PROCEEDINGS
OF
THE ROYAL SOCIETY
OF EDINBURGH

Section B (Biology)

VOL. LXVII

1957-1960

PUBLISHED BY THE
ROYAL SOCIETY OF EDINBURGH
22 GEORGE STREET
EDINBURGH 2

1961

CONTENTS

NO.	PAGE
<p>*1. Nigrosin-Eosin Staining of Rabbit Spermatozoa and the Fertility of Semen. By R. A. Beatty, Agricultural Research Council Staff, Institute of Animal Genetics, Edinburgh. <i>Communicated by</i> Professor C. H. Waddington, F.R.S. Issued separately December 27, 1957,</p>	1
<p>*2. The Circulatory System of the Crustacean Euphausiid, <i>Meganyctiphanes norvegica</i> (M. Sars). By John Mauchline, The Marine Station, Millport, Isle of Cumbrae, and Department of Zoology, Glasgow University. <i>Communicated by</i> Professor C. M. Yonge, F.R.S. (With Five Text-figures.) Issued separately June 14, 1958,</p>	32
<p>3. A Gravity Survey of a Glacier-dammed Lake in North Greenland. By C. Bull, B.Sc., Ph.D. <i>Communicated by</i> R. A. Hamilton, O.B.E., M.A. (With Four Text-figures.) Issued separately December 3, 1958,</p>	42
<p>4. The Effects of Triethylenemelamine on the Fertility of Male Mice. By B. M. Cattanach and R. G. Edwards, Institute of Animal Genetics, West Mains Road, Edinburgh, 9. <i>Communicated by</i> Dr C. Auerbach, F.R.S. (With Two Text-figures.) Issued separately December 3, 1958,</p>	54
<p>5. Investigations into the Distribution of Thiol Groups in the Skin Follicles of Mice and Sheep and the Entry of Labelled Sulphur Compounds. By M. L. Ryder, M.Sc., Ph.D., Biology Department, Wool Industries Research Association, Leeds. <i>Communicated by</i> Dr L. Auber. (With Two Plates and Two Text-figures.) Issued separately December 19, 1958,</p>	65
<p>*6. Maturation and Fertilization in Two Digenetic Trematodes, <i>Haplometra cylindracea</i> (Zeder 1800) and <i>Fasciola hepatica</i> (L). By Ann R. Sanderson, Department of Natural History, Queen's College, University of St Andrews. <i>Communicated by</i> Professor A. D. Peacock. (With Six Plates and Four Text-figures.) Issued separately November 12, 1959,</p>	83
<p>7. Assemblages of Small Spores from the Lower Oil-shale Group of Scotland. By L. G. Love, B.Sc., Ph.D., F.G.S., Department of Geology, University of Sheffield. <i>Communicated by</i> Professor T. Neville George. (With Two Plates and Fifteen Text-figures.) Issued separately May 4, 1960,</p>	99
<p>*8. Humoral Control of Metamorphosis and Diapause in the Larvæ of Certain Calliphoridae (<i>Diptera: Cyclorrhapha</i>). By Alastair Fraser, Department of Zoology, University of Glasgow. <i>Communicated by</i> Dr Alexander R. Hill. (With Two Text-figures and Two Tables.) Issued separately May 9, 1960,</p>	127
<p>*9. The Biology of the Euphausiid Crustacean, <i>Meganyctiphanes norvegica</i> (M. Sars). By J. Mauchline, The Marine Station, Millport and Department of Zoology, University of Glasgow. <i>Communicated by</i> Professor C. M. Yonge, C.B.E., F.R.S. (With Eighteen Text-figures.) Issued separately May 16, 1960,</p>	141

NO.	PAGE
*10. A Taxonomic Review of the British Species of <i>Culicoides</i> Latreille (Diptera, Ceratopogonidæ). By J. Allan Campbell, B.A., Ph.D., M.R.C.V.S., F.R.E.S., and E. C. Pelham-Clinton, B.A., F.R.E.S., Animal Diseases Research Association, Moredun Institute, Gilmerton, Edinburgh. <i>Communicated by</i> Dr J. T. Stamp. (With Two Hundred and Ninety-one Text-figures and Ten Tables.) Issued August 15, 1960,	181
*11. Further Observations on the Liver Clearance of Bromosulphthalein in the Fowl and its Relation to Œstrogen-Androgen Balance. By J. G. Campbell, British Empire Cancer Campaign Unit, Poultry Research Centre, Edinburgh, 9. (With Three Text-figures and Six Tables.) Issued separately September 12, 1960,	303
*12. The Metabolism of Sodium Bromosulphthalein in the Fowl. By J. G. Campbell, British Empire Cancer Campaign Unit, Poultry Research Centre, Edinburgh, 9. (With One Text-figure and Four Tables.) Issued separately September 14, 1960,	319
*13. The Cytology of a Diploid Bisexual Spider Beetle, <i>Ptinus clavipes</i> Panzer and its Triploid Gynogenetic form <i>mobilis</i> Moore. By Ann R. Sanderson, Department of Natural History, Queen's College, University of St Andrews. <i>Communicated by</i> Professor A. D. Peacock. (With Four Plates.) Issued separately September 16, 1960,	333
*14. New Records of Polychætes from Scottish Coastal and Offshore Waters. By A. D. McIntyre, Department of Agriculture and Fisheries for Scotland Marine Laboratory, Aberdeen. <i>Communicated by</i> Dr C. E. Lucas. (With One Text-figure.) Issued separately January 25, 1961,	351
*15. Observations on the Life Cycle and Immature Stages of <i>Culicoides circumscriptus</i> Kieff. (Diptera, Ceratopogonidæ). By P. Becker, B.Sc., Ph.D., F.R.E.S., Zoology Department, University of Glasgow. <i>Communicated by</i> Dr A. R. Hill. (With Two Plates, Two Text-figures and Three Tables.) Issued separately March 22, 1961,	363

