Editor

John Lewis, Royal Holloway, University of London, UK

Journal of Helminthology publishes original papers and review articles on all aspects of pure and applied helminthology, particularly those helminth parasites of environmental health, medical or veterinary importance. Research papers on helminths in wildlife hosts, including plant and insect parasites, are also published along with taxonomic papers contributing to the systematics of a group. The journal will be of interest to academics and researchers involved in the fields of human and veterinary parasitology, public health, microbiology, ecology and biochemistry.

Editor-in-Chief

Michel Doreau, INRA, France

animal publishes original cutting-edge research, 'hot' topics and horizon-scanning reviews on animal-related aspects of the life sciences at the molecular, cellular, organ, whole animal and production system levels. The main subject areas include: breeding and genetics; nutrition; physiology and functional biology of systems; behaviour, health and welfare; farming systems, environmental impact and climate change; product quality, human health and well-being.

CAMBRIDGE
UNIVERSITY PRESS

Notes for Authors

Comparative Exercise Physiology (CEP) provides a forum for presenting the results of research related to understanding and improving animal exercise and performance. Research into all animals, including humans, will be welcome. The key areas the journal will concentrate on include: exercise physiology, biomechanics and gait (including the effect of riders), nutrition and biochemistry, rehabilitation, psychology and behaviour, breeding and genetics. Other areas for consideration include pharmaceuticals and doping, ageing, environment, transport and any other research relevant to exercise and athletic performance.

Styles of Paper

CEP publish four types of paper:

- 1) Full research papers. A full account of a complete project with experimental details.
- 2) Short communications. A preliminary account of exciting new results for which work is ongoing. Indicative experimental summaries should be included.
- 3) Research notes. Short accounts of small projects that might not merit a full paper (e.g. undergraduate research projects or minor aspects of a Ph.D. thesis). These might include technical notes.
- 4) Reviews. Literature overviews of recent research in a larger subtopic or comparative reviews of related work in different species.

In addition to these four types we also welcome 'Letters to the Editor' with comments on recently published papers to encourage a dialogue between readers and researchers.

Please indicate the type of paper you are submitting.

Technical and Nomenclature Standards

All work should use SI units as standard. Anatomical terms can be a mixture of the English vernacular and Latin, depending on current usage.

Peer Review

All contributions will be reviewed by at least two referees to ensure both accuracy and relevance. You should submit the names and contact details (including email addresses) of at least two, and up to four, potential referees for your paper.

Submission of Manuscripts

Manuscripts should be submitted online via our manuscript submission and tracking site, www.edmgr.com/cecp. Full instructions for electronic submission are available directly from journals.cambridge.org/CEP. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current email address when registering to use the system.

Final Manuscript Preparation

If your paper is accepted, you should supply the final paper as a Word document with separate figure files to exercise@cambridge.org. When submitting the final version please specify the software used for word processing and illustrations and identify the operating system used (PC, Mac, Unix etc). We kindly ask that you follow the instructions below for the final version. Please use double line spacing and ample margins and separate each paragraph by a blank line, numbering each page. Do not indent the start of each paragraph or use underlining. Please use italics for taxonomic nomenclature, bold for headings and standard abbreviations (e.g. Fig. and Figs) and SI units.

Arrangement of Papers

Please arrange your paper in the following order:

- 1) Title page. Article title, authors addresses (one author should be identified for correspondence), and abstract.
- 2) The text, divided under appropriate headings.
- 3) Acknowledgements (if any).
- 4) References.
- 5) Tables (each on a separate sheet).
- 6) Captions to illustrations (group on a separate sheet or sheets).
- 7) Illustrations, each on a separate sheet or as separate files.

Tables

Tables should be in a simple form. They should not be used if text or illustrations give the same information. Each table must be accompanied by a clear and concise caption.

Illustrations

Please ensure text figures, line drawings, computer-generated figures and graphs are of sufficient size and quality to allow for reduction. Please avoid the use of grey tints or complex hatching and only use halftone photographs where they make a real contribution to the text. Please inform the Editor at the earliest opportunity if you wish to use colour illustrations (we will ask you to pay in advance for the use of colour, but we can advise on how this can be kept to a minimum).

References

References should be in the Vancouver system, i.e. sequential numbering in the text and corresponding reference list. Reference numbers should be raised superscripts.

You should use the following conventions when providing the full citations in the reference list.

1 Shibata I, Mori M and Uruno K (1997). Experimental infection of maternally immune pigs with porcine reproductive and respiratory syndrome (PRRS) virus. *Journal of Veterinary and Medical Science* **60**: 1-13.

2 Sanderson CJ (1999). Cytokines active on eosinophils. In: Makino S and Fukuda T (eds) *Eosinophils: Biological and Clinical Aspects*. Boca Raton: CRC Press, pp. 274-287.

3 Dalton JP (1999). *Fasciolosis*, p. 57. Wallingford: CABI Publishing.

Ethics

The authors must demonstrate that the experimental procedures employed conform to the accepted principles of animal welfare in experimental science. Please see the *CEP* website for more details (journals.cambridge.org/cecp).

Copyright

Papers are accepted papers on the understanding that the work has been submitted exclusively to the journal and has not been previously published. Authors will be supplied with a transfer of copyright form with their proofs, this must be completed and returned to the Publisher.

Note that it is the author's responsibility to ensure that permission has been obtained from the copyright owner if you wish to reuse any figures or illustrations from previously published work.

Proofs

We will contact, and send page proofs for correction, to the first named author unless you indicate otherwise.

Offprints

The corresponding author will be sent a PDF file of the final published article for use. There will also be an option to purchase offprints.

For a more detailed Notes for Authors please visit: journals.cambridge.org/cecp

COMPARATIVE EXERCISE PHYSIOLOGY

CONTENTS

RESEARCH PAPERS

- A comparative study of interval and continuous incremental training in Thoroughbreds**
LL Bronsart, RH Sides and WM Bayly 49–57
- Endocrine changes after experimental showjumping**
A Ferlazzo, P Medica, C Cravana and E Fazio 59–66
- Thoroughbred yearling sales price and subsequent season end 3-year-old racetrack performance measured by Timeform ratings**
AL Andersen and TC Whitaker 67–71
- The effects of a post-workout nutraceutical drink on body composition, performance and hormonal and biochemical responses in Division I college football players**
SM Arent, P Davitt, DL Golem, CA Williams, KH McKeever and C Jaouhari 73–80
- Effect of omeprazole and ranitidine on total carbon dioxide concentration in horses subjected to a simulated race test**
D Ciolino, RA Lehnhard and KH McKeever 81–87
- Dressage training affects temporal variables in transitions between trot and halt**
E Tans, S Nauwelaerts and HM Clayton 89–97
