

# PHILOSOPHY OF SCIENCE

*Typescript.* Typescript, double-spaced, should be submitted (in triplicate) to Professor Philip Kitcher, Department of Philosophy, 0302, University of California, San Diego, La Jolla, CA 92093-0302 U.S.A. Typescripts will not be returned unless return postage is prepaid by check, money order, International Postal Reply Coupons or U.S. stamps. A bibliographical list of cited references beginning with the author's last name, initials, followed by the year of publication in parentheses, should be headed 'References' and placed on a separate sheet in alphabetical order. Simple citations should then be made by employing in the text, *rather than by footnote*, the reference list by citing author and year of publication, for example, Jones (1958) or (Smith 1974, 46). A detailed guide to the new reference style appears in the March issue of each year. Discursive footnotes (consecutively numbered) should be kept to an *absolute minimum*. *An abstract (also in triplicate) of approximately 100 words must accompany typescript. Typescript must not exceed 9,500 words, including abstract, footnotes and references. A word count must be submitted with each essay. Longer essays will be returned (at the author's expense) to be cut to the acceptable maximum.* All figures must be professionally drawn and lettered. All formulas and equations should be put in such a form as to help minimize the number of printed lines in the journal. In the following examples the form on the right is preferable to that on the left:

$$(1) \quad p = -\frac{dx}{dy} = -\frac{dz}{dt} \qquad p = -dx/dy = -dz/dt$$

$$(2) \quad \frac{1}{x} \prod_{n=1}^{\infty} \left( \frac{1 + \frac{1}{a_n}}{1 - \frac{1}{b_n}} \right) \qquad (1/x) \prod_{n=1}^{\infty} [(1 + 1/a_n)/(1 - 1/b_n)]$$

*Processing fee.* There is a fifteen dollar per submission processing fee for individuals who are not members of the Philosophy of Science Association.

*Copyright.* Manuscripts should be submitted to *Philosophy of Science* with the understanding that upon publication copyright will be transferred to the Philosophy of Science Association.

*Reprints.* Contributors of articles to this journal will receive, gratis, 25 reprints. Authors desiring additional reprints may order them by sending in, with their corrected galley, the order forms that they will find enclosed with their galley.

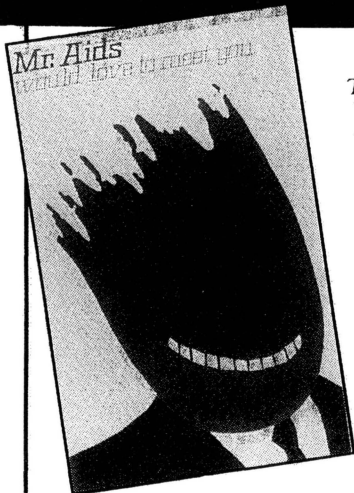

*Reviews.* Publications intended for review should be sent to Professor Merrilee Salmon, at the address given above.

*Philosophy of Science* is published quarterly; issues are dated *March, June, September* and *December* of each year. Correspondence concerning business matters should be addressed to Peter D. Asquith, Executive Secretary, Department of Philosophy, 503 South Kedzie Hall, Michigan State University, East Lansing, Michigan 48824-1032 U.S.A.

*Membership and Subscriptions.* Membership in the Philosophy of Science Association may be applied for by writing to the Executive Secretary of the Association. Membership dues are graduated based on income: income below \$40,000—\$40.00; \$40,000—\$49,999—\$50.00; \$50,000 or above—\$60.00 U.S.A. a year and include subscription to the journal. Subscription price for non-members is \$60.00 U.S.A. (\$65.00 non-U.S.A.) per volume. New subscriptions and renewals are entered to begin with the first issue of the current volume. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value will be refunded to the subscriber. Duplicate copies may be obtained (if available) from the Executive Secretary at the regular price of single issues (\$15.00). Subscriptions at a reduced rate of \$20.00 a year are available to qualified students; inquire of the Executive Secretary.

# ETHICS

*Timothy F. Murphy*

## **Ethics in an Epidemic**

AIDS, Morality, and Culture

In this humane and graceful book, Murphy offers insight into our attempts—popular and academic, American and non-American, scientific and political—to make moral sense of pain as he addresses the complex questions raised by AIDS.

\$32.00 cloth, illustrated

*Paul Lawrence Farber*

## **The Temptations of Evolutionary Ethics**

Farber's compelling book describes a century-old philosophical hope held by many biologists, anthropologists, psychologists,

and social thinkers: that universal ethical and social imperatives are built into human nature and can be discovered through knowledge of evolutionary theory.

