The only percutaneous device dressing proven to reduce the incidence of **CRBSI and local infections**¹

BIOPATCH Dressing is specifically designed to inhibit bacterial growth around all percutaneous devices, including catheters and orthopedic pins.

Powerful protection... Powerful proof.

- BIOPATCH Dressing provides protection against a broad spectrum of bacteria including resistant strains MRSA and VRE, as well as *Candida albicans*.
- In a controlled, randomized trial, use of BIOPATCH Dressing resulted in a reduction in the incidence of CRBSI and local infections as compared with standard care.¹

INVASIVE FUNGAL INFECTIONS

Early Detection =
Improved Patient Outcomes

Introducing Fungitell™

A New FDA-Cleared Diagnostic Test to Detect Invasive Fungal Infections

- Fungitell detects very low (picogram/mL) levels of (1-3)- β -D-Glucan in serum in one hour (glucan is a component of most medically important fungi including *Candida* and *Aspergillus*)*
- In a recent study, Fungitell positives were observed a **median of 10 days earlier than conventional diagnosis**¹
- Fungitell has demonstrated 100% sensitivity in patients with proven or probable fungal infection. When the test was negative, 100% Negative Predictive Value¹ was observed.
- Fungitell is indicated as an adjunct to diagnosis of IFI, particularly in high risk, immunosuppressed patient populations (e.g. transplant recipients, chemotherapy patients, AIDs patients and others)

CORPORATE HEADQUARTERS

Associates of Cape Cod, Inc.
Falmouth Technology Park
124 Bernard St. Jean Drive
East Falmouth, MA 02536-4445

Tel: (888) 395-2221 or (508) 540-3444
Fax: (508) 540-8680
Email: info@acciusa.com
URL: www.acciusa.com

* Fungitell does not detect certain species of fungus that either do not produce (1,3)- β -D-Glucan or produce very low levels such as *Cryptococcus* and *Zygomycetes*.

¹ Odabasi, et al. (2004) *Clinical Infectious Diseases*. 39:199-205.

Infection Control Coordinator

ELTC/Philadelphia Nursing Home, a 500-bed, JCAHO-

accredited, long-term care facility, seeks a qualified professional to serve as full-time or part-time Infection Control Coordinator. Duties will include surveillance, resident testing and the administration of required immunizations.

Requirements include current Penna. RN license and 1 to 2 years Infection Control experience in acute or long-term care setting. Must be APIC-approved.

www.eltcphn.org

Interested candidates please fax (215) 685-0986, send resume to Carol Wilson, Professional Recruiter, Human Resources Department, 2100 Girard Avenue, Philadelphia, PA 19130 or e-mail: cwilson@eltcphn.org. EOE, M/F/D/V.

SHEA/CDC Training Course in Healthcare Epidemiology

This course provides intensive training for professionals involved in the field of healthcare epidemiology, as well as those concerned with issues related to hospital epidemiology and infection control programs. The Society for Healthcare Epidemiology of America (SHEA) and the Centers for Diseases Control and Prevention (CDC), two of the nation's most prestigious healthcare organizations dedicated to continuous quality improvement in infection control and the application of epidemiology within the healthcare setting, provide the sponsorship for this course.

Join Your Colleagues at This One-Of-A-Kind Program

- ◆ A comprehensive introduction to epidemiologic methods
- ◆ An opportunity to solve "real life" hospital problems using "hands-on" exercises
- ◆ A review of surveillance techniques, including the use of computerized databases
- ◆ Targeted lectures on contemporary issues in healthcare epidemiology and infection control
- ◆ An introduction to quality improvement and safety challenges facing healthcare epidemiologists

Who Should Attend

- ◆ Infectious disease fellows who wish to complete the basic training in infection control and hospital epidemiology required of all infectious disease fellows, and those who wish to pursue active involvement in healthcare epidemiology/infection control
- ◆ Physicians, infection control professionals, nurses, microbiologists, public health officials, and other healthcare providers who are seeking experience in healthcare epidemiology and infection control, and others who have an interest in or responsibility for healthcare epidemiology and infection control

Course Objectives

As a result of attending this course, participants should be able to:

- ◆ Identify the major statistical methods applied to infectious diseases epidemiologic data
- ◆ Use appropriate data acquisition methods to assess validity, interpret statistical tests, and make causal relationships
- ◆ Understand and apply different surveillance techniques and computerization methods
- ◆ Define trends in transmission and control of healthcare-acquired infections and drug resistant-pathogens, as well as other emerging infections in the healthcare setting
- ◆ Discuss quality improvement (QI) methods that impact healthcare epidemiology and safety in the healthcare setting
- ◆ Understand the role of CDC in healthcare epidemiology in the US, including providing national healthcare epidemiology data and assistance in outbreak investigation, and disseminating, implementing, and evaluating evidence-based guidelines for the prevention of healthcare-associated infections and other adverse events

Please see www.shea-online.org/about/she_courses.cfm for registration information.

INFECTIOUS DISEASE

Allegheny General Hospital is recruiting an individual for a full-time position in Infectious Diseases. Primary responsibilities will be in Infection Control and Hospital Epidemiology. Prior experience in this area is preferred. Other responsibilities will encompass inpatient and outpatient consultative infectious disease practice, including HIV medicine at our Ryan White funded HIV/AIDS clinic. A strong commitment to the clinical teaching of medical students and residents is required. Academic rank will be based on qualifications, with a faculty appointment with the Drexel University College of Medicine. Applicants must be board certified or board eligible in Infectious Diseases.

Please send your CV and cover letter to:
Richard P. Shannon, MD, Chairman
Department of Medicine
ALLEGHENY GENERAL HOSPITAL
320 East North Avenue
Pittsburgh, PA, 15212 or
Email to rshannon@wpahs.org

San Antonio, Texas

Infection Control/ Employee Health RN

St. Luke's Baptist Hospital in **San Antonio** has an excellent opportunity for an Infection Control/Employee Health RN (dual position).

This key professional is responsible for overseeing a hospital-wide infection control and employee health program, as well as the hospital's safety program. The selected RN will have recent experience in an acute health care environment. Knowledge of Workers' Compensation regulations and guidelines is preferred. Background in employee health or public health is a plus.

Qualified candidates may call (210) 297-5870; fax (210) 297-0504;
or email: rchavez@baptisthealthsystem.com

www.baptisthealthsystem.com

Submit Manuscripts Online

INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY is pleased to announce it is now processing manuscript submissions via **Rapid Review** – a comprehensive tool to manage manuscripts, reviewers, correspondence and workflow. Submitting manuscripts has never been easier!

Take advantage of these benefits:

- Quicker and easier manuscript submission
- Immediate acknowledgement of submissions
- Authors can check an article status online
- Password-protected site for privacy

To submit your manuscripts online, visit

INFECTION CONTROL AND
HOSPITAL EPIDEMIOLOGY™

You're
on to
SOMETHING
Exceptional
with Norton Healthcare.

You're on to a great career.

Infection Control Nurse

Norton Hospital is seeking an experienced Infection Control Practitioner to coordinate and implement our Infection Control and Surveillance program. Duties include policy development and review, data analysis, outbreak investigation and collaboration on construction projects.

- *BSN required; MSN preferred*
- *Certificate in Infection Control*
- *Minimum 3 years of Clinical Nursing experience*
- *Minimum 2 years of Infection Control experience*
- *Excellent written and oral communication skills*
- *Experience developing and delivering educational programs related to infection control*
- *Training in epidemiology and familiarity with research preferred*

Norton Healthcare, the largest health care system in Kentucky, offers a competitive salary and complete benefits package including a 403(b). And when you're not working you'll enjoy Louisville's vibrant and affordable Midwestern lifestyle, with lots of cultural and recreational alternatives.

For more information,

United We Stand.

At Kendall, we know infection control is a growing concern, but that together, we can make a difference. We know because we work with the health professionals on the front lines of the war against healthcare complications to pioneer better methods of prevention and treatment. That's why we've proudly joined with APIC to sponsor its Mandatory Reporting Consensus Conference and Webcast – an informative presentation all infection control professionals can benefit from.

Exclusive Sponsors of the APIC Webcast on Mandatory Reporting
