## ACTS OF WORSHIP

Seven Stories

by Yukio Mishima • Translated by John Bester

Winner of the first Noma Prize for the translation of Japanese literature.

The flamboyance of Mishima's life and the fanaticism of his death have dominated the public's memory of him. Now, twenty years later, this collection of stories, which spans his entire career, is a timely reminder that Mishima was, above all, a consummate writer whose work is an irreplaceable part of world literature.

"Recommended for all collections of Japanese literature."—*Choice*

## SUN AND STEEL

by Yukio Mishima • Translated by John Bester

Part autobiography, part reflections on the search for personal identity and self-integration, *SUN AND STEEL* describes the tortuous path Mishima took from his introverted childhood to creative maturity as acclaimed novelist and playwright, accomplished swordsman, and self-proclaimed conscience of post-war Japan.

"One of the twentieth century's outstanding statements of literary and personal purpose."—*Library Journal*

twentieth-century Japanese literature!*

A Cat, a Man,  
and Two Women

## A CAT, A MAN AND TWO WOMEN

by Jun'ichiro Tanizaki • Translated by Paul McCarthy

A humorous collection of stories—a novella and two shorter pieces—distinguished by comic realism and variations on the author's favorite theme: dominance and submission in private relationships.

"Tanizaki's literature is, above all, delicious like French or Chinese cuisine."—*Yukio Mishima*

"A major literary figure...so widely read in his own country and so acclaimed by critics to have seemed a likely candidate for the Nobel Prize."—*The New York Times*

# BREAD AND THE BALLOT

---

The United States and India's Economic Development, 1947–1963  
by Dennis Merrill

Dennis Merrill examines the origins and implementation of U.S. economic assistance programs in India from independence in 1947 to the height of John F. Kennedy's "development decade" in 1963.

By the early 1960s, India had become one of the Third World's leading recipients of American economic assistance. Yet, as Merrill demonstrates, India remained dedicated to a non-aligned status, and Prime Minister Jawaharlal Nehru's frequent criticism of U.S. foreign policy tried the patience of Cold War strategists. Even in the area of economic policy, the two nations differed on a wide variety of developmental issues. Thus, argues Merrill, the Indian case offers a keen vantage point from which to explore modern American foreign policy and the complexities of the foreign aid process.

## Behind the Bamboo Hedge

The Impact of Homeland Politics in the Parisian Vietnamese Community

*Behind the Bamboo Hedge* is a study of Vietnamese political organizations in Paris, their competition for power in the Vietnamese community, their alliances with French political parties, and their attempts to influence French foreign policy toward Vietnam.

"Nobody else has had the ability to penetrate rival political networks, while keeping sufficient distance from them to write a balanced account of the subject. This is an original and unusual piece of research. It demonstrates quite effectively that politics, often ignored in refugee studies, is a major factor affecting refugee adjustment." —James M. # Forgotten Traditions of Ancient Chinese Medicine

A Chinese View from the Eighteenth Century

The *I-hsüeh Yüan Liu Lun* of 1757 by Hsü Ta-Ch'un

*Translated and Annotated by Paul U. Unschuld*

Hsü Ta-ch'un was an outstanding Chinese intellectual, physician-scholar and medical writer. In the *I-hsüeh Yüan Liu Lun* we encounter him as a highly educated representative — one to date virtually unknown in the West — not only of traditional Chinese medicine but also of the upper echelons of Chinese culture. Hsü Ta-ch'un speaks to his readers, now as in the eighteenth century, in easily understandable language. Translated and edited into a Western language for the first time, and published with the original Chinese text, his one hundred short essays on the essentials of medicine are without known parallel in the history of Chinese medicine. The *I-hsüeh Yüan Liu Lun* provides a unique opportunity to appreciate the ideas of a Chinese physician living more than two centuries ago, and allows us to better penetrate the contents and history of traditional Chinese medicine prior to the impact of Western civilization.

# Readings in History

## China Memoirs

Owen Lattimore

Compiled by Fujiko Isono

Owen Lattimore (1900-1989), eminent scholar of Mongol studies, was an inside observer of many of the tumultuous events that marked China's history in the first half of this century. His reminiscences take us on his journeys as a young trader to the remote frontier regions of China, to his years in Chungking as political adviser to Chiang Kai-shek, and to his encounters with the Communist and Kuomintang leaders during the days of their United Front against Japanese aggression. Readers interested in the history of modern China and in Lattimore the person will find this candid autobiographical account most intriguing. 248 pp. ¥4,500/\$34.50

## Tokugawa Japan

### The Social and Economic Antecedents of Modern Japan

Edited by Chie Nakane, University of Tokyo, and

Shinzaburō Ōishi, Gakushuin University

Translation edited by Conrad Totman, Yale University

The foundations of modern industrial Japan lie to a great extent in the government and society that preceded it: the two and a half centuries ruled by the Tokugawa shogunate. In this volume, nine Japanese scholars focus on a variety of aspects of the Tokugawa period: the political system, rural society, commerce and the economy, the growth of cities, the transportation and communications network, and ukiyo-e and kabuki. Translated for a foreign audience, this volume offers a fascinating account of how Japan was run and what life was like in Tokugawa times. 248 pp. ¥4,800/\$37.50