\$35.00 cloth

**NEW IN PAPER—**

*David Heyd*

### **Genethics**

Moral Issues in the Creation of People

"A very clear and interesting discussion of the difficulties encountered in any attempt to resolve genetical issues within the context of existing ethical frameworks."

—*The Philosophical Quarterly*

## The Discourses of Science

**MARCELLO PERA**

*Translated by Clarissa Botsford*

Pera seeks to resolve the tension between normative and descriptive philosophies of science by focusing on rhetoric in the construction and acceptance of theories.

"A splendid book. By moving back to Aristotelian notions of rhetoric and dialectic, Pera shows that objective explanatory power yet resides in those areas usually dismissed or undervalued as rhetorical."—Robert J. Richards

**Cloth \$29.95 264 pages**

## Instrumental Biology, or the Disunity of Science

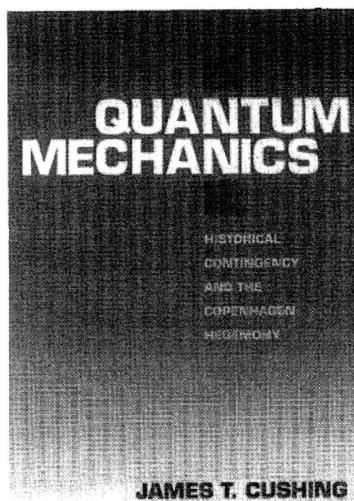

**ALEXANDER ROSENBERG**

"A brilliant argument for a contentious thesis: biological theories reflect our cognitive limitations and special interests to a much greater extent than do theories of physics."—Kenneth C. Waters, University of Minnesota

**Paper \$15.95 208 pages**

**Cloth edition available**

*Science and Its Conceptual Foundations series*

## Quantum Mechanics

*Historical Contingency and the Copenhagen Hegemony*

**JAMES T. CUSHING**

Focusing on the philosophical, social, and cultural forces that have shaped one of the most important developments in modern physics, this provocative book examines the role that timing can play in the establishment of theory and explanation. Cushing contends that the Copenhagen interpretation became widely accepted, not because it is a better explanation of subatomic phenomena than Bohm's but because it happened to appear first.

## In the Wake of Chaos

*Unpredictable Order in Dynamical Systems*

**STEPHEN H. KELLERT**

In this timely book, Stephen H. Kellert takes the first sustained look at the broad intellectual and philosophical questions raised by recent advances in chaos theory—its implications for science as a source of knowledge and for the very meaning of that knowledge itself.

*“In the Wake of Chaos is a wonderfully clear and sane analysis of a tricky subject, and a powerful antidote to the contemporary vogue for chaos in popular science and critical theory.”*—Stephen Toulmin

**Paper \$10.95 190 pages illus.**

*Science and Its Conceptual Foundations series*

## Galileo, Courtier

*The Practice of Science in the Culture of Absolutism*

**MARIO BIAGIOLI**

*“In this brilliantly original reexamination of Galileo, Biagioli frames the mathematician’s career within the intricate play of etiquette, rhetoric, and patronage at Italian princely courts.”*—*New Yorker*

*“An especially striking example of the new historiography. . . . The delineation of this court life is so graphic and detailed that, after a while, the reader has a sense of being there.”*—Richard J. Blackwell, *Science*

**Paper \$16.95 416 pages illus.**

*Science and Its Conceptual Foundations series*

## Economics— Mathematical Politics or Science of Diminishing Returns?

**ALEXANDER ROSENBERG**

*“Rosenberg is a fierce and forthright arguer. He draws on extensive knowledge of economics, as well as command of methodological issues in the biological and physical sciences, to present a challenging, instructive, and highly controversial view of the status of knowledge claims of modern economics.”*—Michael S. McPherson, Williams College

## DARWINISM EVOLVING

### **Systems Dynamics and the Genealogy of Natural Selection**

*David J. Depew and Bruce H. Weber*

"This volume by Depew and Weber constitutes an academic contribution of the first rank. What the authors uncover about the past and propose for the future is revolutionary, indeed!"

— Robert Ulanowicz, Chesapeake Biological Laboratory  
of the University of Maryland

A Bradford Book 592 pp. 11 illus. \$45.00

## EVOLUTION EXTENDED

### **Biological Debates on the Meaning of Life**

*edited by Connie Barlow*

"Biology is the most philosophical of all sciences, the most broadly germane to the big questions about human existence. In *Evolution Extended*, Connie Barlow has painstakingly assembled a body of writings (many of them classics) that make this fact beautifully vivid. The result is an engrossing conversation about our creator—natural selection—and its meaning."

—Robert Wright, author of *Three Scientists and Their Gods* and *The Moral Animal*
