

INDEX

- Bae, J. H.** *See* Kim, Park, Park, Bae & Yoo
- Bajaj, A. K.** *See* Bidkar, Kimber, Raman, Bajaj & Garimella
- Bearman, P. W.** Understanding and predicting vortex-induced vibrations, 1–4
- Bidkar, R. A., Kimber, M., Raman, A., Bajaj, A. K. & Garimella, S. V.** Nonlinear aerodynamic damping of sharp-edged flexible beams oscillating at low Keulegan–Carpenter numbers, 269–289
- Bourassa, C. & Thomas, F. O.** An experimental investigation of a highly accelerated turbulent boundary layer, 359–404
- Brodkey, R. S.** *See* McEligot, Brodkey & Eckelmann
- Camarri, S.** *See* Weller, Camarri & Iollo
- Caulfield, C. P.** *See* Tang, Caulfield & Kerswell
- Chang, M.-H., Ruo, A.-C. & Chen, F.** Electrohydrodynamic instability in a horizontal fluid layer with electrical conductivity gradient subject to a weak shear flow, 191–215
- Chen, F.** *See* Chang, Ruo & Chen
- Cho, J. H.** Analysis of low-frequency wave scattering by turbulent premixed flame, 137–164
- Dimitrakopoulos, P.** *See* Takemura, Magnaudet & Dimitrakopoulos
- Dritschel, D. G.** *See* Lucas & Dritschel
- Duck, P. W.** *See* Hewitt & Duck
- Duncan, J. H.** *See* Shakeri, Tavakolinejad & Duncan
- Eckelmann, H.** *See* McEligot, Brodkey & Eckelmann
- Ferreira de Sousa, P. J. S. A., & Pereira, J. C. F.** Dynamics of passive scalars and tracers advected by a two-dimensional tripolar vortex, 41–60
- Garimella, S. V.** *See* Bidkar, Kimber, Raman, Bajaj & Garimella
- Gimelshein, N.** *See* Selden, Ngalande, Gimelshein, Gimelshein & Ketsdever
- Gimelshein, S.** *See* Selden, Ngalande, Gimelshein, Gimelshein & Ketsdever
- Henningson, D. S.** *See* Marxen, Lang, Rist, Levin & Henningson
- Hewitt, R. E. & Duck, P. W.** Long’s vortex revisited, 91–111
- Iollo, A.** *See* Weller, Camarri & Iollo
- Jones, C. A., Kuzanyan, K. M. & Mitchell, R. H.** Linear theory of compressible convection in rapidly rotating spherical shells, using the anelastic approximation, 291–319
- Kerswell, R. R.** *See* Tang, Caulfield & Kerswell
- Ketsdever, A.** *See* Selden, Ngalande, Gimelshein, Gimelshein & Ketsdever
- Kim, S. H., Park, J. Y., Park, N., Bae, J. H. & Yoo, J. Y.** Direct numerical simulation of vortex synchronization due to small perturbations, 61–90
- Kimber, M.** *See* Bidkar, Kimber, Raman, Bajaj & Garimella
- Kuzanyan, K. M.** *See* Jones, Kuzanyan & Mitchell
- Lang, M.** *See* Marxen, Lang, Rist, Levin & Henningson
- Law, C. K.** *See* Wu & Law
- Law, C. K.** *See* Zhang & Law
- Levin, O.** *See* Marxen, Lang, Rist, Levin & Henningson
- Lucas, D. & Dritschel, D. G.** A family of helically symmetric vortex equilibria, 245–268

