

VOL. VII.—1893.

THE JOURNAL  
OF  
LARYNGOLOGY,  
RHINOLOGY, AND OTOTOLOGY;

*AN ANALYTICAL RECORD OF CURRENT LITERATURE RELATING TO  
THE THROAT, NOSE, AND EAR.*

EDITED BY

R. NORRIS WOLFENDEN, M.D. Cantab.,  
JOHN MACINTYRE, M.B. Glasgow,

AND

DUNDAS GRANT, M.A., M.D., F.R.C.S. Eng.,

WITH THE ASSISTANCE OF

Dr. BARCLAY J. BARON (Bristol).      Dr. SANDFORD (Cork).

And with the co-operation of

DR. RICARDO BOTEY (BARCELONA)  
DR. BRYSON DELAVAN (NEW YORK)  
DR. DRAISPUL (ST. PETERSBURG)  
PROF. GUYE (AMSTERDAM)  
DR. MIDDLEMASS HUNT (LIVERPOOL)  
DR. VALERIUS IDELSON (BERNE)  
DR. JOAL (PARIS)  
DR. KARWOWSKI (WARSAW)  
DR. JOHN N. MACKENZIE (BALTIMORE)  
DR. GRAZZI (FLORENCE)  
DR. SANDFORD (CORK)  
DR. LUBET-BARBON (PARIS)

DR. G. W. MAJOR (MONTREAL)  
PROF. MASSEI (NAPLES)  
DR. W. ROBERTSON (NEWCASTLE-ON-TYNE)  
DR. J. MICHAEL (HAMBURG)  
DR. HOLGER MYGIND (COPENHAGEN)  
DR. PORTER (ST. LOUIS)  
DR. SAJOUS (PHILADELPHIA)  
DR. SENDZIAK (WARSAW)  
PROF. RAMON DE LA SOTA (SEVILLE)  
DR. HICGUET (BRUSSELS)  
DR. MILLIGAN (MANCHESTER)  
DR. LICHTWITZ (BORDEAUX)

**Published Monthly.**

LONDON:  
F. J. REBMAN,  
Albion Chambers, 11, Adam Street, Strand.

PHILADELPHIA, PA.:  
THE F. A. DAVIS COMPANY,  
1914-16, Cherry Street.

ENTERED AT STATIONERS' HALL.

# CONTENTS.

**Original Article.**—A Portion of Beef Bone lodged in the Larynx. By Sir P. C. SMYLY. Pages 163 to 165.

**Annotations.**—Malignant Transformation of Innocent Growths. Page 165.  
 The International Congress of Rome. " 165.  
 The French Society of Laryngology, etc. " 166.  
 The Pan-American Congress. " 166.  
 Dr. Hunter Mackenzie. " 166.

**The British Laryngological and Rhinological Association Meeting—**  
 Case of Lupus of the Palate, Tongue, Larynx, and Nose. Mr. LENNOX BROWNE. Page 167.  
 Case of Laryngeal Stenosis in a Boy of Fourteen. Dr. WHISTLER " 170.  
 Notes on Reflexes. Dr. WOAKES. " 170.  
 Case of Papilloma; Pathological Specimen from Inferior Turbinal. Dr. SANDFORD. " 172.  
 Fracture of the Thyroid Cartilage by Direct Violence. Dr. SANDFORD. " 174.  
 Case of Pharyngo-Mycosis. Dr. GRANT and Mr. WINGRAVE. " 174.  
 Case of Naso-Pharyngeal Growth. Dr. ROBERTSON. " 175.  
 The Morbid Anatomy of Hypertrophic and Atrophic Turbinal Disease. Mr. WINGRAVE. " 176.

**Diphtheria.**—Croup of the Nose, *Senziaik*—Diphtheria in Belgium, *Godart, Gallez, Bairy*—  
 Post-Scarlatinal Diphtheria, *Sweeting*—Diphtheritic Paralysis with temporary absolute Deafness, *Tooth*  
 —Diagnosis and Treatment of Diphtheria, *Aitken*. Pages 183 to 185.

**Nose, Naso-Pharynx, &c.**—Improved Ecraseur, *Wilkin*—Transillumination of the Antrum, *Johnstone*—  
 Massage of the Mucous Membrane. *Johnstone*—Etiology of Atrophic Rhinitis, *McClure*—  
 Headache in Diseases of the Nose and Pharynx, *Johnson*—Rhinitis, *Ferris*—Conservative Treatment  
 of Nasal Affections, *Jeffery*—Tuberculosis of the Nose, *Heryng*—Inflammation of Nasal Affections upon  
 the Respiratory Apparatus, *Chabory*—Post-Nasal Growths in Children, *Owen*. Pages 185 to 191.

