

A new general Regulation on Data Protection, proposed in 2012, is on its way. In the light of these developments, Lexxion Publisher has created a new quarterly: the **European Data Protection Law Review - EDPL**.

EDPL provides a practical and intellectual forum to discuss, comment, and review all issues raised by the development and implementation of data protection law and policy:

- Privacy and data protection,
- Freedom of information, open data, and re-use of information,
- Civil liberties issues,
- Data processing,
- Data transfers,
- Technology issues.

Articles from
Data Protection
Specialists

Reports on
National
Developments

Analyses of
Recent Legislation
and Jurisprudence

The quarterly addresses everyone who is concerned with data protection law issues such as legal practitioners in national and international law firms, government officials, judges, and legal experts in domestic, European, and international courts, consultancies, and data protection professionals in the EU and beyond.

Contributions are welcome! Please contact our Executive Editor Barbara Dallinger at dallinger@lexxion.de.

EJRR

EUROPEAN
JOURNAL OF
RISK
REGULATION 

A JOURNAL AT THE INTERSECTION OF LAW, SCIENCE AND POLICY

Today the most important and widespread form of EU regulation in the internal market is concerned with the government of risk to individuals' health and safety. The European Journal of Risk Regulation (EJRR) provides an innovative forum for informed discussion on how these risks are regulated across policy domains in Europe and beyond. The central focus of the journal is the European Law and Policy regulating *inter alia* product (chemicals, food, pharma), financial, insurance and lifestyle risks (nutrition, alcohol, tobacco) as well as risks emerging from technology and third-party threats such as terrorism. The journal adopts a wide definition of regulation, including also innovative forms such as self-, co-regulation and nudges. Its methods extend to disciplines such as law, sociology, political science, risk analysis, economics as well as psychology and cognitive studies.

EJRR strikes a balance between the interests of the practitioners, notably those increasingly engaged in regulatory drafting and advice to the industry, and a more theoretical focus, combining normative articles with timely contributions on legislative and judicial developments, new literature and relevant events.
