No. 824

AUGUST 1979

REDUCING FUEL CONSUMPTION

CATEGORY 3 LANDINGS

HELICOPTER NOISE

Now ordered
by the
**FEDERAL
GERMAN NAVY**

NAVY LYNX

*the standard frigate helicopter
for NATO navies*

The most advanced helicopter of its class in the world was designed from the start to operate from small ships in the roughest weather.

Navy Lynx superiority means unequalled flight and deck handling characteristics, robust, reliable, compact and minimum maintenance.

The Federal German Navy's decision

to choose the Navy Lynx means that five NATO navies, together with France, Argentina and Brazil have chosen Lynx as their shipborne helicopter.

Cover picture:

British Airways has ordered six
TriStar Dash 500 aircraft, the
'super fuel saver'. The Dash 500
is a long-range version of the
earlier Dash One model. It em-
bodies the most advanced tech-
nological features of any aircraft
in service today. Most important is
the aircraft's direct and beneficial
effect on the efficient use of fuel.
In this issue G. G. Pope of RAE
Farnborough talks about the pros-
pects for reducing fuel consump-
tion in the next generation of civil
aircraft due to enter airline service
in the mid-1990s.
