

Second Edition, 8vo, cloth, 15s.,

A MANUAL OF PSYCHOLOGICAL MEDICINE ;
containing the History, Nosology, Description, Statistics, Diagnosis, Pathology,
and Treatment of Insanity. With an Appendix of Cases. By J. C. BUCKNILL, M.D.,
F.R.S., and DANIEL H. TUKE, M.D.

OPINIONS OF THE PRESS.

"Il se distingue par un sens eminentement pratique, des faits bien observés, de bonnes critiques et de saines appréciations."—*Des Hallucinations*, by BRIERE DE BOISMONT.

"Certainly the best work on Psychological Medicine lately written in Europe."—*Essay on Moral Insanity*, by Dr. PARIGOT, late Commissioner in Lunacy, Belgium.

"The most comprehensive and practical English work upon insanity now extant."—*Medico-Chirurgical Review*.

"We are quite free to boldly state that we know of no book which so fully embraces everything connected with the insane."—*Dublin Quarterly Review*.

"We would commend Drs. Bucknill and Tuke's Manual alike to the skilled psychologist and to the general practitioner."—*Edinburgh Medical Journal*.

"We can confidently recommend this work to our readers as one of the best treatises on the subject in the English language. Throughout it bears the evidence of much careful study and accurate observation, which cannot fail to obtain for its authors an increased reputation."—*Psychological Journal*.

"The Manual supplies a want which has long been felt, and it will no doubt be long regarded as a standard work on Psychological Medicine."—*Medical Times and Gazette*.

"The whole work is marked by completeness and ability of no common order. . . . It will no doubt enjoy a very wide circulation, and this most deservedly. We strongly recommend its careful study, not only by the specialist, but by the profession generally."—*Lancet*.

"Better men than the authors who have associated themselves together for the production of the volume before us could scarcely have been found. Both of them are practically conversant with the subject; both have made it the subject of careful study; both have an extensive acquaintance with its literature, and show themselves not only able but willing fairly and fully to estimate what has been done by others; and both write in a pleasant, readable style, free from all attempt at elaborate display, and from the slipshod carelessness which some mistake for ease."—*Westminster Review*.

"It has been reserved for Drs. Bucknill and Tuke to produce a volume that should be a Hand-book for the student and practitioner on the history and practice of the art of curing insanity. Those who know the writings of these gentlemen on the subject of insanity will feel that such a volume could not come from better hands."—*Athenæum*.

"Except Dr. Pritchard's 'Treatise on Insanity,' now older than any medical book to which physicians can refer as an authority for present practice, there has existed no systematic treatise on Psychological Medicine, discussing the whole subject as a department of medical science for the use of students and practitioners. The want is now adequately supplied by the appearance of an admirable book."—*Examiner*.

JOHN CHURCHILL AND SONS, NEW BURLINGTON STREET.

Pulvis Jacobi Ver., Newbery's.

FRANCIS NEWBERY AND SONS,

45, St. Paul's Churchyard.

With 176 Wood Engravings. 1240 pp. 8vo, cloth, 28s.

A MANUAL OF MEDICAL JURISPRUDENCE.

JOHN CHURCHILL AND SONS, NEW BURLINGTON STREET.

With 100 Engravings on Wood, 8vo, cloth, 15s.

THE DISEASES OF THE EAR: their Nature, Diagnosis, and Treatment. By JOSEPH TOYNBEE, F.R.S., Aural Surgeon to, and Lecturer on Aural Surgery at, St. Mary's Hospital.

"We congratulate Mr. Toynbee on the result he now gives us of his twenty long years' experience. To any one accustomed to the examination of the ear it is impossible not to admire the faithfulness with which the various cases and descriptions of diseases are given."—*Edin. Med. Jour.*

JOHN CHURCHILL AND SONS, NEW BURLINGTON STREET.

Third Edition, revised and enlarged, 8vo, cloth, 16s.

THE DISEASES OF WOMEN. By CHARLES WEST, M.D., F.R.C.P.

"Most justly esteemed a standard work. . . . It bears evidence of having been carefully revised, and is well worthy of the fame it has already obtained."—*Dub. Med. Quar. Jour.*

"We return the author our grateful thanks for the vast amount of instruction he has afforded us. His valuable treatise needs no eulogy on our part. His graphic diction and truthful pictures of disease all speak for themselves."—*Med.-Chir. Rev.*