- Magnaudet, J.** *See* Takemura, Magnaudet & Dimitrakopoulos
- Marxen, O., Lang, M., Rist, U., Levin, O. & Henningson, D. S.** Mechanisms for spatial steady three-dimensional disturbance growth in a non-parallel and separating boundary layer, 165–189
- McEligot, D. M., Brodkey, R. S. & Eckelmann, H.** Laterally converging duct flows. Part 4. Temporal behaviour in the viscous layer, 433–461
- Mitchell, R. H.** *See* Jones, Kuzanyan & Mitchell
- Morse, T. L. & Williamson, C. H. K.** Prediction of vortex-induced vibration response by employing controlled motion, 5–39
- Ngalande, C.** *See* Selden, Ngalande, Gimelshein, Gimelshein & Ketsdever
- Núñez, M.** Formation of singularities in Hall magnetohydrodynamics, 499–507
- Park, J. Y.** *See* Kim, Park, Park, Bae & Yoo
- Park, N.** *See* Kim, Park, Park, Bae & Yoo
- Pereira, J. C. F.** *See* Ferreira de Sousa & Pereira
- Raman, A.** *See* Bidkar, Kimber, Raman, Bajaj & Garimella
- Rist, U.** *See* Marxen, Lang, Rist, Levin & Henningson
- Ruo, A.-C.** *See* Chang, Ruo & Chen
- Selden, N., Ngalande, C., Gimelshein, N., Gimelshein, S. & Ketsdever, A.** Origins of radiometric forces on a circular vane with a temperature gradient, 419–431
- Shakeri, M., Tavakolinejad, M. & Duncan, J. H.** An experimental investigation of divergent bow waves simulated by a two-dimensional+T technique, 217–243
- Takemura, F., Magnaudet, J. & Dimitrakopoulos, P.** Migration and deformation of bubbles rising in a wall-bounded shear flow at finite Reynolds number, 463–486
- Tang, W., Caulfield, C. P. & Kerswell, R. R.** A prediction for the optimal stratification for turbulent mixing, 487–497
- Tavakolinejad, M.** *See* Shakeri, Tavakolinejad & Duncan
- Thomas, F. O.** *See* Bourassa & Thomas
- Weller, J., Camarri, S. & Iollo, A.** Feedback control by low-order modelling of the laminar flow past a bluff body, 405–418
- Williamson, C. H. K.** *See* Morse & Williamson
- Wu, X. & Law, C. K.** Flame-acoustic resonance initiated by vortical disturbances, 321–357
- Yoo, J. Y.** *See* Kim, Park, Park, Bae & Yoo
- Zhang, P. & Law, C. K.** Role of the Knudsen layer in determining surface reaction rates based on sticking coefficients, 113–135

CAMBRIDGE

New and Exciting Titles!

Electrokinetically-Driven Microfluidics and Nanofluidics

Hsueh-Chia Chang and
Leslie Yeo

\$125.00; Hb: 978-0-521-86025-3; 450 pp.

Diffusion Mass Transfer in Fluid Systems

E. L. Cussler

Cambridge Series in Chemical Engineering

\$80.00; Hb: 978-0-521-87121-1; 654 pp.

An Introduction to Modeling of Transport Processes

Applications to Biomedical Systems

Ashim Datta and
Vineet Rakesh

Cambridge Texts in Biomedical Engineering

\$80.00; Hb: 978-0-521-11924-5; 536 pp.

Slushing

Odd M. Faltinsen and
Alexander N. Timokha

\$125.00; Hb: 978-0-521-88111-1; 656 pp.

Multimedia Fluid Mechanics

Edited by G. M. Homsy

\$24.99; DVD ROM: 978-0-521-72169-1

2nd
Edition

Ocean Engineering Mechanics

With Applications

Michael E. McCormick

\$125.00; Hb: 978-0-521-85952-3; 550 pp.

