number of the *Lancet* three of these cases are reported. After treatment with iodide of potassium and arsenic internally, and chrysophanic acid ointment locally, showed no improvement, but, on the other hand, the disorder was in some cases aggravated, developing a general dermatitis of the face with febrile disturbance.

But on the treatment being changed, and TABLETS OF THYROID GLAND (ALLEN AND HANBURY'S) being administered, the writer observes:

*Case 1.*—"The improvement was very striking, . . . the scales were completely gone, and all that was left was a slight discoloration of the skin where the disease had appeared."

*Case 2.*—"The scalp and limbs were nearly clear. . . . The patient, who has suffered from the disease for nineteen years past, has had no discomfort from the remedy, and says that nothing has ever acted so rapidly upon his disease."

*Case 3.*—"The result was astonishing, for in three days there was a marked improvement, and no further spread of the disease had taken place. No discomfort was experienced from the remedy."

For full details of the above quotations see the *Lancet*, January 6th, 1894, p. 19.

Whilst formerly liquid extracts and the raw gland were used, ALLEN AND HANBURY'S were the first to offer the active principles of the Thyroid Gland in the compressed form, which is now the favourite mode of administration. The glands are dissected and carefully examined and separated from all blood, fat, and inert tissue, which readily decompose and produce gastric disturbances, vomiting, &c., and which give to some preparations on the market a most repulsive smell, especially when they have been kept for a short time.

## THYROIDIN TABLETS

Readily disintegrate when swallowed, and from their shape and size are taken without difficulty. If preferred, they may be dissolved in a little water before being swallowed.  
One Tablet equals 5 grs. of Gland. Dose: 1 or 2.

## THYROIDIN CACHETS

Contain 5 grs. of Thyroidin in each. Dose: 1 or 2. A very suitable and convenient mode of taking Thyroidin.

## ELIXIR THYROIDIN

Is a very palatable, slightly sweet preparation, of which one fluid ounce represents one Gland (average). It will be found to keep well without change. Dose: 1 to 4 fluid drachms.

The above are put up in 1s., 2s. 6d., and 4s. 6d. packages (retail), or 8s., 21s., and 40s. per doz. to the Profession.

SAMPLES SUPPLIED TO THE PROFESSION ON APPLICATION.
