

Advances in X-ray Analysis
Volumes 1- 39 (1957 – 1995)

**Volume 28. Thirty-third Annual Conference on
Applications of X-ray Analysis, July 30-August
3, 1984**

CONTENTS

I. THE ROLE OF X-RAY FLUORESCENCE IN A MODERN ANALYTICAL LABORATORY (PLENARY SESSION PAPERS)

Total Reflectance X-Ray Spectrometry.	1
Hannes Aiginger and Peter Wobrauschek	
XRF and Other Surface Analysis Techniques	11
John C. Russ	
The Role of X-Ray Fluorescence in a Modern Geochemical Laboratory	17
Joseph E. Taggart, Jr.	

II. MATHEMATICAL MODELS AND COMPUTER APPLICATIONS IN XRF

Use of Primary Beam Filtration in Estimating Mass Attenuation Coefficients by Compton Scattering	25
B. H. O'Connor and W-J. Chang	
An Evaluation of Correction Algorithms, Using Theoretically Calculated Intensities	31
B. A. R. Vrebos and J. A. Helsen	
Monte Carlo Simulations of XRF Intensities in Samples Containing a Dispersed Phase	37
B. A. R. Vrebos and J. A. Helsen	
Two Easily-Overlooked Sources of Error in XRF Intensity Measurements.	39
Peter B. DeGroot	
Coordination Analysis by High Resolution X-Ray Spectroscopy . . .	45
You-Zhao Bai, Sei Fukushima and Yohichi Gohshi	

III. NEW TECHNIQUES AND INSTRUMENTATION IN XRF

The Application of Tunable Monochromatic Synchrotron Radiation to the Quantitative Determination of Trace Elements.	53
R. D. Giaouque, J. M. Jaklevic and A. C. Thompson	

Energy Dispersive X-Ray Fluorescence Analysis Using Synchrotron Radiation.	61
Atsuo Iida, Yohichi Gohshi and Tadashi Matsushita	
The Application of Linear Polarized X-Rays after Bragg Reflection for X-Ray Fluorescence Analysis.	69
Peter Wobrauschek and Hannes Aiginger	
Trace Analytical Capabilities of Total-Reflection X-Ray Fluorescence Analysis.	75
W. Michaelis, J. Knoth, A. Prange and H. Schwenke	
Qualitative Analysis of X-Ray Spectra	85
John C. Russ	
K-Edge X-Ray Fluorescence Analysis for Actinide and Heavy Elements Solution Concentration Measurements	91
David C. Camp	
Excitation and Detection of High Energy Characteristic X-Rays (20-90 KeV) Using a Novel Radiometric Technique.	99
J. J. LaBrecque and P. A. Rosales	
An Examination of the Overall Stability of an XRF Spectrometer with Special Reference to Fourier Analysis of Temporal Variation.	103
T. K. Smith	
Evaluation of the New Generation of Dual-Anode X-Ray Tubes	107
J. N. Kikkert and J. J. de Koning	
Comparison of Various X-Ray Tube Types for XRF Analysis	113
Y. M. Gurvich	
IV. RECENT DEVELOPMENTS IN LONG-WAVELENGTH SPECTROSCOPY	
Reflection Intensity Dependence on Surface and Wavelength from LiF and EDT Analyzer Crystals.	119
K. Toh, T. Ui and E. Asada	
A Soft X-Ray Experimental Facility	127
John V. Gilfrich, David J. Nagel, Mohammad Fatemi, Richard D. Bleach and Karrol R. Hudson	
Wavelength Dispersing Devices for Soft and Ultrasoft X-Ray Spectrometers	137
Tomoya Arai, Takashi Shoji and Richard W. Ryon	
V. APPLICATIONS OF XRF AND XRD TO LIFE SCIENCES AND THE ENVIRONMENT	
Feasibility Studies of X-Ray Fluorescence as a Method for the In Vivo Determination of Platinum and Other Heavy Metals	145
J. Dutton, C. J. Evans, S. B. Samat, W. D. Morgan and A. Sivyer	