The Scramjet Engine

Processes and Characteristics

Corin Segal

Cambridge Aerospace Series

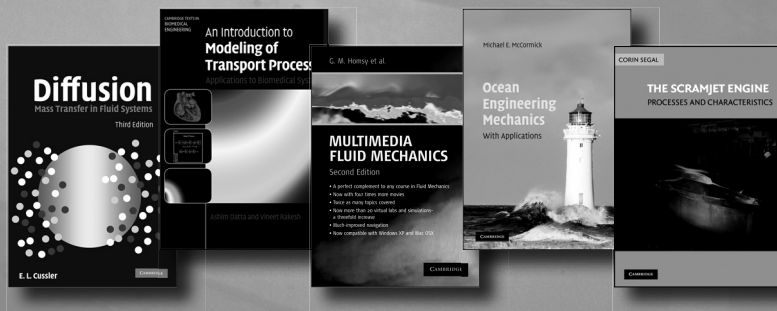

\$125.00; Hb: 978-0-521-83815-3; 272 pp.

Fundamentals of Fluid Power Control

John Watton

\$140.00; Hb: 978-0-521-76250-2; 512 pp.

Prices subject to change.

425 YEARS OF CAMBRIDGE
PRINTING AND PUBLISHING

- 1 Understanding and predicting vortex-induced vibrations
P. W. Bearman
- 5 Prediction of vortex-induced vibration response by employing controlled motion
T. L. Morse & C. H. K. Williamson
- 41 Dynamics of passive scalars and tracers advected by a two-dimensional tripolar vortex
P. J. S. A. Ferreira de Sousa & J. C. F. Pereira
- 61 Direct numerical simulation of vortex synchronization due to small perturbations
S. H. Kim, J. Y. Park, N. Park, J. H. Bae & J. Y. Yoo
- 91 Long's vortex revisited
R. E. Hewitt & P. W. Duck
- 113 Role of the Knudsen layer in determining surface reaction rates based on sticking coefficients
P. Zhang & C. K. Law
- 137 Analysis of low-frequency wave scattering by turbulent premixed flame
J. H. Cho
- 165 Mechanisms for spatial steady three-dimensional disturbance growth in a non-parallel and separating boundary layer
O. Marxen, M. Lang, U. Rist, O. Levin & D. S. Henningson
- 191 Electrohydrodynamic instability in a horizontal fluid layer with electrical conductivity gradient subject to a weak shear flow
M.-H. Chang, A.-C. Ruo & F. Chen
- 217 An experimental investigation of divergent bow waves simulated by a two-dimensional+T technique
M. Shakeri, M. Tavakolinejad & J. H. Duncan
- 245 A family of helically symmetric vortex equilibria
D. Lucas & D. G. Dritschel
- 269 Nonlinear aerodynamic damping of sharp-edged flexible beams oscillating at low Keulegan–Carpenter numbers
R. A. Bidkar, M. Kimber, A. Raman, A. K. Bajaj & S. V. Garimella
- 291 Linear theory of compressible convection in rapidly rotating spherical shells, using the anelastic approximation
C. A. Jones, K. M. Kuzanyan & R. H. Mitchell
- 321 Flame-acoustic resonance initiated by vortical disturbances
X. Wu & C. K. Law
- 359 An experimental investigation of a highly accelerated turbulent boundary layer
C. Bourassa & F. O. Thomas
- 405 Feedback control by low-order modelling of the laminar flow past a bluff body
J. Weller, S. Camarri & A. Iollo
- 419 Origins of radiometric forces on a circular vane with a temperature gradient
N. Selden, C. Ngalande, N. Gimelshein, S. Gimelsein & A. Ketsdever
- 433 Laterally converging duct flows. Part 4. Temporal behaviour in the viscous layer
D. M. McEligot, R. S. Brodkey & H. Eckelmann
- 463 Migration and deformation of bubbles rising in a wall-bounded shear flow at finite Reynolds number
F. Takemura, J. Magnaudet & P. Dimitrakopoulos
- 487 A prediction for the optimal stratification for turbulent mixing
W. Tang, C. P. Caulfield & R. R. Kerswell
- 499 Formation of singularities in Hall magnetohydrodynamics
M. Núñez
- 508 INDEX TO VOLUME 634
