Borgring: the discovery of a Viking Age ring fortress— ERRATUM

Helen Goodchild, Nanna Holm & Søren M. Sindbæk

Published by Cambridge University Press, 8 August 2017

During production, an error was introduced. On page 1039, it states:

- Sample AAR-21258 (elm) was measured with a 14C age of 1082±25 years.
This corresponds to a calibrated calendar age between 895–1017 BC (95% probability; dates calibrated in OxCal v4.2.3 using the IntCal13 curve; Bronk Ramsey 2009; Reimer *et al.* 2013).
- Sample AAR-21259 (oak) was measured with a 14C age of 1091±25 years.
This corresponds to a calibrated calendar age between 893–1012 BC (95% probability).

BC is incorrect, as this should say AD. The corrected text can be found below:

- Sample AAR-21258 (elm) was measured with a 14C age of 1082±25 years.
This corresponds to a calibrated calendar age between 895–1017 AD (95% probability; dates calibrated in OxCal v4.2.3 using the IntCal13 curve; Bronk Ramsey 2009; Reimer *et al.* 2013).
- Sample AAR-21259 (oak) was measured with a 14C age of 1091±25 years.
This corresponds to a calibrated calendar age between 893–1012 AD (95% probability).