**Pharynx.**—Tincture of Iodine in Diseases of the Nose and Throat, *Wroblewski*—Affections of the  
 Lingual Tonsil, *Boulangier*—Angina Follicularis in Children, *Wolberg*—Calculus of Tonsil, *Lecocq*—  
 Hypertrophy of Tonsils, *Heryng*—Angina Ulcerosa Benigna, *Senziaik*—Second Case of, *Senziaik*  
 —Papillomata of Palate and Uvula, *Wagner*—Tuberculosis of Pharynx, *Heryng*—Diverticulum of  
 Esophagus, *Mintz*. Pages 192 to 194.

**Larynx.**—Treatment of Stuttering, *Gutzmann, Olluszewski*—Innervation of the Crico-thyroid  
 Muscle, *Katzenstein*—Study of Laryngeal Paralysis, *Semon*—Pachydermia Laryngis, *McBride*—  
 Adenoma of Larynx, *Lublimer*—Flies as Foreign Bodies in the Trachea, *Pfänger*—Symptoms attributed  
 to Dislocation of the Neck, *Thorburn*. Pages 194 to 197.

**Thyroid Gland, &c.**—Tremor of the Limbs in Basedow's Disease, *Rosenblatt*—Abscess of the  
 Thyms Gland, *Westmatt*. Page 197.

**Ear.**—New Form of Osteo-Tympanal Acoumeter, *Conrad*—Method of Inflating the Tympanum,  
*Low*—Anatomical Specimens, *Brunner*—Microscopic Examination of the Ear—Edema, *Harris*—Clinical  
 Evidences of Affections of the Auditory Nerve, *Johnson*—Nerve Deafness and Pilocarpin,  
*Baber*—Monauricular Diplacusis, *Johnson*—Influenza, *Kosegarten*—Suppurative  
 Otitis and Staphylococci, *X*—Severe Otitis, *Johnson*—Percussion of the Ear after Intra-nasal, etc.,  
 Mastoid, and Diabetic Caries, *Koerner and Wild*—Inflammations of the Ear after Intra-nasal, etc.,  
 Operations, *Bresgen*—Otitis Media following Amputation of the Uvula, *Braistlin*—Extension of Diseases  
 of the Tympanum into Cranial Cavity, *Koerner*—Case of Intra-cranial Abscess, *Jones*. Pages 198 to 204.

**Association Meeting.**—Parisian Society of Laryngology, Rhinology, &c.—*The Phonetic Role of  
 the Trachea*, by Dr. Moura. Pages 204 to 207.

**Reviews.**—*Sallard*, Acute Inflammations of the Tonsils—*Bourges*, Diphtheria—*Luc*, Laryngeal  
 Neuroses. Pages 208 to 210.

**New Preparations.**—*Kutnow, Bullock, Burroughs and Wellcome, Allen and Hanburys*.  
Pages 210 to 212.

# THE KEPLER SOLUTION

OF

## COD LIVER OIL.

TO overcome the repugnance, natural to so many people and especially to invalids, to the odour and taste of that invaluable medicinal agent—Cod Liver Oil—pharmacists for years tried every dodge and process in a vain endeavour to produce something palatable. The problem was as far off as ever from a satisfactory ending until the Kepler Solution of Cod Liver Oil in Extract of Malt appeared, and the value of the discovery cannot be more forcibly put than in the words of the *BRITISH MEDICAL JOURNAL* at that time:—The Kepler Solution is a great advance on anything hitherto attempted in this direction. . . . . The production of a Solution of Cod Liver Oil in Malt is a great advance and marks an epoch in the history of rational therapeutics.” In the Kepler Solution the taste and smell of the oil are completely masked, so that it is cheerfully taken and even relished by the most delicate patient. The value of Cod Liver oil in therapeutics depends exactly upon the percentage of it assimilated, which accounts for the superiority of this Solution over all forms of emulsion; because in the Kepler Solution the association between the oil and the Malt Extract is more intimate, the oil is more finely divided, so that,

apart from the digestive power which the Malt Extract itself will exert in the process of digestion, it is in the most favourable condition for effective digestion. This explains to some extent the important service the Kepler Solution has rendered in the treatment of Phthisis, and all those diseases wherein a rapid tissue metamorphosis has to be combated and the patient has to be maintained on the most nutritious food-material to balance the waste. The result of clinical experience, to an extent never before experienced in connection with any similar preparation, clearly shows the superiority of the Kepler Solution over its imitations. It is always palatable, is comfortably taken by those who cannot take Cod Liver Oil in any other form, is easily digested and does not cause those unpleasant eructations so common after the administration of plain oil and many emulsions. In fact, the Kepler Solution is “an ideal form for the administration of fat,” and the only preparation which may be comfortably taken all the year round.

*Kepler Solution of Cod Liver Oil is supplied to the Medical Profession in ¾-lb. and 1½-lb. bottles at 1s. 8d. and 3s. each. Retail 2s. 6d. and 4s.*

Samples sent to Medical Men free on request.