## Education and Examination in Modern Japan

Ikuo Amano, University of Tokyo

Foreword by Ronald P. Dore

A specialist in the sociology of education describes the rise of Japan's "examination culture" during the nation's first half-century of modernization. The author also discusses the role of education in Japan's development and traces the origins of today's "examination hell"—the extreme pressure under which young people are placed as they grow up in a society in which examinations are the gateway to professional and social advancement. 256 pp. ¥5,400/\$39.50

## China's Crisis, China's Hope

Liu Binyan

Foreword by  
Merle Goldman

Liu Binyan, China's preeminent intellectual, a renowned writer and journalist, offers a compelling portrait of his native country. Having endured decades of hard labor and eventually expulsion from the Communist Party (at which point he was allowed to travel to America), Liu is in a unique position to provide insight into the complex economic, political, and social issues that led to the Tiananmen Square uprising in spring 1989.

"Liu Binyan offers an almost unique perspective on contemporary China. He has been a prominent player in that country's tumultuous political-social-literary history ever since the mid-1950s. His long experience as an investigative reporter...has afforded him a grasp of the details of Chinese social history that few can approach." —Perry Link,

## Soulstealers

The Chinese Sorcery  
Scare of 1768  
Philip A. Kuhn

Midway through the reign of the Ch'ien-lung emperor, Hungli, mass hysteria broke out among the common people. It was feared that sorcerers were roaming the land, clipping off the ends of men's queues (the braids worn by royal decree), and chanting magical incantations over them in order to steal the souls of their owners. In a fascinating chronicle of this epidemic of fear and the official prosecution of soulstealers that ensued, Philip Kuhn provides an intimate glimpse into the complex world of eighteenth-century China. His exploration of the sorcery cases reveals hidden meaning in the politics and administration of eighteenth-century China.

### **Korea, 1950–1957**

Covering from the outbreak of the Korean War to the beginnings of South Korea's rebuilding, these files trace the development of American objectives throughout the war and subsequent armistice negotiations.

## PURPOSE AND ORGANIZATION

The Association for Asian Studies is a scholarly, non-political, and non-profit professional association open to all persons interested in Asia and the study of Asia. It seeks through publications, meetings, and seminars to facilitate contact and exchange of information among scholars and to increase understanding of Asia. The Association for Asian Studies is the largest society of its kind in the world. Its 7,000 members include scholars, teachers, business people, diplomats, journalists, and interested laypersons.

Founded in 1941 as the Far Eastern Association, the organization was renamed the Association for Asian Studies in 1957 to reflect the wider geographic interests of its membership. In 1970, four elective area Councils—South Asia, Southeast Asia, China and Inner Asia, and Northeast Asia—were established to guarantee each area constituency its own representation and a proportionate voice on the Board of Directors. In 1977, a Council of Conferences was established as a liaison with eight regional conferences throughout the United States to serve the needs of those interested in Asian studies in different parts of the country. The Association is a member of the American Council of Learned Societies and the National Council of Area Studies Associations, actively participating with its sister societies in a wide range of activities, including joint participation in research and informational exchanges.

Publications of the Association include *The Journal of Asian Studies*, the *Bibliography of Asian Studies*, *Doctoral Dissertations on Asia*, the *Asian Studies Newsletter*, the *Monograph Series*, and committee publications. The Association holds a three-day meeting each spring devoted to planned programs of scholarly papers, round table discussions and panel sessions on a wide range of problems in research and teaching, and on Asian affairs in general. From time to time, it sponsors, through its committees, special conferences on research problems and other matters of topical interest.

## Culture and Identity Japanese Intellectuals during the Interwar Years

*Edited by J. Thomas Rimer*

This collection of essays represents the first attempt in the U.S. to examine systematically the nature and development of modern Japanese self-consciousness as expressed through culture. The essays reveal eloquently the extent to which important aspects of Japanese intellectual life in the early twentieth century were inspired by European models of cultural criticism, ranging from Kant and Hegel to Nietzsche, Marx, Durkheim, and Bergson.

**"This fascinating volume suggests the ways in which cultural criticism in interwar Japan was creative and subversive at the same time—an expression, in Japan as in Europe, of the light and shadows that played over those hopeful, terrible decades."**

—Carol Gluck, *Columbia University*

## Governing the Market

Economic Theory and the Role of Government in East Asian Industrialization

*Robert Wade*

Why have not just Japan, but also Taiwan and South Korea, been so successful in economic development? Focusing on Taiwan but with comparisons to Korea, Japan, and Hong Kong, the author traces the government's role in different industries over time, including policies of industrial promotion, organization of the economic bureaucracy, and the political calculations behind the policies. The final chapter presents ten unorthodox lessons from East Asian experience that might inform strategies of economic and political development strategy elsewhere.

**"Robert Wade is one of the few interdisciplinary scholars seriously studying the industrial policies of the high-growth East Asian economies. . . . *Governing the Market* is a major contribution to the social science of the future."**