CONTENTS

xiii

A Fast, Versatile X-Ray Fluorescence Method for Measuring Tin in Impregnated Wood.	155
Iver Drabaek and Leif Højslet Christensen	
Certification of Reference Materials by Energy-Dispersive X-Ray Fluorescence Spectrometry?.	161
Leif Højslet Christensen and Kaj Heydorn	
Evaluating the Variability of Southwestern Ceramics with X-Ray Fluorescence	169
Patricia L. Crown, L. A. Schwalbe and J. R. London	
An XRF Method for the Analysis of Atmospheric Aerosol and Vehicular Particulate Deposits on Filters	177
M. J. Rokosz, B. E. Artz and R. K. Belitz	
VI. XRF APPLICATIONS: MINERALOGICAL, GENERAL	
Analysis of River Sediments from the Tigre River (Venezuela) by Radioisotope Excited X-Ray Fluorescence	185
J. J. LaBrecque, H. Schorin and P. A. Rosales	
Energy-Dispersive XRF Analysis of Intact Salt Drill Cores.	189
R. J. Arthur, J. C. Laul and N. Hubbard	
The Use of Rapid Quantitative X-Ray Fluorescence Analysis in Paper Manufacturing and Construction Materials Industry.	195
Vladimir Kocman, Linda Foley and Stanley C. Woodger	
Analysis of Diatomaceous Earth by X-Ray Fluorescence Techniques	203
Jim Parker	
Fundamental Parameters vs. Multiple Regression Calculations for the Determination of Europium in Oxide Catalyst Supports by XRF	209
Eva M. Kenny and Harry G. Brittain	
EDXRF Determination of Major and Minor Elements in Compound Fertilizers.	215
Leif Højslet Christensen and Leif Rasmussen	
Analysis of Wet-Process Phosphoric Acid and By-Product Filter Cake by X-Ray Spectrometry	221
Wendell D. Wilhide and Doris H. Ash	
VII. NEW TECHNIQUES AND INSTRUMENTATION IN XRD	
The Rapid Simultaneous Measurement of Thermal and Structural Data by a Novel DSC/XRD Instrument	227
T. G. Fawcett, C. E. Crowder, L. F. Whiting, J. C. Tou, W. F. Scott, R. A. Newman, W. C. Harris, F. J. Knoll and V. J. Caldecourt	

Balanced Filters for an Annular Counter.	233
Peter A. Steinmeyer	
X-Ray Diffraction Measurements via a UNIX [†] Based System.	241
D. S. Dunn and T. F. Marinis	
TSX-PLUS Multi-Tasking Upgrade for the Nicolet L-11 Powder Diffraction System.	249
J. Fitzpatrick and David L. Queen	

VIII. X-RAY STRAIN AND STRESS DETERMINATION

X-Ray Multiaxial Stress Analysis on Materials with Stress Gradient by Use of $\text{Cos}\psi$ Function	255
Yasuo Yoshioka, Toshihiko Sasaki and Makoto Kuramoto	
A Practical ϕ -Method for the Evaluation of Stress on Materials with Stress Gradient by X-Rays.	265
Toshihiko Sasaki, Makoto Kuramoto and Yasuo Yoshioka	
Residual Stress Measurements in Inconel Alloy 600 Tubing Using an Advanced X-Ray Instrument and Cr K β Radiation	275
D. P. Ivkovich, C. O. Ruud and D. J. Snoha	
Determination of the Unstressed Lattice Parameter " a_0 " for (Triaxial) Residual Stress Determination by X-Rays	281
Ismail C. Noyan	
X-Ray Fractographic Approach to Fracture Toughness of AISI 4340 Steel	289
Yukio Hirose, Zenjiro Yajima and Keisuke Tanaka	
Strain Measurements on Single Crystals and Macrograins with the Aid of an Automated Phi-Psi Goniometer	297
B. Pathiraj, H. Koster, A. M. Nijssen, P. F. Willemse and B. H. Kolster	

IX. XRD SEARCH/MATCH METHODS AND QUANTITATIVE ANALYSIS

The Quality of X-Ray Diffraction Standards for Phosphate Minerals and the Degree of Success in Computer Identification	305
Frank N. Blanchard	
Results of a Round Robin Study of Systematic Errors Found in Routine X-Ray Diffraction Raw Data.	309
Walter N. Schreiner and Tim Fawcett	
An X-Ray Diffraction Procedure for Measuring Retained Austenite in High Chromium White Cast Iron	315
Gerald W. Whelan and Peter J. Moroz, Jr.	
Quantitative X-Ray Analysis of ICPP Simulated High Alumina Calcine	321
Paul Sliva, Mary Bliss and Barry E. Scheetz	

X. XRD APPLICATIONS

High Temperature XRD Studies of Selected Carbonate Minerals.	331
S. S. Iyengar, P. Engler, M. W. Santana and E. R. Wong	
High Temperature X-Ray Diffraction Studies of the Defluorination Reactions of Chukhrovite, Falphite and Ralstonite	339
Robert L. Wilson, Jacob Mu and James L. Bradford	
Low Thermal Expansion of Alkali Zirconium Phosphates Using a Microcomputer Automated Diffractometer	345
G. E. Lenain, H. A. McKinstry and S. Y. Limaye	
The Structure and Lattice Parameters of Pentaerythritol Above and Below Its Phase-Transition Temperature	353
Dhanesh Chandra, Joan J. Fitzpatrick and Gary Jorgensen	
A Comparison of Detection Systems for Trace Phase Analysis	361
Stephen B. Robie and Thomas R. Scalzo	
X-Ray Diffraction/Electron Microprobe Analysis of Surface Films Formed on Alloys During Hydrothermal Reaction with Geologic Materials.	367
R. G. Johnston, M. B. Strope and R. P. Anantatmula	
Determination of the Crystal System of a Neodymium-Iron-Boron Alloy by X-Ray Diffraction	377
Andrew M. Wims and Jack L. Johnson	
An X-Ray Diffraction Method for the Determination of Temperatures in Coke Reactions	383
Jack L. Johnson and Seymour Katz	
Author Index	389
Subject Index	391
