UNIVERSITY PRESS**

Seed Science Research is the official Journal of the International Society for Seed Science

The contents of this journal are available to subscribers online at

### **Aims and Scope**

*Seed Science Research* is an international journal that publishes original papers, as well as reviews and opinion papers, dealing primarily with the fundamentals of seed research with emphasis on the physiology, biochemistry, molecular biology and ecology of seed development, dormancy and germination. The importance of seeds to propagation, food, biofuel and biodiversity is of increasing interest and therefore submissions on seed genetics, seed biotechnology, seed treatment and seedling establishment are especially encouraged if they are novel and 'seed driven'.
