JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800026155 Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS

PROF. D. BERSHADER

Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, *U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy, University of Manchester, Manchester M*13 9*PL, England*

PROF. W. B. THOMPSON

Department of Physics, University of California, La Jolla, California 92093, *U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

Copying

This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the U.S.A. who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. copyright law) subject to payment to C.C.C of the per copy fee of $02.50. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/81/2828–0001 $02.50.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, U.S.A., is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from the Cambridge or New York offices of the Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 25 and 26 (1981) is £60.00 net per volume (US $177.00 in the U.S.A. and Canada) for institutions; £30.00 (US $88.50) per volume for individuals. Single parts cost £22.50 each (US $66.50 in the U.S.A. and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York. N.Y. *POSTMASTER*: send address changes in U.S.A. and Canada to Cambridge University Press, 32 East 57th Street, New York. N.Y. 10022.

CONTENTS TO VOLUME 25

PART 1 FEBRUARY 1981

Nonlinear cylindrical or spherical converging ion-acoustic pulses. E. OKUTSU *page* 1

Nonlinear evolution of the sheet pinch. W. H. MATTHAEUS and D. MONTGOMERY 11

Plasma dynamics near a self-similar turbulent state. R. BALESCU 43

Surface wave instability in bounded magnetized plasma with inhomogeneous particle stream. D. JOVANOVIĆ and S. VUKOVIĆ 63

Parametric instabilities with well-separated frequencies in magnetized plasmas. Y. M. CHOU and S. T. TSAI 73

Stability of weakly nonlinear ion sound waves with finite ion temperature. E. INFELD and G. ROWLANDS 81

Magnetic field reconnexion in a sheared field. M. UGAI 89

On the kinetic instabilities of uniform magnetized plasmas with generalized loss-cone distribution functions. L. GOMBEROFF and S. CUPERMAN 99

Effect of thermal anisotropy on the loss-cone produced high-frequency quasi-electrostatic ion-cyclotron waves in mixed warm–cold plasmas. L. GOMBEROFF and S. CUPERMAN 103

Hall current effects on tearing modes in rotating reverse field plasmas. J. KAPPRAFF, W. GROSSMANN and M. KRESS 111

Low-frequency heating of doublets. T. H. JENSEN, F. W. MCCLAIN and H. GRAD 133

Three electrostatic drift instabilities. S. P. GARY and B. ABRAHAM-SHRAUNER 145

An approach to rapid plasma shape diagnostics in tokamaks. D. K. LEE and Y.-K. M. PENG 161

The plasma capacitor problem. J. N. ELGIN 175

PART 2 APRIL 1981

Ponderomotive pressure effects in laser driven high-temperature plasma flows. J. L. BOBIN 193

The electrostatic instability of rippled, magnetically focused, non-neutral, cylindrical beams of charged particles. S. CUPERMAN and F. PETRAN 215

https://doi.org/10.1017/S0022377800026155 Published online by Cambridge University Press

Debye shielding of a moving test charge in plasma. C.-L. WANG, G. JOYCE and D. R. NICHOLSON *page* 225

On the 'non-stationary' ponderomotive force of a HF field in a plasma. D. D. TSKHAKAYA 233

Electrostatic waves potential at the plasma and upper-hybrid resonances. J. THIEL and R. DEBRIE 239

Excitation of an ion-acoustic wave by two whistlers in a collisionless magnetoplasma. M. S. SODHA, T. SINGH, D. P. SINGH and R. P. SHARMA 255

Low-frequency heating and induced particle transport in an inhomogeneous plasma with Ohmic current. D. W. FAULCONER 267

Dispersion and energy conservation relations of surface waves in semi-infinite plasma. V. ATANASSOV 285

Rapid collapse of antiparallel magnetic field system of finite width by fast reconnexion. M. UGAI 309

Active and passive methods for the study of non-equilibrium plasmas using electrostatic waves. R. POTTELETTE and L. R. O. STOREY 323

PART 3 JUNE 1981

The plasma wake of mesosonic conducting bodies. Part 1. An experimental parametric study of ion focusing by the plasma sheath. N. H. STONE 351

On the temporal development of a plasma sheath, J. W. CIPOLLA, JR. and M. B. SILEVITCH 373

Statistical acceleration of electrons by lower-hybrid turbulence. C. S. WU, J. D. GAFFEY, JR. and B. LIBERMAN 391

Nonlinear interaction of a Gaussian electromagnetic beam with an electrostatic lower-hybrid wave: Brillouin scattering. M. S. SODHA, T. SINGH and R. P. SHARMA 403

Thermodynamics of the magnetic equilibria of a semi-collisionless plasma. E. MINARDI 413

Nonlinear excitation of magneto-acoustic oscillations by means of an oscillating axial current. I. R. JONES and M. L. SAWLEY 443

Ion-acoustic wave induced convective cells. P. K. SHUKLA and M. Y. YU 451

The bumpy Z-pinch. T. H. JENSEN and M. S. CHU 459

Relativistic effects on strong Langmuir turbulence. H. P. FREUND, C. S. LIU and R. M. KULSRUD 465

Kinetic analysis of electromagnetic wave backscattering in a magnetized plasma. J. E. WILLETT and S. BILIKMEN 479

https://doi.org/10.1017/S0022377800026155 Published online by Cambridge University Press

The interaction of a moving neutral gas with a stationary magnetized plasma. J. F. McKenzie and R. K. Varma 491

Coupled nonlinear Schrödinger equations for Langmuir and electromagnetic waves and extension of their modulational instability domain. M. R. Gupta, B. K. Som and B. Dasgupta 499

Nonlinear excitation of vortices at the upper-hybrid layer. H. U. Rahman, M. Y. Yu and P. K. Shukla 509

Theory of finite-amplitude electron and ion holes. S. Bujarbarua and and H. Schamel 515

Author Index to Volume 25 531