* The thanks of the Society are due to the Carnegie Trust for the Universities of Scotland for grants towards the costs of the illustrations, tables, etc. in these papers.

INSTRUCTIONS TO AUTHORS (*continued*)

The overall space available for figures and plates is $9\frac{1}{2}'' \times 7\frac{1}{2}''$ in *Transactions* and $7\frac{1}{2}'' \times 4\frac{3}{4}''$ in *Proceedings*.

Photographs should be unmounted glossy black and white prints, marked on the back with the name of the author, number of the figure, and an indication of the top. Prints should not be trimmed or cut out. Authors should suggest the arrangement of the figures on each plate, either by a diagram or a paste-up of rough prints, with indication of any lettering to be inserted.

Lettering must be in black ink in neat and legible style, or lightly written in pencil.

Indicating Lines and Arrows required on wash drawings or photographs should have the point marked by a pin-hole, and must be drawn on the back or on a covering tissue and not on the photograph or drawing. On line drawings such lines should be drawn thin but firmly.

Graphs should be drawn on white Bristol board or on squared paper ruled in faint blue lines: no other colour ruling is suitable. Since blue lines do not appear in reproductions, any cross-lines required must be drawn. If a tracing of a graph constructed on an unsuitable grid is submitted, white tracing paper should be used.

Numerical values. In papers concerned with the biological sciences ALL numerical values must be accompanied by their decimal equivalents.

Tables. Tabular matter must be kept to a minimum. No paper should present both tables and corresponding graphs, except where good reason can be given.

Duplicates. When the author can conveniently do so, it is desirable that duplicates of illustrations should be supplied for the use of the referees.

Proofs of papers will be sent to authors or communicators to the addresses indicated in correspondence or on MSS. The cost of authors' corrections in excess of 5 per cent of the printer's charges for the setting of a particular paper will be charged to the authors. Proofs should, if possible, be returned within one week to *The Secretary, Royal Society of Edinburgh, 22 George Street, Edinburgh, 2*, and not to the printer. To prevent delay, authors who are abroad should, if possible, appoint someone in this country to correct proofs.

Offprints. As soon as a *Transactions* paper, or the sheet in which the last part of a *Proceedings* paper appears, is ready for press, copies of offprints, in covers bearing the title of the paper and the name of the author, are printed and placed on sale. The date of such separate publication is printed on each paper. Authors of papers will receive twenty-five offprints free, if they so desire. Additional offprints may be obtained at a fixed scale of prices given on a form attached to the first proof. To prevent disappointment, especially if a paper contains plates, authors should, as soon as possible, notify the Secretary of the number of additional copies required.

Indexes. To facilitate the compilation of indexes, and to secure due attention being given to the important points of a paper in Catalogues of Scientific Literature, authors are requested to supply to the Secretary, with the final proofs of papers, a brief index (on the model given below) of the points in a paper which are considered new or important. Indexes will be edited by the Secretary for publication in each volume of the *Transactions* and *Proceedings*.

MODEL INDEX

Houstoun, R. A.—A measurement of the velocity of light. *Proc. Roy. Soc. Edin.*, A, 63, 1949–50, 95–104.

Light, A measurement of the velocity of.

R. A. Houstoun. *Proc. Roy. Soc. Edin.*, A, 63, 1949–50, 95–104.

Velocity of Light, A measurement of the.

R. A. Houstoun. *Proc. Roy. Soc. Edin.*, A, 63, 1949–50, 95–104.

Authors are advised, before sending in papers, to consult *Notes on the Preparation of Papers to be communicated to the Royal Society of London* (1951), and especially the chapters dealing with symbols, signs, and abbreviations recommended for British Scientific Publications. A copy may be had on application to the Secretary.

- XV. Observations on the Life Cycle and Immature Stages of *Culicoides circumscriptus* Kieff. (Diptera, Ceratopogonidæ). By P. BECKER, B.Sc., Ph.D., F.R.E.S., Zoology Department, University of Glasgow. *Communicated by Dr A. R. HILL.* (With Two Plates, Two Text-figures and Three Tables) 363
(Issued separately March 22 1961)

Title, Contents, and Index to Volume

The papers published in this part of the PROCEEDINGS may be purchased separately at the following Prices:

No. XI	Price 4s. od.	No. XIV	Price 4s. od.
No. XII	„ 4s. od.	No. XV	„ 7s. od.
No. XIII	„ 5s. 6d.		

Fellows of the Society purchasing publications for their own use will be allowed a special discount of 33½ per cent on the stated prices (see Law XVI).
