CONTENTS

Nutrition

Arroyo, J., Brachet, M., Dubois, J. P., Lavigne, F., Molette, C., Bannelier, C. and Fortun-Lamothe, L.
Effect of incorporating sugar beet pulp in the finisher diet on performance of geese 553

Cloutier, L., Pomar, C., Létourneau Montminy, M. P., Bernier, J. F. and Pomar, J.
Evaluation of a method estimating real-time individual lysine requirements in two lines of growing–finishing pigs 561

Wang, L. S., Shi, Z., Gao, R., Su, B. C., Wang, H., Shi, B. M. and Shan, A. S.
Effects of conjugated linoleic acid or betaine on the growth performance and fatty acid composition in backfat and belly fat of finishing pigs fed dried distillers grains with solubles 569

Lavrenčič, A., Levart, A., Košir, I. J. and Čerenak, A.
In vitro gas production kinetics and short-chain fatty acid production from rumen incubation of diets supplemented with hop cones (*Humulus lupulus* L.) 576

Castro-Carrera, T., Frutos, P., Leroux, C., Chilliard, Y., Hervás, G., Belenguer, A., Bernard, L. and Toral, P. G.
Dietary sunflower oil modulates milk fatty acid composition without major changes in adipose and mammary tissue fatty acid profile or related gene mRNA abundance in sheep 582

Crosse, M., O'Donovan, M., Boland, T. M., Delaby, L., Ganche, E. and Kennedy, E.
Using post-grazing sward height to impose dietary restrictions of varying duration in early lactation: its effects on spring-calving dairy cow production 592

Coppa, M., Farruggia, A., Ravaglia, P., Pomiès, D., Borreani, G., Le Morvan, A. and Ferlay, A.
Frequent moving of grazing dairy cows to new paddocks increases the variability of milk fatty acid composition 604

Physiology and functional biology of systems

Minuti, A., Bani, P., Piccioli-Cappelli, F., Uboldi, O., Bacciu, N. and Trevisi, E.
Metabolic and biochemical changes in plasma of the periparturient rabbit does with different litter size 614

Graugnard, D. E., Samuel, R. S., Xiao, R., Spangler, L. F. and Brennan, K. M.
Intestinal gene expression profiles of piglets benefit from maternal supplementation with a yeast mannan-rich fraction during gestation and lactation 622

Saleri, R., Sabbioni, A., Cavalli, V. and Superchi, P.
Monitoring blood plasma leptin and lactogenic hormones in pregnant sows 629

Borrissier-Pairó, F., Rasmussen, M. K., Ekstrand, B. and Zamaratskaia, G.
Gender-related differences in the formation of skatole metabolites by specific CYP450 in porcine hepatic S9 fractions 635

Mohapatra, S. K., Singh, S., Kumar, S., Dang, A. K., Datta, T. K., Das, S. K., Mohanty, T. K., Kaushik, J. K. and Mohanty, A. K.
Comparative expression profiling of insulin-like growth factor binding protein-5 in milk of *Bos indicus* and *Bubalus bubalis* during lactation 643

Hudson, N. J., Reverter, A., Greenwood, P. L., Guo, B., Cafe, L. M. and Dalrymple, B. P.
Longitudinal muscle gene expression patterns associated with differential intramuscular fat in cattle 650

Behaviour, welfare and health

Baillie, C. L. and O'Connell, N. E.
The influence of providing perches and string on activity levels, fearfulness and leg health in commercial broiler chickens 660

Wülbers-Mindermann, M., Berg, C., Illmann, G., Baulain, U. and Algers, B.
The effect of farrowing environment and previous experience on the maternal behaviour of sows in indoor pens and outdoor huts 669

Herskin, M. S., Thodberg, K. and Jensen, H. E.
Effects of tail docking and docking length on neuroanatomical changes in healed tail tips of pigs 677

Hirata, M., Matsumoto, Y., Izumi, S., Soga, Y., Hirota, F. and Tobisa, M.
Seasonal and interannual variations in feeding station behavior of cattle: effects of sward and meteorological conditions 682

Clark, C. E. F., Lyons, N. A., Millapan, L., Talukder, S., Cronin, G. M., Kerrisk, K. L. and Garcia, S. C.
Rumination and activity levels as predictors of calving for dairy cows 691

Product quality, human health and well-being

Świątkiewicz, S., Świątkiewicz, M., Arczewska-Włosek, A. and Józefiak, D.
The use of genetic engineering techniques to improve the lipid composition in meat, milk and fish products: a review (review) 696

Rocha, L. M., Dionne, A., Saucier, L., Nannoni, E. and Faucitano, L.
Hand-held lactate analyzer as a tool for the real-time measurement of physical fatigue before slaughter and pork quality prediction 707

Gravador, R. S., Serra, A., Luciano, G., Pennisi, P., Vasta, V., Mele, M., Pauselli, M. and Priolo, A.
Volatiles in raw and cooked meat from lambs fed olive cake and linseed 715

Messina, V., Sancho, A., Grigioni, G., Fillipini, S., Pazos, A., Paschetta, F., Chamorro, V. and Walsøe de Reca, N.
Evaluation of different bovine muscles to be applied in freeze-drying for instant meal. Study of physicochemical and senescence parameters 723

Mudalal, S., Lorenzi, M., Soglia, F., Cavani, C. and Petracci, M.
Implications of white striping and wooden breast abnormalities on quality traits of raw and marinated chicken meat 728
