CONTENTS

Preface	ix
PSA 1986 Program	xi
Synopsis	xxi

Part I. PRESIDENTIAL ADDRESS

1. *On Human Nature* 3
David L. Hull, Northwestern University

Part II. BIOLOGY AND MEDICINE

2. *Computerized Implementation of Biomedical Theory Structures: an Artificial Intelligence Approach* 17
Kenneth F. Schaffner, University of Pittsburgh
3. *Generative Entrenchment and Evolution* 33
Jeffrey C. Schank and William C. Wimsatt,
The University of Chicago

Part III. SOCIOBIOLOGY

4. *The Transformation of Human Sociobiology* 63
Philip Kitcher, University of California - San Diego
5. *A Logical Structure for Human Sociobiology* 75
Steven J.C. Gaulin, University of Pittsburgh
6. *Can Sociobiology Adapt to Cultural Selection?* 87
Sandra D. Mitchell, The Ohio State University

Part IV. SCIENCE STUDIES

7. *Consensus and Dissensus in Science* 99
Robert Ackermann, University of Massachusetts
at Amherst
8. *The Elusiveness of Consensus in Science* 106
Steve Fuller, University of Colorado
9. *Consensus and Evolution in Science* 120
Gonzalo Munevar, University of Nebraska at Omaha

CONTENTS (Continued)

10. <i>Ideological "Assumptions" in Physics: Social Determinations of Internal Structures</i> Aristides Baltas, National Technical University - Athens, Greece	130
11. <i>Reflections on Empirical, External and Ideological Studies of Science</i> Noretta Koertge, Indiana University	152
Part V. EXPERIMENTATION	
12. <i>Experiment and the Development of the Theory of Weak Interactions: Fermi's Theory</i> Allan Franklin, University of Colorado	163
13. <i>Arguments for Experimentation in Biology</i> Jane Maienschein, Arizona State University	180
14. <i>Against Correspondence: A Constructivist View of Experiment and the Real</i> Andy Pickering, University of Illinois	196
Part VI. PHYSICS	
15. <i>The Elusive Object of Desire: In Pursuit of the Kinetic Equations and the Second Law</i> Lawrence Sklar, The University of Michigan	209
16. <i>The Problem of Irreversibility</i> John Earman, University of Pittsburgh	226
Part VII. MATHEMATICS	
17. <i>The Absolute Arithmetic and Geometric Continua</i> Philip Ehrlich, Brown University	237
18. <i>Extremality Assumptions in the Foundations of Mathematics</i> Jaakko Hintikka, Florida State University	247
19. <i>What Numbers are Real?</i> Kenneth L. Manders, University of Pittsburgh	253

CONTENTS (Continued)

Part VIII. PROBABILITY

20. *Probability as a Theoretical Concept in Physics* 273
Lorenz Krüger, Philosophisches Seminar der
Universitaet Goettingen
21. *Comment on Lorenz Krüger, "Probability as a
Theoretical Concept in Physics"* 288
John Norton, University of Pittsburgh

Part IX. EPISTEMOLOGY

22. *The Cognitive and Social Sides of Epistemology* 295
Alvin I. Goldman, University of Arizona
23. *Cognition and Epistemic Reliability: Comments on
Goldman* 312
Gary Hatfield, The Johns Hopkins University
24. *Cognitive Models in the Philosophy of Science* 319
Ronald N. Giere, The University of Minnesota
25. *Computational Models in the Philosophy of Science* 329
Paul Thagard, Princeton University
26. *Procedural Representation in Michael Faraday's
Scientific Thought* 336
Ryan D. Tweney, Bowling Green State University

Part X. METHODOLOGY

27. *Methodology's Prospects* 347
Larry Laudan, University of Hawaii at Manoa
28. *Comments on Laudan's "Methodology: Its Prospects"* 355
Philip L. Quinn, University of Notre Dame
29. *From Methodology to Dialectics: A post-Cartesian
Approach to Scientific Rationality* 359
Marcello Pera, University of Pisa
30. *What's Wrong with Quantitative Risk Assessment?* 375
Dale Hattis and John A. Smith, Jr., Massachusetts
Institute of Technology
31. *What's Really Wrong with Quantitative Risk Assessment?* 376
Helen E. Longino, Mills College
