EXPERT EVALUATION OF «ANOTHER UNHEALTHY CONDITIONS»

S. Danilova

Serbsky Scientific Research Center of Social and Forensic Psychiatry, Moscow, Russia

Patients who have had chronic mental disorders, another unhealthy conditions, mental retardation are considered to be irresponsible. Special interest represent is disorders, which expect as "another unhealthy conditions". Mental disorders consider without process basis (pathokinesis have has chronic or acute psychosis), dementia. Another unhealthy conditions is quality differences from mental standard, but it does happen expressive that does irresponsible.

56 men have been examined in the department of Personality Disorders and psychogenias. Age: 20-60 years old. Disorders experts as "another unhealthy conditions" includes of the Classification ICD-10: Personality Disorders (F 60 - F 61), organic Personality Disorders (F 06.3 - F 07.9), mentally retardness of slight degree with breach of behaviour (F 70.1). Diagnosis of Paranoid Personality Disorder and Schizoid Personality Disorder were most common.

Analysis of expert evaluation is show that it is necessary to estimate psychological criteria of irresponsibility. Analysis of pathological symptoms, structure of personality and cognitive disorders, disposition of crime, situational and motivational factors are show that it is necessary to estimate a depth of mental pathology, disturbance of critical abless and defects of personality and intellectual functions to expects conclusions of irresponsibility.
