Telegraphic Address:
"VICKERFYTA-KNIGHTS, LONDON."

A British Firm Beats the Germans.

The
Secret.

THE MANAGER-SPEAKER.
After the two totals had swayed from the machine I was faced with a huge number of enquiries for a light. The new engine...
German flying officer... took the seat which the Kaiser had vacated and two other...
...also boarded the plane. With a terrific...
...the two engines were started and like a...
...bird the aeroplane rose in the air. It...
...reared to about 10,000 ft. and the Kaiser...
...read to General Hoppner, saying:
"How is it that at such a height and in so...
...cold a morning the lubricants do not freeze?"
The British have discovered the secret...
...which we have been seeking for months. We...
...found the general. This great discovery is now...
...manufactured. It is not..."

Extract from
"Life in Essen."
Eye-Witness's
Account,
"Daily Mail,"
April 8th, 1918.

UNIVERSAL DRAFTING MACHINES.

When time presses, the Universal Drafting Machine proves its greatest worth. It is a remarkable aid to clearness of thought, accuracy and rapidity of expression. It considerably increases the efficiency of a draftsman owing to its accuracy and easy sensitive motion.

All our draftsmen use them; we could not afford to have our drawings made by the old method.

May we send YOU particulars?

Now Ready! Latest List of B.S.A. Twist Drills.

THE latest catalogue of B.S.A. High-Speed Twist Drills is a book of reference which should be found in every machine shop. It illustrates and describes a complete range of drills of every type and size to meet all requirements, and also contains some valuable information and hints on the use and care of twist drills. The cut-out index enables any part of the list to be easily and quickly found. Everyone interested in twist drills should send at once for a copy.

B.S.A. High-Speed Twist Drills are made with the well-known B.S.A. material, workmanship and finish. Thousands of them are daily employed in the manufacture of B.S.A. Productions, and every drill bearing the B.S.A. name is guaranteed to be of identically the same high quality as those used in the B.S.A. Works.

Aeroplane Models

THE Silver Model of an Aeroplane illustrated shows how technical knowledge and skilled workmanship are allied in the models produced by the Goldsmiths and Silversmiths Company.

Infinite care is taken to ensure every detail being accurate and of proper proportions, and to reproduce an exact replica of the original.

Models can be prepared from the original or from a photograph. Estimates and designs will be submitted free upon application.

The Goldsmiths and Silversmiths Company have no other establishments in Regent Street, Oxford Street, or anywhere else in London, and no branches in the Provinces or Abroad.

“ Done some very good work.”

“ I am pleased to state that the car (Belsize 3 Tonner) is running fine, and has done some very good work this last six months.”

Extract from letter from Motor Driver in A.S.C.

IN producing this series of pictorial testimonials we endeavour to lend the weight of user's opinion to our oft repeated claims.

During the awful weather of last winter the Belsize Three Tonner stood up to the test of war service day after day during the most severe winter for many years.

□ □ □

At present Belsize production has ceased—the whole of our up-to-date plant being devoted to Government service—but the after-war Belsize will still carry out our well-defined policy of strength and reliability.

For many years Engineers who used leather for clutches and brakes have substituted **FERODO FRICTION SURFACES** which are vastly more efficient.

Over twenty years ago we invented Ferodo Fabrics. Since then, by specialising on the one product, and as a result of practical experience, we have so improved them that they are to-day readily acknowledged to be the finest friction surfaces in the world.

They are entirely unaffected by water, oil or acid, and absorb more foot lbs. of energy per square inch than any other material known. Wood and leather linings char and quickly wear out. Ferodo Fabrics are spark-proof and non-inflammable.

Ferodo Fabrics have the name stamped on each foot. Look for it when ordering your new linings.

99%

Ninety-nine per cent of the Magnetos fitted to Rotary Engines for fighting, scouting and observation planes, are of 'M-L' manufacture.

M-L Magnetos are lighter and smaller (yet stronger) than any pre-war magnetos of same electrical capacity. They are of British design and built by British labour in a British-owned factory. They have been supplied in large numbers for work of national importance.

The M-L Magneto, Type A.D.S., is designed for use on rotary or other engines in which the distributor is carried on the engine itself and does not form a part of the magneto. It is fitted with an "H" armature and gives two sparks per revolution.

SIR JOSEPH JONAS, COLVER & Co., LTD.,

Manufacturers of Steel of every description, including
HIGH GRADE NICKEL STEEL and FORGINGS
for Naval and General Marine Purposes.

Special Heat Treated Alloy and other Steels for Aircraft and
Automobile Purposes.

IMPORTANT SPECIALITIES:

- S. S. G.** A SPECIAL NICKEL CHROME GEAR STEEL.
FOR AIR OR OIL HARDENING. When treated this steel has exceedingly tough
properties and is specially suitable for Gear Wheels, Connecting Rods, etc.
- S. G. W.** A NICKEL CHROME STEEL in 4 GRADES.
Eminently suitable and strongly recommended for Gears, Crankshafts, and other highly
stressed parts, and having exceptional machining qualities. Combines unusually heavy
shock-resisting and wearing properties with silent running.
- G. P. S.** A HIGH GRADE ALLOY CASE HARDENING STEEL
for severely strained parts, such as Gear Wheels, Gudgeon Pins, etc.

Continental Steel Works and Novo Steel Works, Sheffield.

SANDERSON BROTHERS
& NEWBOULD, LTD.,

**ATTERCLIFFE FORGE and ROLLING MILLS,

B.L.I.C.

THE BRITISH LIGHTING & IGNITION CO. LTD.

MODERN WARFARE is the supreme test of all mechanism—whatever the circumstances, it must not fail. And under these strenuous conditions the "B.L.I.C." Magneto has fully demonstrated its unrivalled superiority. Built in a British factory by British workmen, it is the most reliable Magneto yet constructed—British or foreign.
